In Isis Pelagia, Laurent Bricault offers a new interpretation of many of the various sources on Isis as a goddess of the seas in the Graeco-Roman world.

Encyclopedia of Classical Philosophy BRILL

Here are nearly 100 recipes for such classic Polish favorites as "Beer Soup with Cream and Cottage Cheese," "Roast Beef Roll with Mushrooms," "Roast Pork with Caraway Polish Style," and "Old Polish Royal Mazurek." The recipes are interwoven with a briefly outlined history of Polish culinary customs. Short essays cover subjects like Polish hospitality, holiday traditions, even the exalted status of the mushroom. The recipes are traditional family fare.

Adjustment to Physical Handicap and Illness John Wiley & Sons

Contemporary events management is a diverse and challenging field. This introductory textbook fully explores the multidisciplinary nature of events management and provides the student with all the practical skills and professional knowledge they need in order to succeed in the events industry. It introduces every core functional area of events management, such as marketing, finance, project management, strategy, operations, event design and human resources, in a vast array of different event settings from sport to political events. This new edition has been updated to include:

- New and updated content on developments in technology, risk management and event volunteering.
- New and updated case studies that include emerging economies.
- New industry voices by international practitioners. Every topic is brought to

life through vivid case studies, personal biographies and examples of best practice from the real world of events management. Written by a team of authors with many years' experience of working in the events industry, *Events Management: An Introduction* is the essential course text for any events management programme.

Between Hitler and Tito Routledge
This collection of essays focuses on the ways in which Greek and Latin authors viewed and wrote about the history of medicine in the ancient world. Special attention is given to medical doxography, i.e. the description of the characteristic doctrines of the great medical authorities of the past. The volume examines the various attitudes to the history of medicine adopted by a wide range of ancient writers (e.g. Aristotle, Galen, Celsus, Herophilus, Soranus, Oribasius, Caelius Aurelianus). It discusses the historical sense of ancient medicine, the variety of versions of the medical past that were created and the wide range of purposes and strategies which medico-historical writing served. It also deals with the question of the sources, the role of historiographical traditions and the variety of literary genres of ancient medico-historical writing.

Myriapod Biology Vintage

In making her new home in Poland in 1989, Applebaum had to cook with ingredients that were local, fresh, and available. She learned how to make food that was, if not exactly traditional, in the Polish spirit. The national rebirth of Poland in the last two decades has meant the rebirth of its cuisine, and the authors have modernized many of its dishes, without losing any of the centuries-old flavors. Collects ninety Polish recipes, including roasted winter

vegetables, stewed beef rolls with kasha, pork lion stuffed with prunes, and fruit pierogi.

Food and Drink in Medieval Poland Frank P van Eck Verlag

Learn how to end the self-destructive behaviors that stop you from living your best life with this breakthrough program. Do you... • Put the needs of others above your own? • Start to panic when someone you love leaves—or threatens to? • Often feel anxious about natural disasters, losing all your money, or getting seriously ill? • Find that no matter how successful you are, you still feel unhappy, unfulfilled, or undeserving? Unsatisfactory relationships, irrational lack of self-esteem, feelings of being unfulfilled—these are all problems that can be solved by changing the types of messages that people internalize. These self-defeating behavior patterns are called “lifetraps,” and *Reinventing Your Life* shows you how to stop the cycle that keeps you from attaining happiness. Two of America's leading psychologists, Jeffrey E. Young, Ph.D., and Janet S. Klosko, Ph.D., draw on the breakthrough principles of cognitive therapy to help you recognize and change negative thought patterns, without the aid of drugs or long-term traditional therapy. They describe eleven of the most common lifetraps, provide a diagnostic test for each, and offer step-by-step suggestions to help you break free of the traps. Thousands of men and women have seen the immediate and long-term results of the extraordinary program outlined in this clear, compassionate, liberating book. Its innovative approach to solving ongoing emotional problems will help you create a more fulfilling, productive life.

Providing a comprehensive guide to understanding, planning, promoting, and producing special events, this seventh edition of *Special Events, 7th Edition* describes the theory and practice of all aspects of event management. Written for current and future event leaders, the text continues to expand its emphasis on the growing globalization of the profession, taking into account the skills leaders need to deal with other cultures, societies, and business practices to plan and deliver successful events. New coverage includes sustainability, technology, security/risk management, and the impact of social media on events and event marketing. 15 all-new case studies have been included, as well as a brief glossary of terms at the end of each chapter to further define the terms used in the chapter.

This volume aims to bridge the disciplinary gap between tourism studies and aging studies. It investigates the intersections of tourism and aging from a variety of perspectives that focus on the many ways in which senior tourism is socially constructed and/or individually experienced. The essays tackle key topics ranging from the socio-economic aspects of post-retirement travel to the representations of the traveling elderly in literature, film and media, and the influence of travel on late-life creativity.

Events Management Routledge

Captain Kuro of the Black Cat Pirates was the most feared evil genius on the high seas...until he vanished. Most people believe he's dead, but only his crew knows the truth: Captain Kuro has been lying low in a small seaside village, posing as a mild-mannered butler until the time for pillage is just right. Now that time has come, and the ruthless Black Cat Pirates are about to attack... Unless, of course, Monkey D.Luffy can stop them! All Luffy has on his side are his sword-wielding first mate, Zolo; his thieving navigator, Nami; Usopp, a local kid with a knack for telling lies; and his own bizarre rubber-limbed powers. If these four amateur pirates want to stop the entire Black Cat crew, they'll have to come up with a pretty slick plan... -- VIZ Media

One Piece, Vol. 4 John Wiley & Sons

This study provides information on official financing and the debt situation of developing countries. It discusses issues related to trade finance in financial crises, and the challenge of maintaining external debt sustainability in debtor countries. It updates the 2001 edition of *Official Financing for Developing Countries*.

University of Pennsylvania Press

Why did Yugoslavia fall apart? Was its violent demise inevitable? Did its population simply fall victim to the lure of nationalism? How did this multinational state survive for so long,

and where do we situate the short life of Yugoslavia in the long history of Europe in the twentieth century? *A History of Yugoslavia* provides a concise, accessible, comprehensive synthesis of the political, cultural, social, and economic life of Yugoslavia—from its nineteenth-century South Slavic origins to the bloody demise of the multinational state of Yugoslavia in the 1990s. Calic takes a fresh and innovative look at the colorful, multifaceted, and complex history of Yugoslavia, emphasizing major social, economic, and intellectual changes from the turn of the twentieth century and the transition to modern industrialized mass society. She traces the origins of ethnic, religious, and cultural divisions, applying the latest social science approaches, and drawing on the breadth of recent state-of-the-art literature, to present a balanced interpretation of events that takes into account the differing perceptions and interests of the actors involved.

Uniquely, Calic frames the history of Yugoslavia for readers as an essentially open-ended process, undertaken from a variety of different regional perspectives with varied composite agenda. She shuns traditional, deterministic explanations that notorious Balkan hatreds or any other kind of exceptionalism are to blame for Yugoslavia's demise, and along the way she highlights the agency of twentieth-century modern mass society in the politicization of differences. While analyzing nuanced political and social-economic processes, Calic describes the experiences and emotions of ordinary people in a vivid way. As a result, her groundbreaking work provides scholars and learned readers alike with an accessible, trenchant, and authoritative introduction to Yugoslavia's complex

history.

Dog Krieg and his pirates attempt to take over Chef Zeff's Baratie, however, the cooks manage to hold their ground until Krieg reveals his secret weapon-- the Ivisible Pearl. Sanji steps in and vows to defend the Baratie with his life, claiming that he owes a debt to Chef Zeff.

An Economic Analysis of Integrated Pest Management Strategies for Texas Pecans VIZ Media LLC

We all want to understand the world around us, and the ancient Greeks were the first to try and do so in a way we can properly call scientific. Their thought and writings laid the essential foundations for the revivals of science in medieval Baghdad and renaissance Europe. Now their work is accessible to all, with this invaluable introduction to c.100 scientific authors active from 320 BCE to 230 CE.

The book begins with an outline of a new socio-political model for the development and decline of Greek science, followed by eleven chapters that cover the main disciplines: * the science which the Greeks saw as fundamental - mathematics * astronomy * astrology and geography * mechanics * optics and pneumatics * the non-mathematical sciences of alchemy, biology, medicine and 'psychology'. Each chapter contains an accessible introduction on the origins and development of the topic in question, and all the authors are set in context with brief biographies.

Studies in the Psychology of the Deaf Chronicle Books

In his previous volume in this series, *Early Greek Science: Thales to Aristotle*, G. E. R. Lloyd pointed out that although there is no exact equivalent to our term 'science' in Greek, Western science may still be said to originate with the Greeks. In this second volume, *Greek Science after Aristotle*, the author continues his discussion of the fundamental Greek contributions to science, drawing on the richer literary and archaeological sources for the period after Aristotle. Particular attention is paid to the Greeks' conception of the inquiries they were engaged in, and to the interrelations of science and technology. In the first part of the book the author considers the two hundred years after the death of Aristotle, devoting separate chapters to mathematics, astronomy and biology. He goes on to deal with Ptolemy and Galen and concludes with a discussion of later writers and of the problems raised by the question of the decline of ancient science.
