A supernatural story of sexual awakening, growing up, and suburban vampirism, Happiness follows a dorky boy who is attacked by a girl in an alley. She sucks his blood and gives him a choice: life or death. He chooses

life, but finds himself nearly overwhelmed by a new thirst and a fascination with the necks of his classmates... Praise for Flowers of Evil: "A shockingly readable story that vividly--one might even say queasily--evokes the fear and confusion of discovering one's own sexuality. Recommended." -The Manga Critic "A page-turning tale of sordid middle school blackmail."

-Otaku USA Magazine "By loving this manga I recognize what a sick and twisted individual I have become. While I can still say that I am not truly deviant, Flowers of Evil is a great reminder of my own thirst for power and my own personal corruption." -Otaku Champloo

Today most Americans, black and white, identify slavery with cotton, the deep South, and the African-American church. But at the beginning of the nineteenth century, after almost two hundred years of African-American life in mainland North America, few slaves grew cotton, lived in the deep South, or embraced Christianity. Many Thousands Gone traces the evolution of black society from the first arrivals in the early seventeenth century through the Revolution. In

telling their story, Ira Berlin, a leading historian of southern and African-American life, reintegrates slaves into the history of the American working class and into the tapestry of our nation. Laboring as field hands on tobacco and rice plantations, as skilled artisans in port cities, or soldiers along the frontier, generation after generation of African Americans struggled to create a world of their own in circumstances not of their own making. In a panoramic view that

stretches from the North to the Chesapeake Bay and Carolina lowcountry to the Mississippi Valley, Many Thousands Gone reveals the diverse forms that slavery and freedom assumed before cotton was king. We witness the transformation that occurred as the first generations of creole slaves--who worked alongside their owners, free blacks, and indentured whites--gave way to the plantation generations, whose back-breaking labor was the sole engine of their

society and whose physical and linguistic isolation sustained African traditions on American soil. As the nature of the slaves' labor changed with place and time, so did the relationship between slave and master, and between slave and society. In this fresh and vivid interpretation, Berlin demonstrates that the meaning of slavery and of race itself was continually renegotiated and redefined, as the nation lurched toward political and economic independence and

grappled with the Enlightenment ideals that had inspired its birth. **The Very Secret Diary** Lindhardt og Ringhof In this benchmark volume top scholars come together to present state-of-the-art research and pursue a more rigorous framework for understanding and studying the linkages between social and ecological systems. Contributors from a wide spectrum of disciplines, including archaeology, anthropology, geography, ecology, palaeo-science,

geology, sociology, and history, present and assess both the evolution of our thinking and current, state-of-the-art theory and research. Covering ancient through modern periods, they discuss the complex ways in which human culture, economy, and demographics interact with ecology and climate change. The World System and the Earth System is critical reading for all scholars and students working at the interface of nature and society. Contributors:

Perhaps the only postwar classical composer to invest avant-garde music with overt eroticism, Luc Ferrari (1929-2005) was one of France's leading composers of the twentieth century, relentlessly experimental while always preserving his keen sense of humor. Ferrari was a first-generation exponent of musique concrète, and made brilliant use of field recordings to develop sensual, proto-ambient narrative that he termed "anecdotal music" or "cinema for the ear."

Perhaps the most notorious instance of this approach was *Danses Organiques* (1973), for which Ferrari recorded the meeting and sexual encounter of two young women, cut with other ambient and music sound. In his final decades Ferrari was championed by David Grubbs (of *Gastr del Sol*), who brought his music to a postrock audience. *Almost Nothing* is the first publication on this composer. It alternates Jacqueline Caux's interviews with 14 "imaginary

autobiographies" by the composer, offering a lively account of new music's most revolutionary era.

Asking readers to imagine a history of Mexico narrated through the experiences of Africans and their descendants, this book offers a radical reconfiguration of Latin American history. Using ecclesiastical and inquisitorial records, Herman L. Bennett frames the history of Mexico around the private lives

and liberty that Catholicism engendered among enslaved Africans and free blacks, who became majority populations soon after the Spanish conquest. The resulting history of 17th-century Mexico brings forth tantalizing personal and family dramas, body politics, and stories of lost virtue and sullen honor. By focusing on these phenomena among peoples of African descent, rather than the conventional history of Mexico with the narrative of slavery to freedom

figured in, Colonial Blackness presents the colonial drama in all its untidy detail.

Foremost specialists in the field of cholinesterase-inhibiting insecticides have contributed to this volume, to provide an accurate assessment of the impacts of organophosphate and carbamate pesticides on non-target organisms, especially wildlife. The

increased scrutiny of pest control agents in recent years has resulted from several factors. These comprise the demands for environmental protection, the recognition of wildlife as a valuable and diminishing resource, and the realization that few wild habitats exist that pest control programs do not directly target or indirectly affect. In that context, the book brings together the scattered literature on the effects of anticholinesterase pesticides on wildlife and other non-target species.

The literature has long been dominated by research emanating from the drug industry and the military. The therapeutic aspects of cholinergically-active substances and their potential as chemical warfare agents has directed research in the field. Thus the measurement of cholinesterase activity as a biomarker to assess the impact on wildlife species is a relatively recent phenomenon.

Visual Soil Evaluation (VSE) provides land users and environmental authorities with the tools to assess soil quality for crop performance. This book describes the assessment of the various structural conditions of soil, especially after quality degradation such

as compaction, erosion or organic matter loss.

Covering a broad range of land types from abandoned peats to prime arable land, this useful handbook assesses yield potential across a range of scales. It also appraises the use of VSE in determining the potential of different land types for carbon storage, greenhouse gas emissions and nutrient leaching, and for diagnosing and rectifying erosion and compaction in soils.

 Understanding the origin and fate of hydrocarbons in the subsurface was the major endeavor of organic geochemists during the second half of the twentieth century. They succeeded to the point

where the deciphered interplaying of elements and processes paved the way for the revolutionary concept of the petroleum system, a unifying paradigm that plays an important role in decision making associated with oil and gas exploration. The chemistry and physics involved have been addressed in a quantitative way and integrated into the other aspects of petroleum geology, giving rise to the development of numerical basin modeling. This book has been designed to

offer an overview of different aspects of the geochemistry of fossil fuels, in particular the functioning of a petroleum system. In this respect, it can be viewed as a foundation for approaching basin modeling. This book will be of interest to a large audience including specialists in the field, nonspecialist professionals, and undergraduate and graduate students.

Every language with official status is included, as well as all those that

We see how, with the rapidly increasing uniformity of our culture as media's influence spreads, more languages have become extinct or are under threat of extinction. Filmatised in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Northup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and

pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he

was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US, on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is

thought that he struggled to cope with family life after being freed.

First published in 1988, this book provides an easily accessible handbook of knowledge about the languages of Ghana; their geographical distribution, their

relationships with each other, the social patterns of their use, and their structures. Besides the general introduction, it contains chapters on each of the individually recognised families of languages spoken in Ghana: Gur, Volta-Comoé, Gbe, Ga-Dangme, Central-Tongo and Mande. An additional chapter outlines the use of non-indigenous languages in the country.

This is an in-depth study

of the people of Bukhara and their relations with settled peoples and nomads, from Muscovy to China, and Iran to India. By using lesserknown, or hitherto untapped sources, it corrects long-held misapprehensions fostered by historians of hostile states and champions of the Timurid dynasty. Far from being afraid of their powerful Safawid and Mughal counterparts, the Uzbek rulers of Bukhara caused them much apprehension and even influenced their foreign policies. 'Abbas I

concluded a humiliating peace with Turkey because he wanted to recover Khurasan from 'Abdallah II, Akbar could not risk leaving Punjab

during 'Abdallah's reign, Safawid and Mughal attempts at conquering the khanate failed dismally. The book deals

fully with dynastic, internal and external problems, trade routes, coinage policies and the khans' attempts to encourage trade.
