Reading People, Body Language Recognizing Emotions & Facial Expressions Learning how to analyze people is a very worthwhile and important pursuit that most people should undertake. When you know how to read people, an entirely new world of possibilities opens up before you. Human psychology is a subject that is somewhat shrouded in mystery, but understanding

a few simple facts about body language will greatly improve your skills in reading people. Here are some key points you will learn in this guide: Why does Body Language Matter? For someone who is new to this subject, it might be a mystery why body language matters very much. After all, we developed speech in order to communicate, and that's all we need, right? Actually,

speech is only a tiny part of communication, and most of what we say is done nonverbally. Someone can say one thing, for example, in a tone that communicates something entirely different. Learning the difference is of crucial importance in life. Before you Analyze People: It's exciting to start learning how to read people's cues, but there are some things you need to know about before diving in. For

example, are the conditions right for reading someone? Do you have any biases that may color what you are observing and interpreting? Have you established a baseline for that person's personality? If you don't know what this means, don't worry, you will learn in chapter three. All of these are worth considering before you start trying to analyze the people in your life. Foolproof Techniques for

Reading Body Language: After you have gone through the motions of preparing to read someone, how do you actually do it? What do certain movements of the eyes, legs, and arms mean? What does it mean if someone is blinking a lot? Every motion means something different. When someone Likes you or is Lying: Who hasn't wanted to be able to know when someone they like returns

their feelings? Who hasn't been curious about being able to tell when someone is lying or being truthful? Taking it upon yourself to learn how to analyze people and read their nonverbal cues will help you in this area, as well as in many others. In the last couple of chapters of this book, you will get a quick and simple guide to being able to tell when someone thinks favorably of

you, as well as signs that they are not being honest with you. Other topics we will cover in this book:

If you're tired of being manipulated, whether you're being tricked into doing things you don't

want, or others are taking advantage of you, there are ways to stop manipulation and persuasion in its tracks. In this book, you will get a groundwork for what different types of persuasion and manipulation might be. You will learn the process of how people use these tactics to their advantage. The first half of the book will discuss what makes up an individual. The way you use

your body, the words that you choose to speak, and the way that they were raised all play important roles in what makes an individual. You will also have to look at your own self and pick out all of these unique things that make them different from everyone else as well. There are psychological studies that back up the idea of certain methods of persuasion, such as NLP tactics, that prove that anyone has the power to

It's important
when reading

this book to remember that not all manipulation is bad. In the first book of this boxset, it is emphasized that those who might be manipulating you might also be taking advantage of you. When reading this book, you should remember that manipulation is a tool, much like a hammer. You can either use that hammer to destroy everything around you, or you could alternatively use that

hammer to create something organic, something new. This book will take you first through the discovery and analyzation of those around you, and then it will provide different ways that you can persuade them. The only thing you need before starting this book is the willingness to change. You might have to confront some of your darkest issues, and you might have to put yourself

through future scenarios that elicit a feeling of discomfort. In the end, however, you'll find yourself to be much more self-aware and independent. Click "Add to Cart" now and learn how to defend against dark psychology and keep your mind and life in control.

The most essential thing in the world to any individual is to

understand himself. The next is to understand the other fellow. For life is largely a problem of running your own car as it was built to be run, plus getting along with the other drivers on the highway. From this book you are going to learn which type of car you are and the main reasons why you have not been getting the maximum of service out of yourself. Also you are going to learn the makes of other human

cars, and how to get the maximum of co-operation out of them. This co-operation is vital to happiness and success. We come in contact with our fellowman in all the activities of our lives and what we get out of life depends, to an astounding degree, on our relations with him.
