Before the Riders came to their remote valley the Yendri led a tranquil pastoral life. When the Riders conquered and enslaved them, only a few escaped to the forests. Rebellion wasn't the Yendri way; they hid, or passively resisted, taking consolation in the prophecies of their spiritual leader. Only one possessed the necessary rage to fight back: Gard the foundling, half-demon, who began a one-man guerrilla war against the Riders. His struggle ended in the loss of the family he loved, and condemnation from his own people. Exiled, he was taken as a slave by powerful mages ruling an underground kingdom. Bitterer and wiser, he found more subtle ways to earn his freedom. This is the story of his rise to power, his vengeance, his unlikely redemption and his maturation into a loving father--as well as a lord and commander of demon armies. Kage Baker, author of the popular and witty fantasy, *The Anvil of the World*, returns to that magical world for another story of love, adventure, and a fair bit of ironic humor. Why do we do the things we do? Why do we have passions, desires, what are they born out of? Ruban Costello has a passion and a desire for a beast he knows as 'the white stag.' A talisman and a link to his childhood that may, if hunted down, help him win the hand of a fair maiden. A maiden who might just like chrome and grease as much as he does. The triumph of finding the white stag may also give Ruban an answer to why he finds love and life so difficult. Love is irrational but then fortunately so are we. Love and life are two of the most precious qualities we have. It is a terrible shame to waste them or even worse, wake up and find they are gone. This then is a tale about one man's struggle to prevent such a loss. Of coming to terms with those most difficult of obstacles, other people, growing up and life. Why such things shape us the way they do and how that effects each and every one of us including Ruban Costello. Why should you read the white stag? For the same reason I had in writing it. Why this book exists is to understand life, just a little more. You also get to meet some great people and some amazing automobiles. Why not try it? Enjoy this new refreshed edition.

The Stag Hunt and the Evolution of Social Structure CNIB, 197

What brought the ape out of the trees, and so the man out of the ape, was a taste for blood. This is how the story went, when a few fossils found in Africa in the 1920s seemed to point to hunting as the first human activity among our simian forebears--the force behind our upright posture, skill with tools, domestic arrangements, and warlike ways. Why, on such slim evidence, did the theory take hold? In this engrossing book Matt Cartmill searches out the origins, and the strange allure, of the

myth of Man the Hunter. An exhilarating foray into cultural history, *A View to a Death in the Morning* shows us how hunting has figured in the western imagination from the myth of Artemis to the tale of Bambi—and how its evolving image has reflected our own view of ourselves. A leading biological anthropologist, Cartmill brings remarkable wit and wisdom to his story. Beginning with the killer-ape theory in its post-World War II version, he takes us back through literature and history to other versions of the hunting hypothesis. Earlier accounts of Man the Hunter, drafted in the Renaissance, reveal a growing uneasiness with humanity's supposed dominion over nature. By delving further into the history of hunting, from its promotion as a maker of men and builder of character to its image as an aristocratic pastime, charged with ritual and eroticism, Cartmill shows us how the hunter has always stood between the human domain and the wild, his status changing with cultural conceptions of that boundary. Cartmill's inquiry leads us through classical antiquity and Christian tradition, medieval history, Renaissance thought, and the Romantic movement to the most recent controversies over wilderness management and animal rights. Modern ideas about human dominion find their expression in everything from scientific theories and philosophical assertions to Disney movies and sporting magazines. Cartmill's survey of these sources offers fascinating insight into the significance of hunting as a mythic metaphor in recent times, particularly after the savagery of the world wars reawakened grievous doubts about man's place in nature. A masterpiece of humanistic science, *A View to a Death in the Morning* is also a thoughtful meditation on what it means to be human, to stand uncertainly between the wilderness of beast and prey and the peaceable kingdom. This richly illustrated book will captivate readers on every side of the dilemma, from the most avid hunters to their most vehement opponents to those who simply wonder about the import of hunting in human nature.

"The possibility of a successful solution depends on the coevolution of cooperation and social structure. Brian Skyrms focuses on three factors that affect the emergence of such structure and the facilitation of collective action: location (interactions with neighbors), signals (transmission of information), and association (the formation of social networks)."--Jacket.
