ANNA KIERA

United States Army in the World War, 1917-1919 Princeton University Press

Written from widely different perspectives, these essays characterize the Great Revolution as the dawn of the modern age, the grand narrative of modernity. The scope of issues under scrutiny is extremely broad, ranging from the analyses of the hotly debated class character of 1789 and the problem of the nation state to the "Cult of the Supreme Being," the emancipation of the Jews, and the cultural heritage of the Revolution. This title is part of UC Press's Voices Revived program, which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice, reach, and impact. Drawing on a backlist dating to 1893, Voices Revived makes high-quality, peer-reviewed scholarship accessible once again using print-on-demand technology. This title was originally published in 1990.

Read along with Disney! There are more than 101 things to love about Disney's 101 Dalmatians! Fall in love with Pongo, Perdita, and their adorable puppies in this film retelling.

The Old Testament in Byzantium Columbia University Press

A concise and unique reference work central to any serious examination of the Army's involvement in World War I. Reproduced in 5 volumes, the original volume numbering and consecutive pagination remain unchanged to assist researchers using citations to the first printing

The French Revolution and the Birth of Modernity Taylor & Francis

The Old Testament in Byzantium contains papers from a Dumbarton Oaks symposium based on an exhibition of early Bible manuscripts titled "In the Beginning: Bibles before the Year 1000." Topics include manifestations of the holy books in Byzantine manuscript illustration, architecture, and government, as well as in Jewish Bible translations.

An Etymological Dictionary of the Romance Languages Disney Electronic Content

A notable contribution to our understanding of ourselves. This book explores the realm of human behavior in social situations and the way that we appear to others. Dr. Goffman uses the metaphor of theatrical performance as a framework. Each person in everyday social intercourse presents himself and his activity to others, attempts to guide and control the impressions they form

of him, and employs certain techniques in order to sustain his performance, just as an actor presents a character to an audience. The discussions of these social techniques offered here are based upon detailed research and observation of social customs in many regions.

The Colonial Office List for ... London : S. Low

Includes music.

From Lenin to Khrushchev Univ of California Press

This book presents a comprehensive reference for real estate investors everywhere. Covering the unique real-estate situations in seventeen key countries, including the United States and Europe, it offers a unique international overview of the real estate market.

101 Dalmatians Palgrave Macmillan

"Every year between 250 000 and 500 000 people suffer a spinal cord injury, with road traffic crashes, falls and violence as the three leading causes. People with spinal cord injury are two to five times more likely to die prematurely. They also have lower rates of school enrollment and economic participation than people without such injuries. Spinal cord injury has costly consequences for the individual and society, but it is preventable, survivable and need not preclude good health and social inclusion. Ensuring an adequate medical and rehabilitation response, followed by supportive services and accessible environments, can help minimize the disruption to people with spinal cord injury and their families. The aims of International perspectives on spinal cord injury are to: ---assemble and summarize information on spinal cord injury, in particular the epidemiology, services, interventions and policies that are relevant, together with the lived experience of people with spinal cord injury; ---make recommendations for actions based on this evidence that are consistent with the aspirations for people with disabilities as expressed in the Convention on the Rights of Persons with Disabilities.

The Taming of Chance Anchor

In Psychiatric Power, the fourth volume in the collection of his groundbreaking lectures at the Collège de France, Michel Foucault addresses and expands upon the ideas in his seminal Madness and Civilization, sketching the genealogy of psychiatry and of its characteristic form of power/knowledge. Madness and Civilization undertook the archeology of the division according to which, in Western Society, the madman found himself separated from the sane. That book ends with the medicalization of madness at the beginning of the nineteenth century. Psychiatric Power continues this discourse up to the end of the nineteenth century, and the double "depsychiatrization" of madness, now dispersed between the neurologist and the psychoanalyst. Presented in a

conversational tone, Psychiatric Power brings fresh access and light to the work of one of the past century's preeminent thinkers.

The Diapason World Health Organization

Original edition published in 1953 under the title From Lenin to Malenkov. The present 2d edition contains extensive revisions and additions.

The Plutonium Story Harvard University Press

A seventeen-volume compilation of selected AEF records gathered by Army historians during the interwar years. This collection in no way represents an exhaustive record of the Army's months in France, but it is certainly worthy of serious consideration and thoughtful review by students of military history and strategy and will serve as a useful jumping off point for any earnest scholarship on the war. --from Foreword by William A Stofft.

An Italian Dictionary Harvard University Press

This book chronicles on a day-to-day basis the astounding story of the discovery of plutonium and the feverish activities to unlock its secrets and enhance its productivity to the levels necessary for the building of an atomic bomb in World War II by its discoverer, Professor Glenn T. Seaborg. Seaborg, who shared the 1951 Nobel Prize in Chemistry with his colleague Edwin T. McMillan, was a meticulous diarist whose detailed records of thousands of pages have been edited and supplied with accompanying notes by a trio consisting of a professional scientist with a strong interest in history and two professional historians of science. The work provides not only the step by step description of the scientific activities and the thought processes of Seaborg and his team throughout the war years, but also gives keen insight into the operation of the Manhattan District and of the scientists who played an important role in its functions. Virtually all of the players are identified in the annotations, which also serve to explain the significance of key events and findings as well as obscure or arcane scientific procedures. The professional chemist or nuclear scientist will find this an exciting and compelling saga of a great scientific discovery, carried out in a bygone era of unfettered and productive science that is not likely to occur again. The copious annotations and identifications not only add to the story, but make this a vital and necessary reading and reference source not only for the historian of science, but for those interested in the behind the scenes history of World War II and the Manhattan District.

Outlines of the geology of Leicestershire Cambridge University Press

The leading historians who are the authors of this work offer a highly original account of one of the most important

transformations in Western culture: the change brought about by the discovery and development of printing in Europe. Focusing primarily on printed matter other than books, *The Culture of Print* emphasizes the specific and local contexts in which printed materials, such as broadsheets, flysheets, and posters, were used in modern Europe. The authors show that festive, ritual, cultic, civic, and pedagogic uses of print were social activities that involved deciphering texts in a collective way, with those who knew how to read leading those who did not. Only gradually did these collective forms of appropriation give way to a practice of reading—privately, silently, using the eyes alone—that has become common today. This wide-ranging work opens up new historical and methodological perspectives and will become a focal point of debate for historians and sociologists interested in the cultural transformations that accompanied the rise of modern societies. Originally published in 1989. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

Blago Jeziga Slovinskoga ... Thesaurus linguæ Illyricæ; sive, Dictionarium, Illyricum in quo verba Illyrica Italice et Latine redduntur, labore P. J. Micalia ... collectum, etc BRILL
This exceptional volume deals with the hotly contested legal status of the Paracels and the Spratlys, two inhospitable archipelagos located in the South China Sea, sovereignty over which is disputed by several states. The author investigates the contribution which international law can make towards determining the rights of all parties involved. In order to do so she goes back into history to find out at each stage what the actual situation was and what its legal significance was in terms of the legal categories of the time. The originality of this work, compared to others already published on this topic, lies in its

analysis of the valuable French archives. Not only these archives, but also existing legal writings have served as a basis for the investigation into the status of the archipelagos. The book sheds new and significant light on this important question.

International Perspectives on Spinal Cord Injury Macmillan
The invention of collage by Picasso and Braque in 1912 proved to be a dramatic turning point in the development of Cubism and Futurism and ultimately one of the most significant innovations in twentieth-century art. Collage has traditionally been viewed as a new expression of modernism, one allied with modernism's search for purity of means, anti-illusionism, unity, and autonomy of form. This book - the first comprehensive study of collage and its relation to modernism - challenges this view. Christine Poggi argues that collage did not become a new language of modernism but a new language with which to critique modernism. She focuses on the ways Cubist collage - and the Futurist multimedia work that was inspired by it - undermined prevailing notions of material and stylistic unity, subverted the role of the frame and pictorial ground, and brought the languages of high and low culture into a new relationship of exchange.

Cyclopedia of Painters and Paintings Yale University Press
This book combines detailed scientific historical research with characteristic philosophic breadth and verve.

Order of Battle of the United States Land Forces in the World War Routledge

Mixing fiction, history, psychoanalysis, and personal fantasy, *Teresa, My Love* turns a past world into a modern marvel, following Sylvia Leclercq, a French psychoanalyst, academic, and incurable insomniac, as she falls for the sixteenth-century Saint Teresa of Avila and becomes consumed with charting her life. Traveling to Spain, Leclercq, Julia Kristeva's probing alter ego, visits the sites and embodiments of the famous mystic and awakens to her own desire for faith, connection, and rebellion. One of Kristeva's most passionate and transporting works, *Teresa, My Love* interchanges biography, autobiography, analysis, dramatic dialogue, musical scores, and images of paintings and

sculpture to engage the reader in Leclercq's—and Kristeva's—journey. Born in 1515, Teresa of Avila outwitted the Spanish Inquisition and was a key reformer of the Carmelite Order. Her experience of ecstasy, which she intimately described in her writings, released her from her body and led to a complete realization of her consciousness, a state Kristeva explores in relation to present-day political failures, religious fundamentalism, and cultural malaise. Incorporating notes from her own psychoanalytic practice, as well as literary and philosophical references, Kristeva builds a fascinating dual diagnosis of contemporary society and the individual psyche while sharing unprecedented insights into her own character.

On Hashish

On Hashish is Walter Benjamin's posthumous collection of writings, providing a unique and intimate portrait of the man himself, of his experiences of hashish, and also of his views on the Weimar Republic.

Neues und vollständiges Wörterbuch der deutschen und französischen Sprache

Published in 1984: These texts which have been little studied for their literary qualities represent a vital link between the didactic tradition of the Middle Ages and the fictional short stories of the Renaissance, such as the thirteenth-century collection of tales known as the *Novellino*, and later, Boccaccio's *Decameron*. [Thesaurus Linguarum Orientalium Turcicæ, Arabicæ, Persicæ, Præcipuas earum opes à Turcis peculiariter usurpatas](#)
'...a lucid and scholarly account of an important and immensely complex subject...Dr. Alpert's command of a broad range of archival material, printed documents and secondary works in six languages is extremely impressive.' - P. Preston, London School of Economics and Political Science
It is now twenty years since a study was dedicated to the international aspects of the Spanish Civil War and this new synthesis covering the whole of the era and setting it against major events of the late 1930s is well overdue. Michael Alpert takes full advantage of newly accessible archival sources to disentangle the intricacies of this complex issue.
