Mastering Assessment: A Self-Service System for Educators, 2/e (hereafter referred to as MA) is a set of 15 booklets intended to be the grist for a wide variety of professional development programs focused on educational assessment. Each of the MA booklets was deliberately written to permit a one-sitting or two-sittings reading by busy educators. The resultant brevity of the MA booklets, coupled with their being provided as separate documents, is intended to provide users of the MA system with considerable latitude in determining how best to use the booklets. A Facilitator's Guide is available to guide educators in using the 15 booklets in their professional development programs and can be downloaded at no additional charge from

Pearson's Instructor Resource Center. Kagero Nikki, translated here as *The Gossamer Years*, belongs to the same period as the celebrated *Tale of Genji* by Murasaki Shikibu. This remarkably frank autobiographical diary and personal confession attempts to describe a difficult relationship as it reveals two tempestuous decades of the author's unhappy marriage and her growing indignation at rival wives and mistresses. Too impetuous to be satisfied as a subsidiary wife, this beautiful (and unnamed) noblewoman of the Heian dynasty protests the marriage system of her time in one of Japanese literature's earliest attempts to portray difficult elements of the predominant social hierarchy. A classic work of early Japanese prose, *The Gossamer Years* is an important example of the development of Heian literature, which, at its best, represents an extraordinary flowering of realistic expression, an attempt, unique for its age, to treat the human condition with frankness and honesty. A timeless and intimate glimpse into the culture of ancient Japan, this translation by Edward Seidensticker paints a revealing picture of married life in the Heian period.

The updated edition of the bestselling book that has changed millions of lives with its insights into the growth mindset "Through clever research studies and engaging writing, Dweck illuminates how our beliefs about our capabilities exert tremendous influence on how we learn and which paths we take in life."—Bill Gates, *GatesNotes* After decades of research, world-renowned Stanford University psychologist Carol S. Dweck, Ph.D., discovered a simple but groundbreaking idea: the power of mindset. In this brilliant book, she shows how success in school, work, sports, the arts, and almost every area of human endeavor can be dramatically influenced by how we think about our talents and abilities. People with a fixed mindset—those who believe that abilities are fixed—are less likely to flourish than those with a growth mindset—those who believe that abilities can be developed. Mindset reveals how great parents, teachers, managers, and athletes can put this idea to use to foster outstanding accomplishment. In this edition, Dweck offers new insights into her now famous and broadly embraced concept. She introduces a phenomenon she calls false growth mindset and guides people toward adopting a deeper, truer growth mindset. She also expands the mindset concept beyond the individual, applying it to the cultures of groups and organizations. With the right mindset, you can motivate those you lead, teach, and love—to transform their lives and your own.

The annual workshop on multiword expressions takes place since 2001 in conjunction with major computational linguistics conferences and attracts the attention of an ever-growing community working on a variety of languages, linguistic phenomena and related computational processing issues. MWE 2017 took place in Valencia, Spain, and represented a vibrant panorama of the current research landscape on the computational treatment of multiword expressions, featuring many high-quality submissions. Furthermore, MWE 2017 included the first shared task on multilingual identification of verbal multiword expressions. The shared task, with extended communal work, has developed important multilingual resources and mobilised several research groups in computational linguistics worldwide. This book contains extended versions of selected papers from the workshop. Authors worked hard to include detailed explanations, broader and deeper analyses, and new exciting results, which were thoroughly reviewed by an internationally renowned committee. We hope that this distinctly joint effort will provide a meaningful and useful snapshot of the multilingual state of the art in multiword expressions modelling and processing, and will be a point point of reference for future work.

Taken from "The Talented Tenth" written by W. E. B. Du Bois: The Negro race, like all races, is going to be saved by its exceptional men. The problem of education, then, among Negroes must first of all deal with the Talented Tenth; it is the problem of developing the Best of this race that they may guide the Mass away from the contamination and death of the Worst, in their own and other races. Now the training of men is a difficult and intricate task. Its technique is a matter for educational experts, but its object is for the vision of seers. If we make money the object of man-training, we shall develop money-makers but not necessarily men; if we make technical skill the object of education, we may possess artisans but not, in nature, men. Men we shall have only as we make manhood the object of the work of the schools-intelligence, broad sympathy, knowledge of the world that was and is, and of the relation of men to it-this is the curriculum of that Higher Education which must underlie true life. On this foundation we may build bread winning, skill of hand and quickness of brain, with never a fear lest the child and man mistake the means of living for the object of life.

Count and explore the zany world and words of Seuss in this classic picture book. From counting to opposites to Dr. Seuss's signature silly rhymes, this book has everything a beginning reader needs! Meet the bumpy Wump and the singing Ying, and even the winking Yink who drinks pink ink. The silly rhymes and colorful cast of characters will have every child giggling from morning to night. From near to far from here to there, funny things are everywhere. Originally created by Dr. Seuss himself, Beginner Books are fun, funny, and easy to read. These unjacketed hardcover early readers encourage children to read all on their own, using simple words and illustrations. Smaller than the classic large format Seuss picture books like *The Lorax* and *Oh, the Places You'll Go!*, these portable packages are perfect for practicing readers ages 3-7, and lucky parents too!
