From the author of *Apocalyptic Planet* comes a vivid travelogue through prehistory, that traces the arrival of the first people in North America at least twenty thousand years ago and the artifacts that tell of their lives and fates. In *Atlas of a Lost World*, Craig Childs upends our notions of where these people came from and who they were. How they got here, persevered, and ultimately thrived is a story that resonates from the Pleistocene to our modern era. The lower

sea levels of the Ice Age exposed a vast land bridge between Asia and North America, but the land bridge was not the only way across. Different people arrived from different directions, and not all at the same time. The first explorers of the New World were few, their encampments fleeting. The continent they reached had no people but was inhabited by megafauna—mastodons, giant bears, mammoths, saber-toothed cats, five-hundred-pound panthers, enormous bison, and

sloths that stood one story tall. The first people were hunters—Paleolithic spear points are still encrusted with the proteins of their prey—but they were wildly outnumbered and many would themselves have been prey to the much larger animals. *Atlas of a Lost World* chronicles the last millennia of the Ice Age, the violent oscillations and retreat of glaciers, the clues and traces that document the first encounters of early humans, and the animals whose presence governed

the humans' chances for survival. A blend of science and personal narrative reveals how much has changed since the time of mammoth hunters, and how little. Across unexplored landscapes yet to be peopled, readers will see the Ice Age, and their own age, in a whole new light.

Discover wonder. "A wanderlust-whetting cabinet of curiosities on paper."— *New York Times*
Inspiring equal parts wonder and wanderlust,

Atlas Obscura is a phenomenon of a travel book that shot to the top of bestseller lists when it was first published and changed the way we think about the world, expanding our sense of how strange and marvelous it really is. This second edition takes readers to even more curious and unusual destinations, with more than 100 new places, dozens and dozens of new photographs, and two very special features: twelve city guides, covering Berlin, Budapest,

Buenos Aires, Cairo, London, Los Angeles, Mexico City, Moscow, New York City, Paris, Shanghai, and Tokyo. Plus a foldout map with a dream itinerary for the ultimate around-the-world road trip. More a cabinet of curiosities than traditional guidebook, Atlas Obscura revels in the unexpected, the overlooked, the bizarre, and the mysterious. Here are natural wonders, like the dazzling glowworm caves in New Zealand, or a baobab tree in South Africa so large it has a

pub inside where 15 people can sit and drink comfortably. Architectural marvels, including the M. C. Escher-like stepwells in India. Mind-boggling events, like the Baby-Jumping Festival in Spain—and no, it's not the babies doing the jumping, but masked men dressed as devils who vault over rows of squirming infants. Every page gets to the very core of why humans want to travel in the first place: to be delighted and disoriented, uprooted from the familiar and amazed by the new. With

its compelling descriptions, hundreds of photographs, surprising charts, maps for every region of the world, and new city guides, it is a book you can open anywhere and be transported. But proceed with caution: It's almost impossible not to turn to the next entry, and the next, and the next. 50 States National Geographic's maps and atlases are critically acclaimed and world-renowned for their accuracy, originality, innovative and
