*Before the Storm* Washington, D.C. : American Psychological Association  
Translation of cognitive representations into written language is one of the most important processes in writing. This volume provides a long-awaited updated overview of the field. The contributors discuss each of the commonly used research methods for studying translation; theorize about the nature of the cognitive and language representations and cognitive/linguistic transformation mechanisms involved in translation during writing; and make the case that translation is a higher-order executive function that is fundamental to the writing process. The book also reviews the application of research to practice -- that is, the translation of the research findings in education and the work-world for individuals who interact with others using written language to communicate ideas. This volume provides a rich resource for student, theorists, and empirical researchers in cognitive psychology, linguistics, and education; and teachers and clinicians who can use the research in their work.

Bittersweet Within My Heart Routledge

The Absorbent Mind was Maria Montessori's most in-depth work on her educational theory, based on decades of scientific observation of children. Her view on children and their absorbent minds was a landmark departure from the educational model at the time. This book helped start a revolution in education. Since this book first appeared there have been both cognitive and neurological studies that have confirmed what Maria Montessori knew decades ago.

The Discovery of the Child Philip's  
The purpose of this book is to expound and defend the great powers of the child, and to help teachers to a new outlook which will change their task from drudgery to joy, from repression to collaboration with nature...the first two years of life are

the most important... So here begins a new path, wherein it will not be the professor who teaches the child, but the child who teaches the professor

The inspiration for the film starring Tilda Swinton and John C. Reilly, this resonant story of a mother's unsettling quest to understand her teenage son's deadly violence, her own ambivalence toward motherhood, and the explosive link between them remains terrifyingly prescient. Eva never really wanted to be a mother. And certainly not the mother of a boy who murdered seven of his fellow high school students, a cafeteria worker, and a much-adored teacher in a school shooting two days before his sixteenth birthday. Neither nature nor nurture exclusively shapes a child's character. But Eva was always uneasy with the sacrifices and social demotion of motherhood. Did her internalized dislike for her own son shape him into the killer he's become? How much is her fault? Now, two years later, it is time for her to come to terms with Kevin's horrific rampage, all in a series of startlingly direct correspondences with her estranged husband, Franklin. A piercing, unforgettable, and penetrating exploration of violence and responsibility, a book that the Boston Globe describes as "impossible to put down," is a stunning examination of how tragedy affects a town, a marriage, and a family.

Clio is Muse of history, her 'cosmetics' the adornments of rhetoric. Peter Wiseman's influential book, first published in 1979 and now for the first time in paperback, concerns the writing of history during the first century BCE, when Rome was in process of becoming the centre of the Greek, as much as her own, literary world. Historians, trained in the schools of rhetoric, prized elegant plausibility above the empirical objectivity we expect of them today. Legend and history intermingled; history and poetry overlapped. This study divides into three distinct parts. The first treats the problems that arise from reading first century history as if it were written by modern, non-rhetorical standards. The second examines the pseudo-history of the gens Claudia, fabricated during the first century and transmitted to us by Livy and Dionysius of Halicarnassus. The third discusses Catullus' dedication of his poetry to the historian Cornelius Nepos against the background of the two authors' common intellectual heritage. The book represents a significant contribution towards an appreciation of ancient historiography and Roman culture. History is viewed here as rhetoric, as myth-making, and as poetry.

Language is a system of communication in which grammatical structures function to express meaning in context. While all languages can achieve the same basic communicative ends, they each use different means to achieve them, particularly in the divergent ways that syntax, semantics and pragmatics interact across languages. This book looks in detail at how structure, meaning, and communicative function interact in human languages. Working within the framework of Role and Reference Grammar (RRG), Van Valin proposes a set of rules, called the 'linking algorithm', which relates

syntactic and semantic representations to each other, with discourse-pragmatics playing a role in the linking. Using this model, he discusses the full range of grammatical phenomena, including the structures of simple and complex sentences, verb and argument structure, voice, reflexivization and extraction restrictions. Clearly written and comprehensive, this book will be welcomed by all those working on the interface between syntax, semantics and pragmatics.
