(IATA
Resolution
618,

Attachment
"A") Technical
Instructions
for the Safe
Transport of

Dangerous Goods by Air/IMDG Code/International Maritime Dangerous Goods Code, Incorporating Amendment 40-20/The International Maritime Dangerous Goods Code is the standard guide to all aspects of handling dangerous goods and marine pollutants in sea transport. The Code lays down basic principles: detailed recommendations for individual substances, materials and articles, and a number of recommendations for good operational practice, including advice on terminology, packing, labelling, stowage, segregation and handling, and emergency response action. The Code has undergone many changes over the years, in both format and content, in order to keep up with the rapid expansion of the shipping industry. Amendment 40-20 includes revisions to various sections of the Code and to transport requirements for specific substances. It is mandatory as from 1 June 2022 but may be applied by Administrations in whole or in part on a voluntary basis from 1 January 2021.

DANGEROUS GOODS REGULATIONS (IATA-- RESOLUTION 618 ATTACHMENT "A") Effective 1 January-31 December 2022

Manual of Tests and Criteria

The

Manual of Tests and Criteria contains criteria, test methods and procedures to be used for classification of dangerous goods according to the provisions of Parts 2 and 3 of the United Nations Recommendations on the Transport of Dangerous Goods, Model Regulations, as well as of chemicals presenting physical hazards according to the Globally Harmonized System of Classification and Labelling of Chemicals (GHS). As a consequence, it supplements also national or international regulations which are derived from the United Nations Recommendations on the Transport of Dangerous Goods or the GHS. At its ninth session (7 December 2018), the Committee adopted a set of amendments to the sixth revised edition of the Manual as amended by Amendment 1. This seventh revised edition takes account of these amendments. In addition, noting that the work to facilitate the use of the Manual in the context of the GHS had been completed, the Committee considered that the reference to the "Recommendations on the Transport of Dangerous Goods" in the title of the Manual was no longer appropriate, and decided that from now on, the

Manual should be entitled "Manual of Tests and Criteria". Dangerous Goods Regulations Basic Information on Dangerous Goods Handling Emergency response guidance for aircraft incidents involving dangerous goods This document provides guidance to States and operators for developing procedures and policies for dealing with dangerous goods	incidents on board aircraft. It contains general information on the factors that may need to be considered when dealing with any dangerous goods incident and provides specific emergency response drill codes for each item listed in the Technical Instructions for the Safe Transport of Dangerous Goods by Air Dangerous Goods Regulations 2014 IATA - Resolution 618 Attachment	"A": Effective 1 January - 31 December 2014 IATA Dangerous Goods Regulations/ English IATA Dangerous Goods Regulations Dangerous Goods Regulations (IATA Resolution 618, Attachment "A") This user guide has been developed to consolidate existing IMO maritime security-related material into a companion guide to SOLAS chapter XI-2

and the ISPS Code so as to assist States in promoting maritime security through development of the requisite legal framework, associated administrative practices, procedures and the necessary material, technical and human resources. The intention is to assist SOLAS Contracting Governments in the implementation, verification, compliance with, and enforcement of, the

provisions of SOLAS chapter XI-2 and the ISPS Code.
International Maritime Dangerous Goods Code, Incorporating Amendment 40-20
 International Air Transport Association
 This is the 50th edition of this title and comes into effect on 1 January 2009. The IATA Dangerous Goods Regulations are published by the IATA Dangerous Goods Board and constitute a manual of

industry carrier regulations to be followed by IATA Member airlines. This edition incorporates all amendments made by the Convention on International Civil Aviation and the 2007-08 edition of the associated Technical Instructions for the Safe Transport of Dangerous Goods by Air. IATA Dangerous Goods Regulations set out procedures for the shipper and the

<p>operator by which articles and substances with hazardous properties can be safely transported by air on all commercial air transport. It provides all provisions mandated by the International Civil Aviation Organization (ICAO), and all rules agreed by airlines for safely handling of dangerous goods. Sections deal with: applicability, limitations, classification, identification,</p>	<p>packing, packaging specifications and performance tests, marking and labelling, documentation, handling, and radioactive material. The 50th edition of the IATA Dangerous Goods Regulations incorporates all amendments made by the Dangerous Goods Board and includes changes to the 2009-2010 edition of the ICAO Technical Instructions. <u>IATA Dangerous</u></p>	<p><u>Goods Regulations/English</u> Springer Science & Business Media The IATA Dangerous Goods Regulations (DGR) Manual gives procedures for the shipper and the operator by which articles and substances with hazardous properties can be safely transported by air on all commercial air transport. It provides all provisions mandated by ICAO, and all</p>

rules agreed by airlines for safely handling of dangerous goods. The 45th edition of the DGR introduces changes and improvements to the Regulations, including corrections and amendments advised by the International Civil Aviation Organization (ICAO) to the Technical Instructions, updates to State and operator variations. This year, in recognition of the forthcoming

changes to the requirements for infectious substances and diagnostic specimens, the DGR has an additional appendix detailing the changes made by the United Nations. It also incorporates all amendments made by the Dangerous Goods Board and includes changes advised by ICAO to the 2003-2004 Edition of the ICAO Technical Instructions. *A Guidebook for First Responders*

during the Initial Phase of a Dangerous Goods/Hazardous Materials Transportation Incident Inter-Governmental Maritime This is the 49th edition of this title and comes into effect on 1 January 2008. The IATA Dangerous Goods Regulations are published by the IATA Dangerous Goods Board and constitute a manual of industry carrier regulations to be followed by IATA Member airlines. This edition

incorporates all amendments made by the Convention on International Civil Aviation and the 2007-08 edition of the associated Technical Instructions for the Safe Transport of Dangerous Goods by Air. IATA Dangerous Goods Regulations set out procedures for the shipper and the operator by which articles and substances with hazardous properties can

be safely transported by air on all commercial air transport. It provides all provisions mandated by the International Civil Aviation Organization (ICAO), and all rules agreed by airlines for safely handling of dangerous goods. Sections deal with: applicability, limitations, classification, identification, packing, packaging specifications and performance tests, marking and labelling,

documentation, handling, and radioactive material. The key addition to the 49th edition is a new appendix which sets out the changes that will take effect from 1 January 2009 with the publication of the next edition of the ICAO Technical Instructions. **IATA Dangerous Goods Regulations 1999** International Air Transport Assn These Regulations are published

by the IATA Dangerous Goods Board, in consultation with the International Civil Aviation Organization (ICAO), and they constitute a manual of industry carrier regulations to be followed by IATA Member airlines. This edition is based on the requirements of Annex 18 to the Convention on International Civil Aviation and the 2007-08 edition of the associated Technical Instructions

for the Safe Transport of Dangerous Goods by Air. These Regulations set out procedures for the shipper and the operator by which articles and substances with hazardous properties can be safely transported by air on all commercial air transport. Sections deal with: applicability, limitations, classification, identification, packing, packaging specifications and

performance tests, marking and labelling, documentation, handling, and radioactive material. This is the 48th edition of this title and comes into effect on 1 January 2007, replacing the 47th edition (2006, ISBN 9291955809). *Dangerous Goods Regulations* Collins Technical Instructions for the Safe Transport of Dangerous Goods by Air/IMDG Code/International Maritime Dangerous

Technical Instructions for the Safe Transport of Dangerous Goods by Air

The aviation community, in which the International Civil Aviation Organization (ICAO), the International Air Transport Association (IATA) and the Civil Air Navigation Services Organization (CANSO) play leading roles, is hard at work in bringing

aviation into the 21st Century. In doing so, the United States and Europe have taken proactive steps forward in introducing modernization, particularly in moving towards more efficient air traffic management systems within NextGen and SESAR. Elsewhere, in the fields of personnel licensing, rules of the air, accident investigation and aeronautical charts and information,

significant strides are being made in moving from mere regulation to implementation and assistance calculated to make all ICAO member States self sufficient in international civil aviation. However, these objectives can be achieved only if the aviation industry has a sustained understanding of the legal and regulatory principles applying to the various areas of air navigation.

This book provides that discussion. Some of the subjects discussed in this book are: sovereignty in airspace; flight information and air defence identification zones; rules of the air; personnel licensing; meteorological services; operations of aircraft; air traffic services; accident and incident investigation; aerodromes; efficiency aspects of aviation and environmental

protection; aeronautical charts and information; the carriage of dangerous goods; and NextGen and SESAR . Except for NextGen and SESAR, these subjects form the titles of the Annexes to the Chicago Convention that particularly involve the rights and liabilities of the key players involved in air navigation. **IATA Dangerous Goods Regulations Effective 1/1/00**
