MICHAELA BRYNN

Great Ship Disasters

Capstone

Fascinating, never-before-documented stories of the worst shipwrecks on the Pacific Coast during the golden age of coastal transportation, 1854 to 1929 In this intriguing

chronicle, author Robert Belyk closely examines ten significant maritime disasters that occurred during one of the most turbulent eras in the history of travel. Discover the real-life drama endured by those caught in the terrifying midst of disaster at sea??and the real causes behind the tragedies. Vividly re-created and painstakingly

researched, the shipwrecks accounted for here include: 1854: the Yankee Blade runs aground off Point Arguello, California. Twenty-eight passengers lose their lives. 1875: The old side-wheeler Pacific rams another passenger ship off the coast of Cape Flattery, Washington. Two hundred and seventy-

seven people perish when her rotting hull gives way. 1906: The Valencia strikes a reef off the Washington coastline. Before dozens of dazed onlookers on the shore, the ship goes down, taking 117 passengers and crew with her.

The Ship of Dreams

Courier Corporation
Titanic – the most magnificent ocean liner of her time – was doomed and destined for disaster before she ever left the docks at Southampton. Doomed by her owner, doomed by her designers,

doomed by the men who sailed her -- doomed even by her sister ship. Author Bryan Jackson presents a new and unique look at the many circumstances that came together the night of April 14, 1912 to claim over 1,500 lives and leave Titanic lying in 12,000 feet of water on the bottom of the North Atlantic. Each chapter details how seemingly disconnected pieces served to create a tragedy that remains as significant today as it was over a century ago. They include flawed design

decisions, outdated regulations, substandard materials, weather conditions, lookouts left blinded and warnings never acted upon. Perhaps the most fascinating piece is a look at how events involving sister ship Olympic would result in Titanic being placed directly on course to meet the iceberg which would sink her. In addition, Jackson offers a look at the circumstances that saved some from perishing in the tragedy. They range from the rich and famous -- to family

members traveling in third-class who managed to escape the sinking while the majority of the passengers sailing in those accommodations would not survive. Also provided is a comprehensive Titanic timeline which details the events which lead to her construction -- and eventual destruction.

New Carissa Tor Books
Before the advent of commercial transatlantic flights in the early 1950s, the only way to travel between continents was by sea. In the golden age

of ocean liners, between the late nineteenth century and the Second World War, shipping companies ensured their vessels were a home away from home, providing entertainment, dining, sleeping quarters and smoking lounges to accommodate passengers of all ages and budgets, for voyages that could last as long as three months. *Secrets of the Great Ocean Liners* leads the reader through each of the stages - and secrets - of ocean liner travel, from booking a ticket and

choosing a cabin to shore excursions, dining, on-board games, social events, romances, and disembarking on arrival. Additional chapters disclose wartime voyages and disasters at sea. The shipping companies produced glamorous brochures, sailing schedules, voyage logs, passenger lists, postcards and menus, all of which help us to savour the challenges, etiquette and luxury of ocean liner travel. Diaries, letters and journals written on board also reveal a host of

behind-the-scenes secrets and fascinating insights into the experience of travelling by sea. This book dives into a vast, unique collection to reveal the scandals, glamour, challenges and tragedies of ocean liner travel.

Ocean Liners Pen and Sword History

This illustrated and colourful history charts the hey-day of the great liners, those grand and lavish vessels that cruised around the world carrying their glamorous passengers from port to port. Decorated to the

highest of finishes, fitted out in the most luxurious of styles, these floating palaces epitomised their opulent age. Their iconic names, from Titanic to Mauretania, from Queen Elizabeth to QE2, conjure up visions of power, grace, elegance and nostalgia for this golden age of travel. Written by maritime and cruise liner expert William Miller, and accompanied by stunning photographs, artworks, Did You Know facts and quotations, *The Great Liners Story* is a must-have addition to any

maritime library.

Some 200 superb photographs -- in long shots and close-ups -- capture exquisite interiors of world's great "floating palaces" -- 1890s to 1980s: Titanic, le de France, Queen Elizabeth, United States, Europa, more. Informative captions provide key details.

The Wreck of the River of Stars Da Capo Press

During the evening of October 4, 1980, in the

Pacific Ocean nearly 330 miles from Valdez, Alaska, a fire engulfed the engine room of the Prinsendam, a Holland America cruise ship carrying 320 passengers, most of them elderly. As the fire raged out of control, the ship's captain faced the most dire decision of his career: Could he give the order to abandon ship in the face of a typhoon bearing down on the Prinsendam's position? The story of this disaster at sea, and of the near-miraculous rescue that ensued, is recounted in heart-stopping detail in

this powerful book. Drawing on extensive interviews with passengers, crew, and coast guardsmen, combined with exhaustive research, *Saving the Prinsendam* brings to life the last moments of the doomed cruise ship and the heroic efforts of the Coast Guardsmen who managed to transport every passenger to safety before the Prinsendam rolled and slid bow-first to the bottom on October 11. Told in the hour-by-hour style of Walter Lord's Titanic classic: *A Night to*

Remember, the book recreates the drama of one of the most memorable—and successful—rescue operations ever to be conducted at sea.

Dover Publications

"On February 4th, 1999, the 639-foot cargo ship named *New Carissa* ran aground off the Oregon Coast near Coos Bay. What started out to be a routine salvageable rescue operation, turned

into one of the largest and most expensive maritime disasters ever recorded in Oregon's history. This is the true story behind 'the ship that refused to die.'" -P [3].

The Ship Model Builder's Assistant Рипол Классик
 "A fascinating historical account...A snapshot of the American Dream culminating with this country's mid-century greatness" (The Wall Street Journal) as a man endeavors to build the finest, fastest, most beautiful ocean liner in history. The story of a

great American Builder at the peak of his power, in the 1940s and 1950s, William Francis Gibbs was considered America's best naval architect. His quest to build the finest, fastest, most beautiful ocean liner of his time, the SS United States, was a topic of national fascination. When completed in 1952, the ship was hailed as a technological masterpiece at a time when "made in America" meant the best. Gibbs was an American original, on par with John Roebling of the Brooklyn Bridge and Frank Lloyd

Wright of Fallingwater. Forced to drop out of Harvard following his family's sudden financial ruin, he overcame debilitating shyness and lack of formal training to become the visionary creator of some of the finest ships in history. He spent forty years dreaming of the ship that became the SS United States. William Francis Gibbs was driven, relentless, and committed to excellence. He loved his ship, the idea of it, and the realization of it, and he devoted himself to

making it the epitome of luxury travel during the triumphant post-World War II era. Biographer Steven Ujifusa brilliantly describes the way Gibbs worked and how his vision transformed an industry. *A Man and His Ship* is a tale of ingenuity and enterprise, a truly remarkable journey on land and sea.

Doomed Ships Courier Dover Publications
Michael Flynn has written the best SF in the tradition of Robert A. Heinlein of the last decade. His major work

was the *Firestar* sequence, a four-book future history. "As Robert A. Heinlein did and all too few have done since, Michael Flynn writes about the near future as if he'd been there and was bringing back reports of what he'd seen," said Harry Turtledove. Now, in this sweeping stand-alone epic of the spaceways, Flynn grows again in stature, with an SF novel worthy of the master himself. Indeed, if Heinlein's famous character, the space-faring poet Rhysling, had

ever written a novel, this would be it. This is a compelling tale of the glory that was. In the days of the great sailing ships, in the mid-twenty-first century, when magnetic sails drew cargo and passengers alike to every corner of the solar system, sailors had the highest status of all spacemen, and the crew of the luxury liner the *River of Stars*, the highest among all sailors. But development of the Farnsworth fusion drive doomed the sailing ships, and now the *River of Stars*

is the last of its kind, retrofitted with engines, her mast vestigial, her sails unraised for years. An ungainly hybrid, she operates in the late years of the century as a mere tramp freighter among the outer planets, and her crew is a motley group of misfits. Stepan Gorgas is the escapist executive officer who becomes captain. Ramakrishnan Bhattejji is the chief engineer who disdains him. Eugenie Satterwaithe, once a captain herself, is third officer and, for form's

sake, sailing master. When an unlikely and catastrophic engine failure strikes the River, Bhattejji is confident he can effect repairs with heroic engineering, but Satterwaithe and the other sailors among the crew plot to save her with a glorious last gasp for the old ways, mesmerized by a vision of arriving at Jupiter proudly under sail. The story of their doom has the power, the poetry, and the inevitability of a Greek tragedy. This is a great science fiction novel, Flynn's best yet. At

the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied. *Titanic* John Wiley & Sons Legacy of the world's greatest ocean liner, sinking, maiden voyage. *Narratives of the Wreck of the Whale-Ship Essex* Rowman & Littlefield This original and "meticulously researched retelling of history's most infamous voyage" (Denise Kiernan, New York Times bestselling author) uses the sinking of the Titanic as a prism through which

to examine the end of the Edwardian era and the seismic shift modernity brought to the Western world. “While there are many Titanic books, this is one readers will consider a favorite” (*Voyage*). In April 1912, six notable people were among those privileged to experience the height of luxury—first class passage on “the ship of dreams,” the RMS Titanic: Lucy Leslie, Countess of Rothes; son of the British Empire Tommy Andrews; American captain of industry John Thayer and

his son Jack; Jewish-American immigrant Ida Straus; and American model and movie star Dorothy Gibson. Within a week of setting sail, they were all caught up in the horrifying disaster of the Titanic’s sinking, one of the biggest news stories of the century. Today, we can see their stories and the Titanic’s voyage as the beginning of the end of the established hierarchy of the Edwardian era. Writing in his signature elegant prose and using previously unpublished

sources, deck plans, journal entries, and surviving artifacts, Gareth Russell peers through the portholes of these first-class travelers to immerse us in a time of unprecedented change in British and American history. Through their intertwining lives, he examines social, technological, political, and economic forces such as the nuances of the British class system, the explosion of competition in the shipping trade, the birth of the movie industry, the Irish Home

Rule Crisis, and the Jewish-American immigrant experience while also recounting their intimate stories of bravery, tragedy, and selflessness. Lavishly illustrated with color and black and white photographs, this is “a beautiful requiem” (The Wall Street Journal) in which “readers get the story of this particular floating Tower of Babel in riveting detail, and with all the wider context they could want” (Christian Science Monitor).
The Ship of Doom Time

A revised and enhanced new edition of this classic work, filling an important gap in maritime history *Ocean Liner Collectibles* AuthorHouse
"The great age of ocean travel has long since passed, but ocean liners

remain one of the most powerful and admired symbols of modernity. No form of transport was as romantic, remarkable, or contested, and ocean liner design became a matter of national prestige as well as an arena in which the larger dynamics of global competition were played out. This beautifully illustrated book considers over a century of liner design: from the striking graphics created to promote liners to the triumphs of engineering, and from luxurious interiors to on

board fashion and activities. 'Ocean Liners' explores the design of Victorian and Art Deco 'floating palaces', sleek post-war liners as well as these ships' impact on avant-garde artists and architects such as Le Corbusier." -- publisher's description.
Secrets of the Great Ocean Liners Courier Corporation
The SS Portland was a solid and luxurious ship, and its loss in 1898 in a violent storm with some 200 people aboard was later remembered as

“New England’s Titanic.” The Portland was one of New England's largest and most luxurious paddle steamers, and after nine years' solid performance, she had earned a reputation as a safe and dependable vessel. In November 1898, a perfect storm formed off the New England coast. Conditions would produce a blizzard with 100 miles per hour winds and 60-foot waves that pummeled the coast. At the time there was no radio communication between ships and shore, no sonar to navigate by,

and no vastly sophisticated weather forecasting capacity. The luxurious SS Portland, a sidewheel steamer furnished with chandeliers, red velvet carpets and fine china, was carrying more than 200 passengers from Boston to Portland, Maine, over Thanksgiving weekend when it ran headlong into a monstrous, violent gale off Cade Cod. It was never seen again. All passengers and crew were lost at sea. More than half the crew on

board were African Americans from Portland. Their deaths decimated the Maine African American community. Before the storm abated it became one of the worst ever recorded in New England waters. The storm, now known as “The Portland Gale,” killed 400 people along the coast and sent more than 200 ships to the bottom, including the doomed Portland. To this day it is not known exactly how many passengers were aboard or even who many of them were. The only

passenger list was aboard the vessel. As a result of this tragedy, ships would thereafter leave a passenger manifest ashore. The disaster has been blamed on the hubris of the captain of the Portland, Hollis Blanchard, who decided to leave the safety of Boston Harbor despite knowing that a severe storm was hurtling up the coast. Blanchard, a long-time mariner, had been passed over for a promotion for a younger captain. He decided he wanted to show the steamship

company that they had made a mistake by getting the Portland safely into port ahead of the imminent storm. Author J. North Conway has created here a personal, visceral account of the sinking and the times and the people involved, with stories to bring readers onto the Portland that day: Here is Eben Heuston, the chief steward onboard the ill-fated ship. More than half of the crew of the ship were African Americans. Hueston was an African American who lived in the Portland community of

Munjoy Hill and was a member of the Abyssinian Church. After the sinking of the Portland the African American community disappeared and the church closed. And Emily Cobb a nineteen year old singer from Portland's First Parish Church who was scheduled to give her first recital at the church on that Sunday. And Hope Thomas who came to Boston to shop for Christmas and because she decided to exchange some shoes she purchased missed taking the ill-fated Portland.

Because of the lack of communications from Maine to Cape Cod, it was days before anyone was able to get word about the fate of the ship or survivors. Author J. North Conway has painstakingly recreated the events, using first-hand sources and testimonies to weave a dramatic, can't-put-it-down narrative in the tradition of Erik Larson's

Isaac's Storm and Walter Lord's enduring classic, *A Night to Remember*. He brings the tragedy to life with contemporaneous accounts the Coast Guard, from Boston newspapers such as the *Globe*, *Herald*, and *Journal*, and from *The New York Times* and the *Brooklyn DailyEagle*.

Futility, Or The Wreck Of The Titan Zenith Press

Invaluable guide offers detailed descriptions, drawings of masting, rigging, and major fittings of American clippers and packets. Also includes wealth of details on deck furniture. 279 line drawings.
