Handbook of Cathodic Corrosion Protection Lippincott Williams & Wilkins

For courses in Pediatric Nursing. A comprehensive survey of family-centered pediatric nursing care Child Health Nursing: Partnering with Children & Families promotes excellence in nursing care for infants, children, and adolescents--in hospitals and in the community. It focuses on the importance of partnering with families to adapt care plans for children based on their age, health status, and social and cultural influences. The text considers the impact of contemporary care environments on nursing practice, both in health promotion and in the care of children with acute or chronic health conditions. By offering industry best practices and practical applications, the book

encourages students to apply evidence-based findings and clinical reasoning to planning superior care. The updated 3rd edition explains how modern nursing practice is affected by reforms to healthcare and its delivery--such as electronic health records, new approaches to chronic and acute condition management, and a focus on prevention. To support safe, effective, and innovative care, this edition draws on the latest recommendations of NANDA International diagnoses, Nursing Intervention Classifications (NIC), Nursing Outcomes Classifications (NOC), and Healthy People 2020. Recruiting, hiring, and retaining an excellent and diverse faculty is a top priority for colleges and universities nationwide. Yet faculty serving on search committees (or hiring committees) receive little or no education about the search process. Relying on both research and experience presenting hiring workshops to search committee members, the authors of this guidebook provide advice and recommendations for conducting an effective faculty search. The book includes practical suggestions for managing all stages of a faculty search as well as recommendations for ensuring that search committee members recruit women and members of underrepresented groups into their applicant pools and consciously avoid the influence of bias and assumptions in their evaluation of job candidates.

The corrosion of carbon steels in amine units used for gas treatment in refining operations is a major problem for the petrochemical industry. Maximising amine unit reliability, together with improving throughput, circulation and treatment capacity, requires more effective ways of measuring and predicting corrosion rates. However, there has been a lack of data on corrosion. This valuable report helps to remedy this lack of information by summarising findings from over 30 plants. It covers such amine types as methyl diethanolamine (MDEA), diethanolamine (DEA), monoethanolamine (MEA) and di-isopropanolamine (DIPA), and makes recommendations on materials and process parameters to maximise amine unit efficiency and reliability. Covers such amine types as Methyl Diethanolamine (MDEA) and Di-isopropanolamine Makes recommendations on materials and process parameters to maximise amine unit efficiency and reliability
