Techniques for the Seismic Rehabilitation of Existing Buildings

Mondadori Electa
ING_08 Review quote

Cities in Evolution

Harper Paperbacks

This beautifully designed volume showcases London's extraordinary architectural renaissance of the 21st century.

London has always been known for its iconic buildings, but the city has recently witnessed an explosion of new architecture from the world's most acclaimed architects. This volume provides a look at the city's rapidly changing skyline and celebrates the enormous array of styles, materials, and cutting-edge technology that have been employed by today's leading architects *Noma 2.0* U of Minnesota Press

Hybrid Interiors collects intriguing and inspiring residences from around the world that illustrate bold and innovative combinations of styles, cultures, and functions.

[Urban Waterfront Lands](#)
Rizzoli Publications

This beautifully illustrated book retraces the entire creation process of an unusual challenge presented to ten architects; an inspirational volume for all those interested in contemporary architecture. This unique publication, catalogue of the Holy See Pavilion at the XVI International Architecture Exhibition at the Venice Biennale, presents ten chapels designed by ten of the most important contemporary architects whose work was inspired by the "chapel in the forest" built in the Stockholm Cemetery, in 1920, by the famous architect Gunnar Asplund. The chapel is defined as a place of orientation, encounter, and meditation created in a natural setting of a vast woodland and regarded as a metaphor of the pilgrimage of life. In light of this, the architects of the Holy See Pavilion have worked without following the commonly recognized reference models, as the number and variety of the projects presented illustrates.

[The Startup Game](#)
Routledge

The Startup Game is the first up-close look at how the relationship between

venture capitalists and entrepreneurs is critical to enhancing the success of any economy.

Entrepreneurs drive the future, and the last several decades have been a thrilling ride of astounding, far-reaching innovation. Behind this transformative progress are also the venture capitalists - who are at once the investors, coaches and allies of the entrepreneurs. William H. Draper III knows this story first-hand, because as a venture capitalist, he helped write it. For more than 40 years, Bill Draper has worked with top entrepreneurs in fabled Silicon Valley, where today's vision is made into tomorrow's reality. From a venture capitalist who saw the potential of Skype, Apollo Computer, Hotmail, OpenTable, and many other companies, come firsthand stories of success. In these pages, Draper explores how to evaluate innovative ideas and the entrepreneurs behind those ideas, and he shares lessons from Yahoo, Zappos, Baidu, Tesla Motors, Activision, Measurex, and more. Also, in revealing his on-the-ground account of how Deng Xiaoping brought China roaring into the modern world and how

Manmohan Singh unlocked the creative genius of Indian entrepreneurs, Draper stresses the essential value of farsighted political leadership in creating opportunity. The author also discusses his efforts to bring best practices of the venture capitalist/entrepreneur partnership to the social sector. Written in an engaging narrative, and incorporating many of the author's personal experiences, this book provides a much-needed look at how the world of venture capital and entrepreneurship works. Q Springer Nature

As synthetic biology transforms living matter into a medium for making, what is the role of design and its associated values? [The Heritage Crusade and the Spoils of History](#) MIT Press

The contemporary debate on landscape is no longer an exclusive idiolect; it has expanded into a relentless babel. The field is glutted with an ever-increasing number of articles, collective works and conventions. Once marginal, landscape has now become central, even essential to philosophy and geography. Its significance within sociological,

anthropological and archaeological theories has also strengthened exponentially, making it the rising star of academia. This book acknowledges the importance of eco-theory to contemporary thought, exploring the limits of its study as well as the new horizons it opens up.

Urban Memory Taylor & Francis

Drama and Digital Arts Cultures is a critical guide to the new forms of playful exploration, co-creativity, and improvised performance made possible by digital networked media. Drawing on examples from games, education, online media, technology-enabled performance and the creative industries, the book uses the elements of applied drama to frame our understanding of digital cultures. Exploring the connected real-world and virtual spaces where young people are making and sharing digital content, it draws attention to the fundamental applied drama conventions that infuse and activate this networked culture. Challenging descriptions of drama and digital technology as binary opposites, the book maps

common principles and practice grounded in role, embodiment, performance, play, and identity that are being amplified and enhanced by the affordances of online media. Drama and Digital Arts Cultures draws together extensive original research including interviews with game designers, media producers, educators, artists and makers at the heart of these new digital cultures. Young people discuss their own creative practices and products, providing insight into a complex and evolving world being transformed by digital technologies. A practical guide to the field, it contains case studies and examples of the intersections of drama conventions and networked cultures drawn from the US, Canada, UK, Netherlands, Singapore and Australia. Written for scholars, educators, students and 'makers' everywhere, Drama and Digital Arts Cultures provides a clear understanding of how young people are blending creativity and learning with the powerful and empowering conventions of drama to create new forms of multimodal and transmedia storytelling.

Terrae Motus Mondadori Electa

With Europe convulsed in wars over religion, a young theology student finds himself siding with heretics and the disenfranchised while confronting an agent of the Vatican who intends to hunt down and destroy enemies of the faith.

AW2 Greenwood Publishing Group

Moving images are used as diagnostic tools and locational devices every day in hospitals, clinics and laboratories. But how and when did such issues come to be established and accepted sources of knowledge about the body in medical culture? How are the specialized techniques and codes of these imaging techniques determined, and whose bodies are studied, diagnosed and treated with the help of optical recording devices?

"Screening the Body" traces the unusual history of scientific film during the late 19th and early 20th centuries, presenting material that is at once disturbing and engrossing. Lisa Cartwright looks at films like "The Elephant Electrocutation". She brings to light eccentric figures in the history of the science film such as

William P. Spratling who used Biograph equipment and crews to film epileptic seizures, and Thomas Edison's lab assistants who performed x-ray experiments on their own bodies. Drawing on feminist film theory, cultural studies, the history of film, and the writings of Foucault, Lisa Cartwright illustrates how this scientific cinema was a part of a broader tendency in society toward the technological surveillance, management, and physical transformation of the individual body and the social body. She frequently points out the similarities of scientific film to works of avant-garde cinema, revealing historical ties among the science film, popular media culture and elite modernist art and film practices. Ultimately, Cartwright unveils an area of film culture that has rarely been discussed, but which will leave readers scouring video libraries in search of the films she describes.

London Actar

There's a reason Noma sits atop the list of the world's best restaurants. Every bite, every dish, every course surprises, delights, challenges, and

deeply satisfies in a way that's unique in the world of dining. As the New York Times's Pete Wells wrote recently in praising Noma's flavors, "sauces are administered so subtly that you don't notice anything weird going on; you just think you've never tasted anything so extraordinary in your life." In Noma 2.0, René Redzepi digs deep into the restaurant's magic through the creation of nearly 200 dishes, each photographed in spectacular beauty and detail. Noma 2.0—the title is a reference to the reinvention of Noma after it closed in 2018 to move to its new compound across the water—is about true seasonality, from wild game in the fall to just-picked peas in the summer. It is about using only local ingredients, to build a cuisine that is profoundly situated in its place and culture. It is about transforming the ordinary—a mushroom, a chicken wing, often through fermentation—to develop haunting, memorable flavors. It is about composing a plate that delights the eye as much as the palate, whether through the trompe l'oeil of a "flowerpot" chocolate

cake or a dazzling mandala of flowers and berries. It is about pushing the boundaries of what we think we want to eat—a baby pinecone, a pudding made of reindeer brain—to open our palates with a startling confidence. And it is about how to stay creative and challenge yourself over the course of a career. For foodies, for chefs, for artists and art lovers, for thought-leaders and makers, and for the kind of reader who is compelled by the idea that sometimes one person can change everything, *Noma 2.0* is the gift book of the season.

Leon Krier is one of the best-known—and most provocative—architects and urban theoreticians in the world. Until now, however, his ideas have circulated mostly among a professional audience of architects, city planners, and academics. In *The Architecture of Community*, Krier has

reconsidered and expanded writing from his 1998 book *Architecture: Choice or Fate*. Here he refines and updates his thinking on the making of sustainable, humane, and attractive villages, towns, and cities. The book includes drawings, diagrams, and photographs of his built works, which have not been widely seen until now. With three new chapters, *The Architecture of Community* provides a contemporary road map for designing or completing today's fragmented communities. Illustrated throughout with Krier's original drawings, *The Architecture of Community* explains his theories on classical and vernacular urbanism and architecture, while providing practical design guidelines for creating livable towns. The book contains descriptions and images of the author's built and unbuilt projects, including the Krier House and Tower in Seaside, Florida, as well as the town of Poundbury in England. Commissioned by the Prince of Wales in 1988, Krier's design for Poundbury in Dorset has become a reference model for ecological planning and building that

can meet contemporary needs.

Labics St. Martin's Press
1775-The conflict between the British Empire and the American colonies erupts in all-out war. Rebels and loyalists to the British Crown compete for an alliance with the Six Nations of the Iroquois, the most powerful Indian confederation, boasting a constitution hundreds of years old. In the Mohawk River Valley, Native Americans and colonists have co-existed for generations. But as the thunder of war approaches and the United States struggles violently into existence, old bonds are broken, friends and families are split by betrayal, and this mixed community is riven by hatred and resentment. To save his threatened world, the Mohawk war chief Joseph Brant sets off in a restless journey that will take him from New York to the salons of Georgian London at the heart of the British Empire.

Processes of multi-scalar regional urbanization are occurring worldwide. Such processes are clearly distinguishable from those of the nineteenth and twentieth centuries due to the shifting concepts of both the city and the metropolis. International literature highlights how what we have historically associated with the idea of cities has long been subjected to consistent reconfiguration, which involves stressing some of the typical features of the idea of "cityness". Post-Metropolitan Territories: Looking for a New Urbanity is the product of a research project funded by the Italian Ministry for Education, Universities and Research (MIUR). It constitutes a thorough overview of a country that is one of Europe's most diverse in terms of regional development and performance: Italy. This book brings together case studies of a number of Italian cities and their hinterlands and looks at new forms of urbanization, exploring themes of sustainability, industrialization, de-industrialization, governance, city planning and quality of life. This volume will be of great

interest to academics and students who study regional development, economic geography and urban studies, as well as civil servants and policymakers in the field of spatial planning, urban policy, territorial policies and governance.

Architecture Without Architects Verso Books

This multi-authored work considers the increasingly vital concept of urban memory, approaching the issue from different perspectives across art, culture, architecture and human consciousness, with studies on contemporary urban spaces worldwide.

Swiss-born, Paris-based architect Philippe Rahm (born 1967) has synthesized disciplines ranging from physics, physiology and meteorology to create urban and architectural works that radically advance the prospects and possibilities of sustainable architecture. Rahm has presented his ideas internationally, lecturing at Yale, Harvard, Cooper Union and UCLA, and representing Switzerland at the 8th

Architecture Biennale in Venice. This book surveys Rahm's works of the past 12 years, including the Taichung Jade Eco Park in Taiwan. The book is designed to provoke a subtle gradation of sensations, by using different papers, by transitioning from very formal scientific presentation to warmer poetic and personal contributions, and through a variation in the illustrations from schematic drawings to evocative photographs.

Urban conditions are crucial to our experience of modernity, and, as reflected by art, literature and popular culture, have influenced contemporary ideas of what urban life is about. The Urban Lifeworld contributes to our understanding of the cultural role of cities by offering new insight into the analysis of urban experience. Two exceptional cities, New York and Copenhagen, are the focus of this exploration of cultural representations of urban life, which investigates the contrasts between perceptions and formation of the urban lifeworld. Integrating sociological, aesthetic and

anthropological approaches to urban questions, this collection of essays presents a new vision of the cityscape which will enrich both academic debate and public life.
The Urban Lifeworld

Bloomsbury Publishing Military Landscapes seeks to develop a nuanced definition of military landscapes under the framework of landscape theory. It moves beyond discussions of

infrastructure and battlefields, shifting the focus instead to often overlooked factors, highlighting the historical character of militarized environments as inherently gendered and racialized.
