 Conference Interpreting: A Student's Practice Book brings together a comprehensive compilation of tried and tested practical exercises which hone the sub-skills that make up successful conference interpreting. Unique in its exclusively practical focus, Conference Interpreting: A Student's Practice Book, serves as a reference for students and teachers seeking to solve specific interpreting-related difficulties. By breaking down the necessary skills and linking these to the most relevant and effective exercises students can target their areas of weakness and work more efficiently towards greater interpreting competence. Split into four parts, this Practice Book includes a detailed introduction offering general principles for effective practice drawn from the author's own extensive experience as an interpreter and interpreter-trainer. The second 'language' section covers language enhancement at this very high level, an area that standard language courses and textbooks are unable to deal

with. The last two sections cover the key sub-skills needed to effectively handle the two components of conference interpreting; simultaneous and consecutive interpreting. Conference Interpreting: A Student's Practice Book is non language-specific and as such is an essential resource for all interpreting students regardless of their language combination. "A valuable cram course in how to survive the rest of your life." - James Howard Kunstler. Author of *The Long Emergency*, *Too Much Magic*, *The Geography of Nowhere*, and *The World Made By Hand* For billions of people, the ongoing economic crisis has marked the end of the world as we know it. The "American Dream" (and ones like it) of a guaranteed job, a home, and a pension, has given way to the nightmare of unemployment, unpayable debt, depression, and uncertainty. In *Survive The Economic Collapse*, Piero San Giorgio looks behind the headlines and sound bites and demonstrates that today's economic crisis is no temporary "downturn," nor is it simply the result of bad policies. The crisis is the beginning of the end of a global

paradigm when expectations of endless economic growth and progress crash up against the reality of scarcity and limited resources. The implications of the collapse cannot be ignored: a steep decline in living standards due to the evaporation of easy credit; a new political landscape that might inspire nationalism, geopolitical reshuffling, and wars over resources; and, potentially, a reduction in global population. No mere doom-sayer, San Giorgio explains not just how to understand the crisis but overcome it to foster a resilient community, stay healthy, and become self-sufficient and productive in the "interesting times" that lie ahead. Packed with tactical information and resources, *Survive* is nothing less than a field manual for the apocalypse. This edition has been thoroughly reedited and includes an extensive postscript detailing global developments in the past decade.

Using original sources--such as newspaper articles, silent movies, letters, autobiographies, and interviews--Ilaria Serra depicts a large tapestry of images that accompanied mass Italian migration to the U.S. at the turn of the twentieth century. She chooses to translate the Italian concept of *immaginario* with the Latin *imago* that felicitously blends the double English translation of the word as "imagery" and "imaginary." *Imago* is a complex knot of collective representations of the immigrant subject, a mental production that finds concrete expression; impalpable, yet real. The "imagined immigrant" walks alongside the real one in flesh and rags.

I first used the Internet in fall 1993, as a Fulbright Scholar at Charles University in Prague. I immediately recognized that the Internet would radically transform second language teaching and learning, and within a year had written my first book on the topic, *E-Mail for English Teaching*. The book galvanized a wave of growing interest in the relationship of the Internet to language learning, and was soon followed by many more books on the topic by applied linguists or educators. This volume, though, represents one of the first that specifically analyzes the relationship of new technologies to the teaching of languages for specific purposes (LSP), and, in doing so, makes an important contribution. The overall impact of information and communication technology (ICT) on second language learning can be summarized in two ways, both of which have special significance for teaching LSP. First, ICT has transformed the context of language learning. The stunning growth of the Internet—resulting in 24 trillion email messages sent in 2005, and more than 600 billion Web pages and 50 million blogs online in the same year—has helped make possible the development of English as the world's first global language.

Peter Szondi is widely regarded as being among the most distinguished post-war literary critics. This first English edition of one of his most lucid and interesting series of lectures opens up his work in hermeneutics for English-speaking readers. The question of what is involved in understanding a text occupied Biblical and legal scholars long before it became a concern of literary critics. Peter Szondi here traces the development of hermeneutics through examination of the work of eighteenth-century German scholars. Ordinarily treated only as prefigurations of Schleiermacher, the work of Enlightenment theorists Johann Martin Chladenius, George Friedrich Meier, and Friedrich Ast yields valuable insight into the 'material theory' of interpretation, on which a practical interpretive methodology might be built.

A thrilling retelling of the Star Wars saga in the style of classic epic poetry "I look not to myself but to the Force, In which all things arise and fall away." Journey to a galaxy far, far away like never before--through lyrical verse and meter. Like the tales of Odysseus and Beowulf, the adventures of Luke Skywalker, Han Solo, Princess Leia, Jyn Erso, Obi-Wan Kenobi, Darth Vader, and the Emperor are fraught with legendary battles, iconic heroes, fearsome warriors, sleek ships, and dangerous monsters. Beginning with Rogue One's rebel heist on Scarif to secure the plans to the Death Star and continuing through the climax of Return of the Jedi, author Jack Mitchell uses the ancient literary form of epic poetry to put a new spin on the Star Wars saga. Punctuated with stunning illustrations inspired by the terracotta art of Greek antiquity, *The Odyssey of Star Wars: An Epic Poem* presents the greatest myth of the 20th century as it would have been told nearly 3,000 years ago.

Ernesto Macaro brings together a wealth of research on the rapidly expanding phenomenon of English Medium Instruction. Against a backdrop of theory, policy documents, and examples of practice, he weaves together research in both secondary and tertiary education, with a particular focus on the key stakeholders involved in EMI: the teachers and the students. Whilst acknowledging that the momentum of EMI is unlikely to be diminished, and identifying its potential benefits, the author raises questions about the ways it has been introduced and developed, and explores how we can arrive at a true cost-benefit analysis of its future impact. "This state-of-the-art monograph presents a wide-ranging, multi-perspectival yet coherent overview of research, policy, and practice of English Medium Instruction around the globe. It gives a thorough, in-depth, and thought-provoking treatment of an educational phenomenon that is spreading on an unprecedented scale." *Impara rapidamente l'italiano. Corso per stranieri* Abrams Image Superdiversity explores processes of diversification and the complex, emergent social configurations that now supersede prior forms of diversity in societies around the world. Migration plays a key role in these processes, bringing changes not just in social, cultural, religious, and linguistic phenomena, but also in the ways that these phenomena combine with others like gender, age, and legal status. The concept of superdiversity has been adopted by scholars across the social sciences in order to address a variety of forms, modes, and outcomes of diversification. Central to this field is the relationship between social categorization and social organization, including stratification and inequality. Increasingly complex categories of social "difference" have significant impacts across scales, from entire societies to individual identities. While diversification is often met with simplifying stereotypes, threat narratives, and expressions of antagonism, superdiversity encourages a perspective on difference as comprising multiple social processes, flexible collective meanings, and overlapping personal and group identities. A superdiversity approach encourages the re-evaluation and recognition of social categories as multidimensional, unfixed, and porous as opposed to views based on hardened, one-dimensional thinking about groups. Diversification and increasing social complexity are bound to continue, if not intensify, in light of climate change. This will have profound impacts on the nature of global migration, social relations, and inequalities. Superdiversity presents a convincing case for recognizing new social formations created by changing migration patterns and calls for a re-thinking of public policy and social scientific approaches to social difference. This introduction to the multidisciplinary concept of superdiversity will be of considerable interest to students and researchers in a range of fields in the humanities and social sciences. Joël, aka 'The Rink' (because his bald patch is shiny enough to skate on), the unpopular owner of the only bar in town has been murdered. There are so many suspects, it's not so much a question of who did kill him as who didn't. There's Magalie, the temperamental teenager obsessed with Paris Hilton; her troublemaker boyfriend, Tani; Tani's mother, Madame Levi; her unemployed, daytime-TV addicted husband; Yeznig, their younger son, who has learning difficulties but perfect memory recall; and newcomers Ali and Nadia, the Muslim twins struggling to fit in. As the tension mounts and we're still none the wiser, the ending is as tragic as it is unexpected.

A linguistic corpus is a collection of texts which have been selected and brought together so that language can be studied on the computer. Today, corpus linguistics offers some of the most powerful new procedures for the analysis of language, and the impact of this dynamic and expanding sub-discipline is making itself felt in many areas of language study. In this volume, a selection of leading experts in various key areas of corpus construction offer advice in a readable and largely non-technical style to help the reader to ensure that their corpus is well designed and fit for the intended purpose. This guide is aimed at those who are at some stage of building a linguistic corpus. Little or no knowledge of corpus linguistics or computational procedures is assumed, although it is hoped that more advanced users will find the guidelines here useful. It is also aimed at those who are not building a corpus, but who need to know something about the issues involved in the design of corpora in order to choose between available resources and to help draw conclusions from their studies.

Recently, technology and aging have been key research areas in human cognition. The Research Topic "Digital Skills and Life-long Learning: Digital Learning as a New Insight of Enhanced Learning by the Innovative Approach Joining Technology and Cognition" investigated technology's impact on cognitive and intellectual

processes, highlighting how intensively technology can change and/or enhance the cognitive functioning throughout one's lifespan. The aim of this Research Topic was to provide an outlook through multidisciplinary research and development while addressing the dynamic intersection of cognition, mind, and technology. Our scope was 1) to favor the cognitive technology debate, 2) to overcome the dichotomies of technology and psychology, 3) to emphasize the advances in knowledge and well-being. This Research Topic comprises review studies and original articles, focused on digital skills that enhance human potential. Transversal approaches and cross-sectorial analysis were encouraged, leading to investigation areas related to cognitive and mental processing—in educational, rehabilitation, clinical settings—across aging. Articles of high relevance to the Research Topic were submitted on the subjects of a) research in human performance and human factors, b) new research and technologies addressing the needs of a growing populace, and c) cognitive aging and cognitive rehabilitation research.
