“This rich volume will interest scholars and students of Africa, the African diaspora, world history, legal history, and international affairs.” —Lorelle Semley, author of *To Be Free and French: Citizenship in France’s Atlantic Empire* The enforced removal of individuals has long been a political tool used by African states to create generations of asylum seekers, refugees, and fugitives. Historians often present such political exile as a potentially transformative experience for resilient individuals, but this reading singles the exile out as having an exceptional experience. This collection seeks to broaden that understanding within the global political landscape by considering the complexity of the experience of exile and the lasting effects it has had on African peoples. The works collected in this volume seek to recover the diversity of exile experiences across the continent. This corpus of testimonials and documents is presented as an “archive” that provides evidence of a larger, shared experience of persecution and violence. This consideration reads exiles from African colonies and nations as active participants within, rather than simply as victims of, the larger global diaspora. In this way, exile is understood as a way of asserting political dissidence and anti-imperial strategies. Broken into three distinct parts, the volume considers legal issues, geography as a strategy of anticolonial resistance, and memory and performative understandings of exile. The experiences of political exile are presented as fundamental to an understanding of colonial and postcolonial oppression and the history of state power in Africa.

Most African languages are spoken by communities as one of several languages present on a daily basis. The persistence of multilingualism and the linguistic creativity manifest in the playful use of different languages are striking, especially against the backdrop of language death and expanding monolingualism elsewhere in the world. The effortless mastery of several languages is disturbing, however, for those who take essentialist perspectives that see it as a problem rather than a resource, and for the dominating, conflictual, sociolinguistic model of multilingualism. This volume investigates African minority languages in the context of changing patterns of multilingualism, and also assesses the status of African languages in terms of existing influential vitality scales. An important aspect of multilingual praxis is the speakers' agency in making choices, their repertoires of registers and the multiplicity of language ideology associated with different ways of speaking. The volume

represents a new and original contribution to the ethnography of speaking of multilingual practices and the cultural ideas associated with them.

Land Tenure in African Agrarian Systems argues that proposals for sweeping changes in African agricultural land tenure are misconceived. Colonial administrators, African elites, and foreign aid donors have historically viewed the variety of indigenous landholding systems as obstacles to increased agricultural production and to economic progress in general, believing that only private land ownership will provide the investment security necessary for agricultural efficiency. This volume contends that privatization is not the panacea for Africa's agrarian ills, and that any solutions must take into account critical social dynamics that influence how productive resources are acquired, used, contested, and underutilized. Editors Thomas J. Bassett and Donald E. Crummey bring together experts with a variety of perspectives on land tenure issues throughout sub-Saharan Africa. Whether focusing at the level of household, community, or nation, these case studies describe how land access, control, and management are embedded in social, political, and economic structures that fluctuate and change over time. They examine these embedded systems closely to illuminate the relationship between landholding patterns and agricultural output, stressing throughout that land tenure is a political process. The contributors, an international group of scholars in the areas of land tenure, geography, African studies, anthropology, history, and political science, call for pragmatism and respect for the flexibility of indigenous tenure systems, while also addressing the complicated issues of state intervention, socioeconomic differentiation, and the social relations of production. By looking

at the social and political processes behind the struggles over productive resources, *Land in African Agrarian Systems* advances the debate over the land question and agricultural performance in Africa and counters the arguments of the powerful forces pushing for privatization.

The movement of workers involved in long-distance trade in Africa constitutes one of the most ancient and most massive forms of labour migration in African history. Focusing primarily on the latter half of the nineteenth century, the contributors to this volume examine various aspects of long-distance trade: including the role of the family, wage employment, slavery, and the entrepreneur; the institutions that mobilized and organized the work force; and the workers' remuneration and the accumulation of surplus.

This book focuses on the significant role of West African consumers in the development of the global economy. It explores their demand for Indian cotton textiles and how their consumption shaped patterns of global trade, influencing economies and businesses from Western Europe to South Asia. In turn, the book examines how cotton textile production in southern India responded to this demand. Through this perspective of a south-south economic history, the study foregrounds African agency and considers the lasting impact on production and exports in South Asia. It also considers how European commercial and imperial expansion provided a complex web of networks, linking West African consumers and Indian weavers. Crucially, it demonstrates the emergence of the modern global economy.

This book traces the history and development of the port of Benguela, the third largest port of slave embarkation on the coast of Africa, from the early seventeenth to the mid-nineteenth century. Benguela, located on the central coast of present-day Angola, was founded by the Portuguese in the early seventeenth century. In discussing the impact of the transatlantic slave trade on African societies, Mariana P. Candido explores the formation of

new elites, the collapse of old states and the emergence of new states. Placing Benguela in an Atlantic perspective, this study shows how events in the Caribbean and Brazil affected social and political changes on the African coast. This book emphasizes the importance of the South Atlantic as a space for the circulation of people, ideas and crops.

Debates over the economic, social, and political meaning of slavery and the slave trade have persisted for over two hundred years. The Atlantic Slave Trade brings clarity and critical insight to the subject. In fourteen essays, leading scholars consider the nature and impact of the transatlantic slave trade and assess its

meaning for the people transported and for those who owned them. Among the questions these essays address are: the social cost to Africa of this forced migration; the role of slavery in the economic development of Europe and the United States; the short-term and long-term effects of the slave trade on black mortality, health, and life in the New World; and the racial and cultural consequences of the abolition of slavery. Some of these essays originally appeared in recent issues of *Social Science History*; the editors have added new material, along with an introduction placing each essay in the context of current debates. Based on extensive archival research and detailed historical

examination, this collection constitutes an important contribution to the study of an issue of enduring significance. It is sure to become a standard reference on the Atlantic slave trade for years to come. Contributors. Ralph A. Austen, Ronald Bailey, William Darity, Jr., Seymour Drescher, Stanley L. In this holistic approach to the study of textiles and their makers, Colleen Kriger charts the role cotton has played in commercial, community, and labor settings. She pays close attention the details of how people made, exchanged, and wore cotton cloth from before industrialization in Europe to the twentieth century. Closely tracing this history in Nigeria, *Cloth in West African History* offers a fresh perspective on the history of the region and on the local, regional, and global processes that shaped it.
