Lives of Passion, School of Hope Kaplan
The Hopeful Minds Overview Educator Guide is a curriculum designed to give children an introduction to the "what," "why," and "how" of hope. The curriculum includes three, 45-minute lessons

that introduce the key tools needed to create, maintain, and grow hope, background information for educators, supplemental resources, classroom visuals, and a Hopework Book for students. The Hopework Book is included in this curriculum, but it can also be downloaded separately at www.hopefulminds.org/curriculum. Each lesson also

includes a Hope Hero spotlight: a story highlighting positive role models who are using the skills in the curriculum to overcome obstacles and achieve their dreams. The Hope Heroes in the Hopeful Minds Overview include John Krasinski, "Magic" Johnson, and Selena Gomez. While this curriculum is geared towards 2nd grade students, it can be easily

adapted for any age range (adults included), and can be utilized in any setting (such as schools, after-school programs, church groups, hospitals, offices, and more). This curriculum has been specially designed to be used for either classroom or remote learning. The curriculum reinforces all eight National Health Education Standards as set forth by the Centers for Disease Control and Prevention (CDC), meets Social Emotional Learning (SEL) guidelines, and promotes empathy and

anti-bullying behaviors. The Hopeful Minds Overview Educator Guide is based on research that suggests hope is a measurable and teachable skill. Hope impacts all outcomes in life, including academic achievement, athletic performance, health, and resilience. The curriculum was developed by a global advisory board, has been featured as an innovation by the World Bank, and was created using hope theory informed by researchers around the world. This is the first free

program to operationalize hope, and to offer it globally to those in need. You are welcome to download it FREE at www.hopefulminds.org, or purchase it here as a way to further the work of our organization. 100% of the profits from the purchase of this text go directly to iFred, a 501c3, and the Hopeful Minds program. Glowing red lines split their faces. Shock-red hair and clothes warn people to flee their approach. They are plague birds, the powerful merging of humans and artificial intelligences who serve as judges and executioners after the collapse of civilization. And the plague birds' judgment is swift and deadly, as Crista

discovered as a child when she watched one kill her mother. In a world of gene-modded humans constantly watched over by benevolent AIs, everyone hates and fears the plague birds. But to save her father and home village, Crista becomes the very creature she fears the most. And her first task as a plague bird is hunting down an ancient group of murderers wielding magic-like powers. As Crista and her AI symbiote travel farther from home than she ever imagined,

they are plunged into a strange world where she judges wrongdoers, befriends other outcasts, and uncovers an extremely personal conspiracy that threatens the lives of millions. Plague Birds is a genre-bending mix of science fiction and dark fantasy and the epic story of a young woman who becomes one of the future's most hated creatures, with a killer AI bonded to her very blood. *Salesforce Platform Developer I Certification Guide* Exceller Books

NEW YORK TIMES BESTSELLER Yuval Noah Harari, author of the critically-acclaimed New York Times bestseller and

international phenomenon *Sapiens*, returns with an equally original, compelling, and provocative book, turning his focus toward humanity's future, and our quest to upgrade humans into gods. Over the past century humankind has managed to do the impossible and rein in famine, plague, and war. This may seem hard to accept, but, as Harari explains in his trademark style—thorough, yet riveting—famine, plague and war have been

transformed from incomprehensible and uncontrollable forces of nature into manageable challenges. For the first time ever, more people die from eating too much than from eating too little; more people die from old age than from infectious diseases; and more people commit suicide than are killed by soldiers, terrorists and criminals put together. The average American is a thousand times more likely to die from binging at McDonalds than from being blown up by AI

Qaeda. What then will replace famine, plague, and war at the top of the human agenda? As the self-made gods of planet earth, what destinies will we set ourselves, and which quests will we undertake? Homo Deus explores the projects, dreams and nightmares that will shape the twenty-first century—from overcoming death to creating artificial life. It asks the fundamental questions: Where do we go from here? And how will we protect this fragile world from our own

destructive powers? This is the next stage of evolution. This is Homo Deus. With the same insight and clarity that made Sapiens an international hit and a New York Times bestseller, Harari maps out our future. development specialist and leadership coach Christina Congleton delivers an insightful and urgently needed discussion of how millennials can move beyond the tired clichés of the self-help genre and achieve new levels of satisfaction and contentment. In the book, you'll explore how crushing levels of student debt, consecutive financial crises, and an alarming uptick in depression, substance abuse, and suicide are combining to significantly

damage the potential of millennials everywhere. You'll also find concrete strategies—rooted in developmental psychology—to counteract those negative influences. *Getting Over Ourselves* offers: Insights into why “life hacks,” productivity seminars, and more “adulting” are not the solutions to the issues faced by the millennial generation. Frameworks that reject the idea that there is a separate, solitary self in need of constant improvement and connect

you with your deeper humanity. Effective techniques for fending off burnout and ways to move beyond the unsatisfactory status quo. An essential and timely work that belongs in the libraries of millennials everywhere, *Getting Over Ourselves* is the antidote to the skin-deep, ineffective “self-help” material that you've been looking for. THE REDEMPTION SERIES: 100 years after Margaret Anne transformed an American family, comes the profound 4-part finale to the Calhoun saga. BOOK THREE: Reckoning Sacrifice birthed the unsettled world of Margaret Anne. Now, only surrender can pave the way for closure. As Matthew's harrowing and highly anticipated journey to deliver the Spanish Cross into the hands of his estranged son reaches its climactic conclusion, the

one who has been ordained to fulfill the ancient promise of the often maligned and unjustly persecuted Miss Margaret Anne Basseterre is revealed. Reckoning portrays the troubled life of Matthew's son, David Michael Sonneman. From his tragic and destitute beginnings, which are sparingly revealed in Angel Ascending, the story of David's life, including the true nature of his trials and tribulations and his sacred mission, is brought into focus in this scintillating

and thought provoking third book of the Redemption Series. When David ultimately discovers that his earthly salvation from that darkened basement in Baltimore was something far different than what he had always supposed, he is forced to reconsider his lifelong desire to avenge those wrongs that were served upon him, at least those wrongs that he understood as a young child. He must decide between his developing faith, which accompanies his hope for a better

tomorrow, and those deeply entrenched desires to put an end to those responsible for the worst of his childhood afflictions when the true story of his life is made known to him. "Reckoning" is the fascinating continuation of the Redemption series, uncovering the next intricate layer to the Margaret Anne saga of fate, faith, reckoning, and mercy.

RECKONING Oxford University Press, USA
Life on the Mississippi (1883) is a memoir by Mark Twain of his days as

a steamboat pilot on the Mississippi River before the American Civil War. It is also a travel book, recounting his trip along the Mississippi River from St. Louis to New Orleans many years after the war. The book begins with a brief history of the river as reported by Europeans and Americans, beginning with the Spanish explorer Hernando de Soto in 1542. It continues with anecdotes of Twain's training as a steamboat pilot, as the 'cub' (apprentice) of an experienced pilot, Horace

E. Bixby. He describes, with great affection, the science of navigating the ever-changing Mississippi River in a section that was first published in 1876, entitled "Old Times on the Mississippi". Although Twain was actually 21 when he began his training, he uses artistic license to make himself seem somewhat younger, referring to himself as a "fledgling" and a "boy" who "ran away from home" to seek his fortune on the river, and playing up his own callowness and naïveté

Fresh Hope is a FANTASTIC and much needed resource for the church! I particularly appreciate the emphasis on the wellness versus medical model, as it empowers us to be active participants in the pursuit of healing. I would have given anything to be part of a group like this years back. Now I am so excited to help bring this ministry to the Chicago area. Jon

Press MA Christian Education blogger for BP magazine A well written book that is concise, easy to understand and free of psychobabble. I highly recommend Brad Hoefs' book, Fresh Hope, for those suffering from mood disorders. Fresh Hope is an excellent resource that is informative and enlightening. It will bring insight to family and friends wanting to increase their understanding of their loved ones' mood disorders. Definitely a must read. Encouraging,

explicit, resounding in truth...begin your own journey and allow God to redeem your pain and suffering into trophies of His wonderful grace. Allen L. Minnig LMHP, C.P., Omaha, NE, 2012 Brad has provided a great resource for the faith community in their effort to serve those who struggle with mood disorders. As a "wounded healer" he has provided a theological framework and philosophy of ministry for the church in partnering with the medical community on

behalf of those who live with a chemical imbalance. Brad's story of recovery and growth brings hope to those who are not satisfied with merely coping with the challenges of a harsh medical diagnosis and medication. It is an invaluable resource for the church in coming alongside the millions in our communities who struggle with depression and anxiety. Brad's story of integrating faith in his recovery will bring hope to all who battle with depression. Dr Wendell

Nelson Pastor of Spiritual Formation Christ Community Church Pastor Brad Hoefs was diagnosed with Bipolar I Disorder in 1995, after experiencing a very public and painful manic episode. This episode led to him being asked to resign as the senior pastor of a large growing church. After his resignation a group of people formed Community of Grace Church and provided the Hoefs with a safe place to heal and find hope. It is out of this experience that Brad started Fresh Hope

in 2009, a Christ-centered support group for those who suffer from mood disorders, as well as for their loved ones. Fresh Hope has grown to numerous locations throughout the US, with new groups starting all the time. Brad serves as senior pastor at Community of Grace in Elkhorn, NE and is President of WorshipOutlet.com, which provides creative worship resources. He also serves as a member of the State of Nebraska's Advisory Committee to the

Governor on Mental Health Services. Brad is married to Donna, his sweetheart since college. They have two married adult children, Noah and Noelle, and two grandchildren, Ava and Jayden, who bring them great joy! You may contact Pastor Brad by emailing him at bradhoefs@freshhope.us.

 Tom loves Jenny. Tom marries Jenny. Tom and Jenny should live happily ever after--.but life intervenes. Tom gets burned, tries to deny his

soul, and loses his way. Then Jenny, the love of his life, leaves him to share a bed with Satan, and Tom's world falls apart. He decides to focus all his time and energy on fixing his life and getting Jenny back. To accomplish this daunting task Tom stops talking and withdraws into himself where he feels certain he can find the answers he's looking for. To get away from outside distractions and well meaning kith and kin he enters a cushy psychiatric center. While in this upscale Booby Hatch Tom

finds himself drawn into the lives of his fellow loons. As he works through his problems Tom rediscovers a part of himself that he thought he had buried a long time ago. He realizes that he's been the unwitting master of his own destruction, and he undergoes a kind of rebirth that puts him in touch with his nature. Tom learns that sometimes, when God wants to punish you He answers your prayers.

Hopeful Minds Overview Educator Guide Crown House Publishing Ltd
Written by Debra Kidd, A Curriculum of Hope: As rich in humanity as in knowledge explores how good curriculum design can empower schools to build bridges between their pupils' learning and the world around them. A

great many schools are wondering how they can build a curriculum model that meets the demands of government policy as well as the needs of the children and communities they serve. In Curriculum of Hope, Debra illustrates how teachers can deliver learning experiences that genuinely link knowledge to life. Working on the premise that a strong curriculum is supported by five key pillars of practice coherence, credibility, creativity, compassion and community she presents a

plethora of examples that demonstrate how schools, parents, pupils and the wider local community can learn together to build from within. Debra enquires into the ways in which schools can create units of work that are both knowledge- and humanity-rich, and challenges the view that the role of children is simply to listen and learn instead advocating their active engagement with local and global issues. She does so by delving into the role of pedagogy as a means of

empowering children, and by exploring some of the more overlooked pedagogical tools that can have a great impact on children's learning and well-being story, movement and play as well as some of the recent research into memory and retention. Towards the back of the book you will find case studies demonstrating how teachers can work with both their own and other subject departments across the school to plan in ways that allow for pupil choice, autonomy

and responsibility. Furthermore, there are some accompanying planning documents for these examples provided in the appendix (The Seed Catalogue) which you may find useful, and these documents are also available for download. Suitable for teachers and leaders in all schools.
