India's Race with Destiny and China Roli Books

Experience suggests that trade liberalization has contributed substantially to the remarkable growth of industrialized countries. However, for various reasons many developing countries have not yet been able to integrate successfully into global markets and reap the growth-inducing and poverty-reducing benefits of trade. This book argues that while developing countries are heavily represented in the WTO - accounting for about four-fifths of its membership - there is still plenty of scope for the world trading system to work more effectively in their interests.

Ancient adventurers have often spoken of a mystical land of perfect harmony and eternal bliss nestled in the forbidding remoteness of the Tibetan

Plateau - the legendary Shangri La. No one has managed to pinpoint its exact location on a map. In the local belief system, Shangri La may well not be a place at all but rather the mental state of a pure and exalted body, speech and mind. Fascinated by this concept, the photographer and author Mahendra Singh set out on his quest. Most of it currently occupied by China, the Tibetan Plateau has been significantly distorted over time under state pressure. Therefore, the author traveled through some of the last surviving remnants of authentic Tibetan life found in the valleys of Ladakh and Spiti; often and justifiably referred to as 'Little Tibet'. He traveled through remote valleys, ventured across stark landscapes and visited the improbable green oases of human habitation, culture and religion, to bring together this comprehensive portrait of the region through his vivid photographs and meticulously researched text. This book aims to take the readers on a journey of discovery and reflection, and hopefully, a little further along the path to finding their own Shangri La.

The book written with a rich teaching experience of the author at National Law University and State University, attempts to critically analyse Indian High Court and Apex Court cases on the Law of Civil Procedure. It also evaluates the relation between statutory procedural law and case laws as subject. Most importantly, the book presents recent judgments of Supreme Court, particularly based on Post Amendment Acts of 1999 and 2002. Also, these cases have been analysed in addition to a critical examination of the radical and far reaching effect of the Code. This lucid and well-organised book is divided into five parts. Part I develops theoretical foundations of the readers on Civil Procedure Code. Part II demonstrates certain important issues on the (i) scope of jurisdiction of civil courts to entertain disputes, (ii) principles governing res sub judice, res judicata and foreign judgement, (iii) nature of powers exercised by civil courts in matters relating to place of suing, institution of suit, transfer of cases, withdrawal and compromise of suits, (iv) necessary conditions for first hearing, interim order, trial as well as special suits, (v) scope and ambit of law relating to pleadings, appearance and non-appearance of parties, discovery, inspection, production of documents, death, marriage, insolvency of parties, judgment and decrees. Part III explores various issues on appeals, reference, review and revision. In this part, an attempt has also been made to discuss different facets of law on first appeal, second appeals, appeals from orders, appeal by indigent persons, appeals to the Supreme Court. Part IV is devoted to discuss various principles on execution. Part V deals with miscellaneous issues on the Law of Civil Procedure and includes Appendix on the Law of Limitation. The book will prove useful to the students of LLB and LLM for their course study. Besides, the book will be of immense use to the professionals. Key Features • Written with case analysis method. • Contains an authoritative discussion on the complexity of the Second Appeal after its determination and re-determination since the British period. • Important Supreme Court and High Court decisions are examined and analysed critically.

Sustainable Transport Development Disha Publications

The local and global environmental impacts of transport are more apparent than ever before. Moving People provides an attention-grabbing introduction to the problems of transport and the development of sustainable alternatives, focusing on the often misunderstood issue of personal mobility, as opposed to freight. Re-assessing the value and importance of non-motorized transport the author raises questions about mobility in the face of climate change and energy security, particularly for the developing world. Featuring original case studies from across the globe, this book is essential for anyone studying or working in the area of environmental sustainability and transport policy.

The high growth performance of the Indian economy since the launch of economic reforms in the early 1990s has been much lauded. But how much of this growth has made its way to the poor? In a radical assessment of 'inclusive growth', this book probes the impact of neo-liberal policies on employment, poverty and inequality. It critiques the claim that market-friendly economic reform policies 'trickle down' to the poor and reduce poverty and deprivation. The author uses exhaustive data — from the formal and informal sectors — to create a profile of the aam aadmi. He advocates the need for a broad-based growth and development strategy that alone will address the many-sided social and economic inequalities in India. The volume will be useful to scholars and students of economics, development studies, labour studies, and sociology.

India started on a program of reforms, both in its external and internal aspects, sometime in the mid-eighties and going on into the nineties. While the increased exposure to world markets (â€˜globalizationâ€™) and relaxation of domestic controls has undoubtedly given a spurt to the GDP growth rate, its impact on poverty, inequality and employment have been controversial. This book examines in detail these aspects of post-reform India and discerns the changes and trends which these new developments have created. Providing an original analysis of unit-level data available from the quinquennial National Sample Surveys, the Annual Surveys of Industries and other basic data sources, the authors analyse and compare the results with other pieces of work in the literature. As well as describing the overall situation for India, the book highlights regional differences, and looks at the major industrial sectors such as agriculture, manufacturing and tertiary services. The important topic of labor market institutions - both for the formal or organized and the unorganized sectors - is considered and the possible adverse effect on employment growth of the regulatory labor framework is examined carefully. Since any reform of this framework must go hand in hand with better state intervention in the informal sector to have any chance of acceptance politically, some of the major initiatives in this area are critically explored. Overall, this book will be of great interest to development economists, labour economists and specialists in South Asian Studies.

Globalization, Labor Markets and Inequality in India Rama Publishers

As one of the major challenges of the 21st century, food security requires nations to maintain food production at appropriate levels, provide potable water, and at once, ensure access of people to such food and water. Food suppliers also need to ensure year-long supply of food at optimum price and of high quality, both for needy and for discerning customers. Food Security in Asia provides a comprehensive analysis of the critical dimensions of food security in various countries of Asia. It compellingly argues that food insecurity is a complex phenomenon that requires a comprehensive response encompassing, inter alia, increasing food production, expanding economic and social access to food, special access to food for disadvantaged groups and, most importantly, breaking down the gender-based barriers to accessing food. The book discusses the major governmental policies in relation to the communities' responses. While highlighting the pressure exerted by climate change and world population growth, it also propounds ideas that would help in making informed policy choices.

OPSC 25 Practice Sets General Studies Paper 1 Pre Examination 2021 NYU Press

It was hot at Padachina even for a summer day. In this village were many houses, but not a soul could be seen anywhere. The bazaar was full of shops and the lanes were lined with houses built either of brick or of mud. Every house was quiet. The shops were closed, and no one knew where the shopkeepers had gone. Even the street beggars were absent. The weavers wove no more. The merchants had no business. Philanthropic persons had nothing to give. Teachers closed their schools. Things had come to such a pass that children were even afraid to cry. The streets were empty. There were no bathers in the river. There were no human beings about the houses, no birds in the trees, no cattle in the pastures. Jackals and dogs morosely prowled in the graveyards and in the cremation grounds. One great house stood in this village. Its colossal pillars could be seen from a distance. But its doors were closed so tight that it was almost impossible for even a breath of air to enter. Within the house a man and his wife sat

deeply absorbed in thought. Mahendra Singh and his wife were face to face with famine. The year before the harvests had been below normal. So rice was expensive this year and people began to suffer. Then during the rainy season it rained plentifully. The villagers at first looked upon this as a special mercy of God. Cowherds sang in joy, and the wives of the peasants began to pester their husbands for silver ornaments. All of a sudden, God frowned again. Not a drop of rain fell during the remaining months of the season. The rice fields dried into heaps of straw. Here and there a few fields yielded poor crops, but government agents bought these up for the army. So people began to starve again. At first they lived on one meal a day. Soon, even that became scarce, and they began to go without any food at all. The crop was too scanty, but the government revenue collector sought to advance his personal prestige by increasing the land revenue by ten per cent. And in dire misery Bengal shed bitter tears. Beggars increased in such numbers that charity soon became the most difficult thing to practise. Then disease began to spread. Farmers sold their cattle and their ploughs and ate up the seed grain. Then they sold their homes and farms. For lack of food they soon took to eating leaves of trees, then grass and when the grass was gone they ate weeds. People of certain castes began to eat cats, dogs and rats.
