With the development environment Thuncable X you can easily develop and test your own apps for IOS and Android in the same environment. The book is intended to help you get started with setting up the development environment right through to your own apps. It is written for beginners who want to deal with app development, but can also be used for teaching purposes in schools or community colleges. It is a step-by-step guide that does not focus on the full description of the programming language, but uses examples to illustrate the capabilities of the development environment. It starts with setting up the environment and the IOS and Android device. It continues with simple apps, via variable concepts and control structures to more complex topics. Event-driven apps are developed, subroutines are handled and sensors are queried. Working with multiple screens is just as important as files and dialogs. The examples are chosen so that the topics with increasing difficulty are treated as systematically as possible. The examples are not too complex to be easily understood. They should serve as inspiration for own projects. A technically strict systematology and a complete description of the programming language is not intended to not overwhelm beginners.

This volume offers a systematic review of the literature on communication education and instruction. Making meta-analysis findings accessible and relevant, the editors of this volume approach the topic from the perspective that meta-analysis serves as a useful tool for summarizing experiments and for determining how and why specific teaching and learning experiences have positive student outcomes. The topics covered here are meaningful and relevant to classroom practice, and each chapter offers a summary of existing quantitative social science research using meta-analysis. With contributions from experienced researchers throughout the communication discipline, this work provides a unique analysis of research in instructional communication. Taken together, the chapters in this volume enhance understanding of behaviors, practices, and processes that promote positive student outcomes. This book is a must-read for scholars, graduate students, and researchers in communication education, and will also be of interest to scholars and researchers in education.

Isidor Mautner had everything one could wish for, a beautiful and educated wife, gifted children, a magnificent apartment near the Vienna Hofburg and a summer palace in the Vienna Woods. At the height of his breathtaking rise, Isidor Mautner ruled one of the largest textile companies on the European continent from Vienna. His palace was a preferred meeting place of the international cultural scene, his family enjoyed the comforts of an upper-class family of the fin de siècle, and his son Konrad made a name for himself as a folklore researcher. But after the First World War, the empire crumbled, the bankruptcy of his son Stephan cost Mautner his fortune, and a last desperate attempt at an industrial new beginning failed. When Isidor Mautner died, he had lost almost everything. His family was robbed, forced to flee, murdered by the Nazis...

### Policing Sex Crossway

This collection focuses attention on an important but academically neglected area of contemporary operational policing: the regulation of consensual sexual practices. Despite the high-level public visibility of, and debate about, policing in relation to violent and abusive sexual crimes (from child sexual abuse to adult rape) very little public or scholarly attention is paid

to the policing of consensual sexual practices in contemporary societies. Whilst 'sexual life' is commonly understood to be a matter of 'private life' that is beyond formal social control, this book shows that policing is implicated in the regulation of a wide range of consensual sexual practices. This book brings together a well known and respected group of academics, from a range of disciplines, to explore the role of the police in shaping the boundaries of that aspect of our lives that we imagine to be most intimate and most our own. The volume presents a 'snap shot' of policing in respect of a number of diverse areas - such as public sex, pornography, and sex work - and considers how sexual orientation structures police responses to them. The authors critically examine how policing is implicated in the social, moral and political landscape of sex and, contrary to the established rhetoric of politicians and criminal justice practitioners, continues to intervene in the private lives of citizens. It is essential supplementary reading for courses in criminology, law, policing, sociology of deviance, gender and sexuality, and cultural studies.

Reflective practice has moved from the margins to the mainstream of professional education. However, in this process, its radical potential has been subsumed by individualistic, rather than situated, understandings of practice. Presenting critical perspectives that challenge the current paradigm, this book aims to move beyond reflective practice. It proposes new conceptualisations and offers fresh approaches relevant across professions. Contributors include both academics and practitioners concerned with the training and development of professionals. Definitions of reflection (which are often implicit) often focus on the individual's internal thought processes and responsibility for their actions. The individual - what they did/thought/felt - is emphasised with little recognition of context,

power dynamics or ideological challenge. This book presents the work of practitioners, educators, academics and researchers who see this as problematic and are moving towards a more critical approach to reflective practice. With an overview from the editors and fourteen chapters considering new conceptualisations, professional perspectives and new practices, Beyond Reflective Practice examines what new forms of professional reflective practice are emerging. It examines in particular the relationships between reflective practitioners and those upon whom they practise. It looks at the ways in which the world of professional work has changed and the ways in which professional practice needs to change to meet the needs of this new world. It will be relevant for those concerned with initial and ongoing professional learning, both in work and in educational contexts.

How to Heal the Sick, Cast Out Demons, Raise the Dead--and More! The Bible says that if you belong to Jesus, you have the power to: · heal the sick · cast out demons · bring deliverance to those trapped in spiritual darkness · prophesy in his name · call forth creative miracles · receive supernatural words of wisdom and knowledge · even raise the dead So why do so many Christians live powerless lives? Why do they operate with so little faith? Having gone through his own journey from doubt to belief, Chicagoland pastor Robby Dawkins now ministers and speaks internationally, and where he goes, miracles happen. In these pages he shares incredible stories of God using ordinary people to do the impossible. And he shows that, when you begin to have faith in the power of God, take him at his Word, and understand his love for you, you will see his power released in healings, financial blessings, and miracles of all kinds.
