**The World Is Not a
Rectangle** Princeton
University Press
An illuminating
introduction to the
influence of architecture
on the world, the
environment, and human
lives Architecture matters.
It matters to cities, the

planet, and human lives.
How architects design and
what they build has an
impact that usually lasts
for generations. The more
we understand
architecture—the deeper
we probe the decisions
and designs that go into
making a building—the
better our world becomes.
Aaron Betsky, architect,
author, curator, former
museum director, and
currently the dean of the

Frank Lloyd Wright School
of Architecture, guides
readers into the rich and
complex world of
contemporary
architecture. Combining
his early experiences as
an architect with his
extensive experience as a
jury member selecting the
world's most prominent
and cutting-edge
architects to build icons
for cities, Betsky
possesses rare insight

into the mechanisms, politics, and personalities that play a role in how buildings in our societies and urban centers come to be. In approximately fifty themes, drawing on his inside knowledge of the architectural world, he explores a broad spectrum of topics, from the meaning of domestic space to the spectacle of the urban realm. Accessible, instructive, and hugely enjoyable, *Why Architecture Matters* will open the eyes of anyone dreaming of becoming an architect,

and will bring a wry smile to anyone who already is. **Zaha Hadid** Axel Menges Even in her very early work, Zaha Hadid made innovative use of graphic techniques such as penetration, distortion, curvature, strongly reduced perspectives, to portray her architectural designs from a refreshing new angle. In this way her unmistakable concepts of architectural space originated, and it is no surprise that the London architect makes full use of the full range of possibilities afforded by

today's electronic design tools to create her inimitable forms. This present publication documents the most important of her recent projects, revealing how Zaha Hadid has risen to the digital challenge. Patrik Schumacher teaches at the Architectural Association in London. **Zaha Hadid** Hatje Cantz "This publication presents the spectacular building in photographs by Helene Binet and Paul Warchol and essays by Charles Desmarais and Joseph

Giovannini. Numerous models and sketches provide an insight into the design process."--BOOK JACKET.

Why We Build

Birkhäuser

Zaha Hadid: Heydar Aliyev Centre is devoted to the new cultural center designed by Zaha Hadid in the Azerbaijani capital of Baku. As one of the most important cultural centers in the country, the building houses a variety of institutions under one roof. With the design, the renowned architect won the architecture

competition in 2007. Photographs by Helene Binet and Iwan Baan display the building in all of its facets, making it possible for the reader to experience its formal, haptic, and spatial qualities. Essays explain conceptual and technical aspects of this impressive piece of architecture. *Zaha Hadid* Skira
The PIN-UP Interviews is a compilation of over 50 of the most fascinating interviews from PIN-UP magazine since its first issue was published in October 2006. Serious,

yet accessible, featuring the elegant and modern aesthetic PIN-UP's readers have come to expect, there is no comparable source available for such a stunning array of contemporary design talent collected in one place. It is indispensable to all lovers of today's brightest architectural and design ideas. The PIN-UP Interviews is the first book produced by PIN-UP, the award-winning, New York-based, biannual architecture and design magazine. Cheekily dubbing itself

the “Magazine for Architectural Entertainment,” PIN-UP features interviews with architects, designers, and artists, and presents their work informally—as a fun assembly of ideas, stories, and conversations, all paired with cutting-edge photography and artwork. Both raw and glossy, this “cult design zine” (The New York Times) is a nimble mix of genres and themes, finding inspiration in the high and the low by casting a refreshingly playful eye on rare architectural

gems, amazing interiors, smart design, and that fascinating area where those spheres connect with contemporary art. Included in The PIN-UP Interviews are the architects David Adjaye, Shigeru Ban, Ricardo Bofill, David Chipperfield, Zaha Hadid, Junya Ishigami, Rem Koolhaas, Peter Marino, Richard Meier, and Ettore Sottsass; artists Daniel Arsham, Cyprien Gaillard, Simon Fujiwara, Oscar Tuazon, Francesco Vezzoli, Boris Rebetez, Retna, Robert Wilson, and

Andro Wekua; and designers Rafael de Cárdenas, Martino Gamper, Rick Owens, Hedi Slimane, Bethan Laura Wood, and Clémence Seilles.

Architecture Matters
Springer

Who are the world's most exciting up-and-coming architects? 10 x 10_2 has 100 definitive answers, provided by 10 influential curators, educators and architects—including Zaha Hadid, Toshiko Mori, and Kurt Foster. Each featured architect is allotted four generously sized, photo-

rich pages, with concise yet informative texts. The projects are distinguished by a rare combination of inventiveness, thoughtful use of materials and sheer beauty. In Zurich, Christian Kerez stacked and cantilevered solid concrete shear walls between large expanses of glass to create a multifamily residence of pristine structural integrity. In Minneapolis, Vincent James Associates Architects endowed a boathouse with the rhythm of repeated trussed beams, inspired

by the activity of rowing. SPBR Arquitetos' glass-and-wood dental clinic in São Paulo features a transparent facade, designed to win the trust of neighborhood residents. In Tokyo, Tezuka Architects designed the space-saving Wall-less House, a steel-frame structure supported only by the central utility core and two columns. Among the more futuristic approaches are ONL's glass-and-metal highway sound barrier housing an industrial building in The

Netherlands; New York-based Evan Douglas' fluid architectural elements, created by digital morphing; and Beijing-based Fake Design's dramatically scaled geometric stone formations for a riverside development in China. As a stimulating bonus, each member of the curatorial team offers an annotated list of 10 personal cultural influences, which range from John Berger's classic, *Ways of Seeing*, to films by Wim Wenders and the architecture-rich city of Chicago. Biographies of

the 100 architects are also included. The only drawback of this splendid book, the second in a series, is its eccentric typeface. Stretched across overly long lines of body text and captions, it makes for eye-straining reading. --Cathy CurtisImages from 10 X 10 _ 2
10 X 10 _ 2 Frances Lincoln Children's Books
 The qualities in Zaha Hadid's architecture that we most admire -- the dramatic spaces, the interweaving of layers, and the unusual play of

light -- are expertly captured in these photographs by Helene Binet, best known for her images of Peter Zumthor's work. This volume includes photographs of two buildings, the Vitra Fire Station and LF One, and two exhibition installations; the result deepens our understanding of Hadid's designs.

Fluid Totality Lars Muller Publishers
 A monographic look at Pierres Vives, Zaha Hadid's latest major work, and its innovative

approach to spatial design and urban planning. This book documents the ten-year creation of Pierres Vives, an imposing new public building by world-renowned architect Zaha Hadid. The 28,500-square-meter stone and concrete sculptural structure brings Hadid's signature boundary-pushing spatial concepts to urban planning on a grand scale. Conceptualized as a "tree of knowledge" by Zaha Hadid as early as 2002, the structure combines three government

functions--archives, a library, and a sports center--into one building to fill the needs of a growing population in Montpellier, France. This book is the definitive source of images for the built structure and the construction process, and explores the architect's design choices, allowing a deep understanding of the work and thought behind the structure.

Zaha Hadid. Catalogo della mostra (Padova, 27 ottobre 2009-1 marzo 2010). Ediz. italiana e inglese

Springer Science & Business Media
Zaha Hadid est une architecte très controversée qui, malgré son succès critique et ses nombreux récompenses, n'a pourtant pendant des années concrétisé aucun de ses projets. Certains sont même allés jusqu'à dire que ses projets étaient impossibles à réaliser. Pourtant, ces dix dernières années, elle a mené à terme de nombreux bâtiments importants, dont le Centre d'art contemporaine Rosenthal de Cincinnati

(que le New York Times considère comme " le nouvel immeuble le plus important aux Etats-Unis depuis la Guerre froide "), le Centre des Sciences Phaeno de Wolfsburg, en Allemagne, et le siège de BMW de la nouvelle usine de Leipzig. Aujourd'hui, grâce à ses audacieux dessins futuristes qui l'ont propulsée au premier plan de l'architecture mondiale, Hadid a enfin acquis une reconnaissance internationale. Née à Bagdad, Hadid a fait une partie de ses études à

Londres, où elle a établi son cabinet, et est créatrice d'une architecture radicale depuis plus de 30 ans. Ce volume XL couvre l'intégralité de son travail jusqu'à aujourd'hui, dont ses projets les plus récents, de Dubaï à Guangzhou, et offre un aperçu exceptionnel de son parcours, tant dans le domaine de l'architecture que du design ou de l'aménagement intérieur, grâce à des analyses passionnantes, des photos spectaculaires ainsi qu'à ses propres dessins. Vous

découvrirez également dans cet ouvrage une partie spéciale où tout un jeu de papier vellum transparent permet de choisir de superposer de nombreux dessins ou de les regarder un par un.

Zaha Hadid. Complete Works 1979-Today. 2020 Edition Taschen America Llc

Fluid Totality presents the avant-garde architectural visions of one of the most innovative academic institutions of our time-- Studio Hadid at the University of Applied Arts Vienna. The studio

founded by Zaha Hadid 15 years ago has meanwhile developed into a globally renowned think tank. The book analyzes these developments in the context of a comprehensive process of digitization and the resulting global changes in our habitats. On the basis of theoretical and analytical essays by influential contemporary architectural theorists and critics, as well as numerous articles and statements by renowned architects and others who have been involved during

the history of the studio, this volume presents the result of fifteen years of pioneering work in an international context; the particular focus being the projects of the last five years.

The collection of Inspiration And Process In Architecture is a new series of illustrated monographs dedicated to key figures in contemporary architecture. This new collection features Zaha Hadid, Giancarlo De Carlo, Bolles+Wilson and Alberto Kalach whose stories are

told through notes and drawings never before seen. The series introduces a new clothbound format, with a hard, paper cover and colored spine matching the elastic band. The drawings inside are printed on glossy coated paper.

Digital Hadid W. W. Norton & Company
Take a theoretical approach to architecture with The Autopoiesis of Architecture, which presents the topic as a discipline with its own unique logic.

Architecture's conception of itself is addressed as well as its development within wider contemporary society. Author Patrik Schumacher offers innovative treatment that enriches architectural theory with a coordinated arsenal of concepts facilitating both detailed analysis and insightful comparisons with other domains, such as art, science and politics. He explores how the various modes of communication comprising architecture depend upon each other,

combine, and form a unique subsystem of society that co-evolves with other important autopoietic subsystems like art, science, politics and the economy. The first of two volumes that together present a comprehensive account of architecture's autopoiesis, this book elaborates the theory of architecture's autopoiesis in 8 parts, 50 sections and 200 chapters. Each of the 50 sections poses a thesis drawing a central message from the insights articulated within the

respective section. The 200 chapters are gathering and sorting the accumulated intelligence of the discipline according to the new conceptual framework adopted, in order to catalyze and elaborate the new formulations and insights that are then encapsulated in the theses. However, while the theoretical work in the text of the chapters relies on the rigorous build up of a new theoretical language, the theses are written in ordinary language ? with the

theoretical concepts placed in brackets. The full list of the 50 theses affords a convenient summary printed as appendix at the end of the book. The second volume completes the analysis of the discourse and further proposes a new agenda for contemporary architecture in response to the challenges and opportunities that confront architectural design within the context of current societal and technological developments.

The Autopoiesis of

Architecture, Volume I

Simon and Schuster
The juxtapositions of Zaha Hadid's architectural models and drawings and Judith Turner's photographs of the architects' buildings in this volume reveal that Hadid and Turner are complicit. There is a clear agreement of sensibilities. Each understands the other. Hadid does not design with complete geometries in stable configurations, but designs instead
PIN-UP Interviews Rizzoli International Publications

A timely and important search for architecture's missing women. For a century and a half, women have been proving their passion and talent for building and, in recent decades, their enrollment in architecture schools has soared. Yet the number of women working as architects remains stubbornly low, and the higher one looks in the profession, the scarcer women become. Law and medicine, two equally demanding and traditionally male professions, have been

much more successful in retaining and integrating women. So why do women still struggle to keep a toehold in architecture? *Where Are the Women Architects?* tells the story of women's stagnating numbers in a profession that remains a male citadel, and explores how a new generation of activists is fighting back, grabbing headlines, and building coalitions that promise to bring about change. Despina Stratigakos's provocative examination of the past, current, and potential

future roles of women in the profession begins with the backstory, revealing how the field has dodged the question of women's absence since the nineteenth century. It then turns to the status of women in architecture today, and the serious, entrenched hurdles they face. But the story isn't without hope, and the book documents the rise of new advocates who are challenging the profession's boys' club, from its male-dominated elite prizes to the erasure of women architects from

Wikipedia. These advocates include Stratigakos herself and here she also tells the story of her involvement in the controversial creation of Architect Barbie. Accessible, frank, and lively, *Where Are the Women Architects?* will be a revelation for readers far beyond the world of architecture.

Zaha Hadid John Wiley & Sons

The mental space of painting, expressed in works that experiment with a new idea of existing urban panorama

in search of visionary aesthetics. Zaha Hadid, winner of the Pritzker Architecture Prize in 2004, is world famous for projects such as the the MAXXI in Rome, the Fire Station at Vitra Design Museum or the Rosenthal Center for Contemporary Art in Cincinnati.

"An utterly satisfying examination of the

business of popular music." —Nathaniel Rich, The Atlantic

There's a reason today's ubiquitous pop hits are so hard to ignore—they're designed that way. The Song Machine goes behind the scenes to offer an insider's look at the global hit factories manufacturing the songs that have everyone hooked. Full of vivid, unexpected characters—alongside industry heavy-hitters like Katy Perry, Rihanna, Max Martin, and Ester Dean—this fascinating

journey into the strange world of pop music reveals how a new approach to crafting smash hits is transforming marketing, technology, and even listeners' brains. You'll never think about music the same way again. A Wall Street Journal Best Business Book
