**A Comprehensive Indonesian-
English Dictionary** Iad Press

This volume explores how linguistic theories inform the ways in which languages are described. Theories, as representations of linguistic categories, guide the field linguist to look for various phenomena without presupposing their necessary existence and provide the tools to account for various sets of data across different languages. A goal of linguistic description is to represent the full range of language structures for any

given language. The chapters in this book cover various sub-disciplines of linguistics including phonetics, phonology, morphology, syntax, semantics, language acquisition, and anthropological linguistics, drawing upon theoretical approaches such as prosodic Phonology, Enhancement theory, Distributed Morphology, Minimalist syntax, Lexical Functional Grammar, and Kinship theory. The languages described in this book include Australian languages (Pama-Nyungan and non-Pama-Nyungan), Romance languages as well as English. This volume will be of interest to researchers in both descriptive and theoretical linguistics.

Warlpiri Encyclopaedic Dictionary

Walter de Gruyter

"This dictionary is meant primarily as a

tool for English speakers who need to know Indonesian and who deal with Indonesian writings. The aim has thus been to give comprehensive coverage to forms a foreigner might run across in Indonesian readings, from this era or from the past, but excluding classical Malay literature, Much of the Indonesian written production (written and otherwise) contains slangy, colloquial, and regional forms, and we have not excluded such forms. On the other hand we have confined the listing of dialectical forms only to those likely to be widely known...The dictionary should also be useful to Indonesians who wish to learn English equivalents of Indonesian words, but it has not been developed primarily for that purpose, because many English words can only be

defined by a sequence of Indonesian words." from Introduction.

The book considers Australian First Nations constitutionalism by drawing on the chthonic constitutional traditions of three distinct Australian First Nations legal orders: the Warlpiri, Yolngu, and Pintupi legal orders, in the endeavour of identifying, via a comparative analysis, a

core of similarities to be drawn upon and articulate an emergent legal theory common to the three legal orders. The comparative analysis is undertaken at the most foundational levels of their legal traditions, via the prism of a legal paradigm elaborated with reference to an Australian Indigenous cosmological, ontological, and epistemological standpoint. The proposed legal theory comprises a broad overview, general concepts, normative principles, and general working principles. In so doing, the book expounds how Australian First Nations constitutionalism unfolds into holistic orders of spiritual, political, and legal authority that are explainable in terms of legal theory. At the most foundational level, such elaboration may help delineate normative and legal

constitutional patterns throughout Indigenous Australia.

Introducing Semantics Cornell University Press

This volume reviews a range of fascinating linguistic facts about ingestive predicates in the world's languages. The highly multifaceted nature of 'eat' and 'drink' events gives rise to interesting clausal properties of these predicates, such as the atypicality of transitive constructions involving 'eat' and 'drink' in some languages. The two verbs are also sources for a large number of figurative uses across languages with meanings such as 'destroy', and 'savour', as well as participating in a great variety of idioms which can be quite opaque semantically. Grammaticalized extensions of these

predicates also occur, such as the quantificational use of Hausa shaa 'drink' meaning (roughly) 'do X frequently, regularly'. Specialists discuss details of the use of these verbs in a variety of languages and language families: Australian languages, Papuan languages, Athapaskan languages, Japanese, Korean, Hausa, Amharic, Hindi-Urdu, and Marathi.

Warlpiri-English Dictionary Routledge

This book, addressed primarily to students and researchers in semantics, cognitive linguistics, English, and Australian languages, is a comparative study of the polysemy patterns displayed by percussion/impact ('hitting') verbs in English and Warlpiri (Pama-Nyungan, Central Australia). The opening chapters develop a novel theoretical orientation for the study of polysemy via a close examination of two theoretical traditions under the broader cognitivist umbrella: Langackerian and Lakovian Cognitive Semantics and Wierzbickian Natural Semantic Metalanguage. Arguments are offered which problematize attempts in these traditions to ground the analysis of meaning either in cognitive or

neurological reality, or in the existence of universal synonymy relations within the lexicon. Instead, an interpretative rather than a scientific construal of linguistic theorizing is sketched, in the context of a close examination of certain key issues in the contemporary study of polysemy such as sense individuation, the role of reference in linguistic categorization, and the demarcation between metaphor and metonymy. The later chapters present a detailed typology of the polysemous senses of English and Warlpiri percussion/impact (or P/I) verbs based on a diachronically deep corpus of dictionary citations from Middle to contemporary English, and on a large corpus of Warlpiri citations. Limited to the operations of metaphor and of three categories of metonymy,

this typology posits just four types of basic relation between extended and core meanings. As a result, the phenomenon of polysemy and semantic extension emerges as amenable to strikingly concise description.

Australia is home to many distinctive species of birds, and Aboriginal peoples have developed close alliances with them over the millennia of their custodianship of this country. *Aboriginal Peoples and Birds in Australia: Historical and Cultural Relationships* provides a review of the broad physical, historical and cultural relationships that Aboriginal people have had with the Australian avifauna. This book aims to raise awareness of the alternative bodies of

ornithological knowledge that reside outside of Western science. It describes the role of birds as totemic ancestors and spirit beings, and explores Aboriginal bird nomenclature, foraging techniques and the use of avian materials to make food, medicine and artefacts. Through a historical perspective, this book examines the gaps between knowledge systems of Indigenous peoples and Western science, to encourage greater collaboration and acknowledgment in the future. Cultural sensitivity Readers are warned that there may be words, descriptions and terms used in this book that are culturally sensitive, and which might not normally be used in certain public or community contexts. While this information may not reflect current

understanding, it is provided by the author in a historical context. This publication may also contain quotations, terms and annotations that reflect the historical attitude of the original author or that of the period in which the item was written, and may be considered inappropriate today. Aboriginal and Torres Strait Islander peoples are advised that this publication may contain the names and images of people who have passed away.

It is spoken in the central west of Australia's Northern Territory, in semi-desert country of spinifex sand plains and dunes and low rocky rises and ridges, with ephemeral lakes and watercourses. Some 300 Warlpiri speakers contributed language examples and explanations that feature in the dictionary entries. They reflect the dialect variation found across the large Warlpiri-speaking area. The Warlpiri Encyclopaedic Dictionary has been more than 60 years in the making. With entries for more than 11,000 words, it is the largest Australian Indigenous language dictionary ever compiled. Each entry is a window into Warlpiri country and the Warlpiri world. The detailed

cultural and language information is added to with 16 pages of colour photographs, comprehensive maps and line illustrations, a Warlpiri grammar and an English index to the Warlpiri words.

Batak Toba/English Dictionary and Phrasebook Iad Press

As an ethnography of Central Australian singing traditions and ceremonial

contexts, this book asks questions about the vitality of the cultural knowledge and practices highly valued by Warlpiri people and fundamental to their cultural heritage. Set against a discussion of the contemporary vitality of Aboriginal musical traditions in Australia and embedded in the historical background of this region, the book lays out the features of Warlpiri songs and ceremonies, and centers on a focal case study of the Warlpiri Kurdiji ceremony to illustrate the modes in which core cultural themes are being passed on through song to future generations.
