This volume collects research presented at the Koç University Research Center for Anatolian Civilizations (ANAMED) 2018 international annual symposium. It brings together researchers engaged in the study of the decoration and technology of glazed pottery, ranging from the early Byzantine era to the end of the Ottoman period. Topics explored include pottery production in Constantinople, glazed ceramic production and consumption in medieval Thebes, pottery imports in Algiers during the Turkish Regency, considerations of trading routes and their influences, the relationships between Italy and the Byzantine and Ottoman world through pottery, and more.

Known as the "Father of the National Parks," John Muir wrote about the American West with unmatched passion and eloquence—as seen in this stunning, one-volume collection. In a lifetime of exploration, writing, and passionate political activism, John Muir became America's most eloquent spokesman for the mystery and majesty of the wilderness. A crucial figure in the creation of our national parks system and a far-seeing prophet of environmental awareness who founded the Sierra Club in 1892, he was also a master of natural description who evoked with unique power and intimacy the untrammeled landscapes of the American West. *Nature Writings* collects Muir's most significant and best-loved works in a single volume, including: *The Story of My Boyhood and Youth* (1913), *My First Summer in the Sierra* (1911), *The Mountains of California* (1894) and *Stickeen* (1909). Rounding out the volume is a rich selection of essays—including "Yosemite Glaciers," "God's First Temples," "Snow-Storm on Mount Shasta," "The American Forests," and "Save the Redwoods"—that highlight various aspects of his career: his exploration of the Grand Canyon and of what became Yosemite and Yellowstone national parks, his successful crusades to preserve the wilderness, his early walking tour to Florida, and the Alaska journey of 1879. LIBRARY OF AMERICA is an independent nonprofit cultural organization founded in 1979 to preserve our nation's literary heritage by publishing, and keeping permanently in print, America's best and most significant writing. The Library of America series includes more than 300 volumes to date, authoritative editions that average 1,000 pages in length, feature cloth covers, sewn bindings, and ribbon markers, and are printed on premium acid-free paper that will last for centuries.

First on the Rope - the acclaimed English translation of the French fiction classic *Premier de Cordée* by Roger Frison-Roche - is a tale about the harsh lives of mountain guides and their families in the French Alps in the 1920s and 1930s. An ascent of Mont Blanc as porter with his uncle leaves young Pierre further convinced he wants to be a mountaineer, breathing the crisp, pure air and soaking up the splendour of the wild landscape. But his family have other ideas. Chamonix is becoming ever more popular with tourists wanting their thrills on the slopes, and they all need somewhere to stay. Running a hotel, however, is not Pierre's idea of fulfilment. Among the glittering peaks and desolate passes, wonderful sunsets and wild winds, tragedy strikes across the Vallée Blanche on the Dru: a brutal storm leaves sadness and destruction in its wake. Can the onset of spring and the hope it brings rebuild Pierre's passion for climbing? *First on the Rope* epitomises the rhythm of mountain life, the clanking cowbells and the gurgling streams set against the formidable grandeur of the ice and rock. Equip yourself for an immersive and emotive experience in the high Alps.

The Great New Wilderness Debate is an expansive, wide-ranging collection that addresses the pivotal environmental issues of the modern era. This eclectic volume on the varied constructions of "wilderness" reveals the recent controversies that surround those conceptions, and the gulf between

those who argue for wilderness "preservation" and those who argue for "wise use." J. Baird Callicott and Michael P. Nelson have selected thirty-nine essays that provide historical context, range broadly across the issues, and set forth the positions of the debate. Beginning with such well-known authors as Ralph Waldo Emerson, Henry David Thoreau, John Muir, and Aldo Leopold, the collection moves forward to the contemporary debate and presents seminal works by a number of the most distinguished scholars in environmental history and environmental philosophy. *The Great New Wilderness Debate* also includes essays by conservation biologists, cultural geographers, environmental activists, and contemporary writers on the environment.

Everest - the First Ascent Hachette UK

The early climbing years of Britain's greatest living mountaineer, from his schooldays to his ascent of the Eiger in 1962. *I CHOSE TO CLIMB*, first published in 1966, was Chris Bonington's first book. He was recognised then, as now, as one of the outstanding members of a brilliant generation of mountaineers, which included such personalities as Hamish MacInnes, Don Whillans and Ian Clough. Here he describes his climbing beginnings as a teenager as well as successful ascents all over the world: the first ascent of the Central Pillar of Freney, the first British ascent of the North Face of the Eiger in 1962, Annapurna II in 1960 and in an unhappy expedition in 1961, Nuptse, the third peak of Everest. The first volume of Chris Bonington's autobiography is written with a warmth and enthusiasm that he has made his own. It tells of his climbing tastes and practice, and of family, friends and partnerships cemented over many years.

'When a man is conscious of the urge to explore, not all the arduous journeyings, the troubles that will beset him and the lack of material gains from his investigations will stop him.' Nanda Devi is one of the most inaccessible mountains in the Himalaya. It is surrounded by a huge ring of peaks, among them some of the highest mountains in the Indian Himalaya. For fifty years the finest mountaineers of the early twentieth century had repeatedly tried and failed to reach the foot of the mountain. Then, in 1934, Eric Shipton and H. W. Tilman found a way in. Their 1934 expedition is regarded as the epitome of adventurous mountain exploration. With their three tough and enthusiastic Sherpa companions Angharkay, Kusang and Pasang, they solved the problem of access to the Nanda Devi Sanctuary. They crossed difficult cols, made first ascents and explored remote, uninhabited valleys, all of which is recounted in Shipton's wonderfully vivid *Nanda Devi* - a true evocation of Shipton's enduring spirit of adventure and one of the most inspirational travel books ever written.

Un beau-livre inspirant Ce livre est le produit de plus de six ans et de 700 jours d'efforts pour escalader, photographier et dessiner les 82 sommets alpins de plus de 4 000 mètres d'altitude. Ben Tibbets s'est lancé dans ce projet avec deux objectifs : grimper tous ces sommets et produire le livre le plus beau et le plus fascinant jamais réalisé sur les Alpes. C'est un livre d'alpinisme qui redéfinit le genre, comprenant à la fois un côté artistique avec de magnifiques croquis des montagnes réalisés au crayon par l'auteur ainsi que de très belles photos, qu'un livre d'histoires sur ces 4 000. Ce livre est aussi à la fois une source d'informations pour gravir ces 4 000 que d'inspiration.

This book lists almost 1,500 roots of academic, professional, and technical words. This is not a thesaurus in the common sense. Unlike the familiar collection of synonyms, this thesaurus gathers words with the same root words with similar meaning. The authors have distinguished a variety of these word elements and given them technical names, such as Simple Root, Prefixed Root, Leading

Root Compound, and Trailing Root Compound. Horace Danner and Roger Noël's previous books include *An Introduction to an Academic Vocabulary* (UPA, 1990) which is recommended as a companion to this thesaurus.

The story of the first ascents of many of Norway's most dramatic peaks, Slingsby's book is still a very relevant guidebook to many Norwegian mountain areas today. Slingsby was one of the leading climbers of his generation, climbing in Britain and the Alps, and he is still held in the highest regard in Norway as the father of Norwegian mountaineering. In contrast to many areas of the Alps, the Norse mountains have been spared the same proliferation of telepheriques and ski resorts; and so many of the corries and peaks are still in the same wilderness condition as when Slingsby first climbed them. Norway: The Northern Playground has long been regarded by many as an indispensable work on the region. So, if you're looking for the English language overview of the Norwegian mountains or just an exciting ripping yarn to while away a long winter's night, this book cannot be recommended enough. The revised 2003 edition will have a new introduction written by Tony Howard, renowned for the first successful ascent of Troll Wall and latterly, the desert climbs of Wadi Rum.

Today's traveller is always on the move. Their trips are frequent, they think globally, and they treat hotel lobbies and bars as social spaces, conducting meetings or hunkering down, for hours at a time, with their laptops. Drinking is part of these everyday rituals, and so in this context the hotel bar's role acquires an even greater significance. Behind the Bar shines a light on 50 signature cocktails from the most iconic hotel bars across the world, appealing to tried-and-true cocktail lovers and design aficionados alike. Recipes from some of these storied properties will inspire enthusiasts to recreate timeless cocktails at home. Anecdotes supplied by barkeeps and hotel and design personalities will enliven the recipes that reveal why so many hotel bars have endured through the years or have made an impact on the modern world. The clandestine speakeasy has been glorified countless times for its mix of sex appeal and transporting décor but the hotel bar should also be recognised for its sophistication, grandeur, or showmanship. Behind the Bar does exactly that but also transcends the cocktail crowd niche. It is just as much a book for the traveller with a strong appreciation for design as well as the fantasy-filled armchair traveller charmed by illustrations and nuggets of history.

High Crimes is journalist Michael Kodas's gripping account of life on top of the world--where man is every bit as deadly as Mother Nature. In the years following the publication of *Into Thin Air*, much has changed on Mount Everest. Among all the books documenting the glorious adventures in mountains around the world, none details how the recent infusion of wealthy climbers is drawing crime to the highest place on the planet. The change is caused both by a tremendous boom in traffic, and a new class of parasitic and predatory adventurer. It's likely that Jon Krakauer would not recognize the camps that he visited on Mount Everest almost a decade ago. This book takes readers on a harrowing tour of the criminal underworld on the slopes of the world's most majestic mountain. High Crimes describes two major expeditions: the tragic story of Nils Antezana, a climber who died on Everest after he was abandoned by his guide; as well as the author's own story of his participation in the Connecticut Everest Expedition, guided by George Dijmarescu and his wife and climbing partner, Lhakpa Sherpa. Dijmarescu, who at first seemed well-intentioned and charming, turned increasingly hostile to his own wife, as well as to the author and the other women on the team. By the end of the expedition, the three women could not travel unaccompanied in base camp due to the threat of violence. Those that tried to stand against the violence and theft found that the worst of the intimidation had followed them home to Connecticut. Beatings, thefts, drugs, prostitution, coercion, threats, and abandonment on the highest slopes of Everest and other mountains have become the rule rather than the exception. Kodas describes many such experiences, and explores the larger issues these stories raise with thriller-like intensity.

John Muir: Nature Writings (LOA #92) American Roots

"Acharnians" is the earliest of the existent comedies of Aristophanes, produced in 425 BCE. It is a direct attack on the folly of war. The story deals with an Athenian farmer, Dikaiopolis, who surprisingly obtains a private peace treaty with the Spartans and enjoys the benefits of peace despite resistance from some of his fellow Athenians. This drama is celebrated for its absurd humor and its innovative appeal for an end to the Peloponnesian War.

You might have read him in class, but the Victorians read Charles Dickens like we watch *Melrose Place*, and *The Friendly Dickens* will show you why. It is the ultimate pop reference to the Dickensian world of shrouded sex and ostentatious death, a book that will have you running in delight to dust off your Dickens. Norrie Epstein--whose *The Friendly Shakespeare* was called by *The New York Times* "spirited, informative and provocative"--opens up Dickens's life and times in all its squalor and glory, including his rise to greatness and occasional lapses from grace. She considers his works, major and minor, in decided lively fashion, not just reading, but reading between the lines: * Was *Oliver Twist's* Fagin a pederast? * What made *A Christmas Carol's* Tiny Tim so darn tiny? * How many of Dickens's child characters met an untimely end? (Hint: plenty.) Full of humor, skepticism, and expert opinions, with eye-catching illustrations, plenty of quotes, and sidebars on nearly every page, you will quickly become a Dickens authority--even if you've never read a word.

The nature writings of pioneering environmentalist and Sierra Club founder John Muir are like no other. In this essay from 1894, Muir describes the grandeur of the winds at play in the forests, with stunning and musical detail about the trees of the Sierra and their individual reaction to the wind. Muir's story of climbing a 100-foot Douglas Spruce to experience the sway and swirl of a storm for himself is unforgettable. This short work is part of Applewood's "American Roots," series, tactile mementos of American passions by some of America's most famous writers.

First published in 1956, "The Ascent of Rum Doodle" quickly became a mountaineering classic. As an outrageously funny spoof about the ascent of a peak in the Himalayas, many thought it was inspired by the 1953 conquest of Everest. But Bowman had drawn on the flavor and tone of earlier adventures, of Bill Tilman and his 1937 account of the Nandi Devi expedition. The book's central and unforgettable character, Binder, is one of the finest creations in comic literature.

Dr. Horace Gerald Danner's *A Thesaurus of Medical Word Roots* is a compendium of the most-used word roots of the medical and health-care professions. All word roots are listed alphabetically, along with the Greek or Latin words from which they derive, together with the roots' original meanings. If the current meaning of an individual root differs from the original meaning, that is listed in a separate column. In the examples column, the words which contain the root are then listed, starting with their prefixes. For example, esthesia, which means "feeling," has as its prefixed roots alloesthesia, anesthesia, and dysesthesia. The listing then switches to words where the root itself forms the beginning, such as esthesiogenesis or esthesioneuroblastoma. These root-starting terms then are followed by words where the root falls in the middle or the end, as in acanthesthesia, cryesthesia, or osmethesia. In this manner, *A Thesaurus of Medical Word Roots* places the word in as many word families as there are elements in the word. This work will interest not only medical practitioners but linguists and philologists and anyone interested in the etymological aspects of medical terminology.
