Porsche Book Chartwell Books
The Triumph 350cc and 500cc unit-

construction twins were called the 'C' Series, and were made between 1957 and 1974. The range started with the 350cc 'Twenty-one' - a sedate touring bike with full enclosure in the form of the famous Triumph 'Bathtub' - went through such famous names as the Speed Twin, Tiger 100 and Trophy, and ended with the rip-roaring Daytona and the off-road Adventurer. This book deals with the whole range, giving the history of all the models, and also describes the restoration of a 1969 Trophy T100C. Triumph Tuning Crowood Press UK 164 pages, 92 black & white illustrations, size 5.5 x 8.5 inches. Originally published under the title The Book of the Royal Enfield by W.C. Haycraft, this book is one of The Motorcyclist's Library series published in the USA by Floyd Clymer by

arrangement with the original publishers Pitman Ltd. of London, England. It includes complete technical data, service and maintenance information and detailed instructions for the repair and overhaul of the major mechanical and electrical components for all Royal Enfield 250cc, 350cc and 500cc single cylinder G, J, J2, Bullet and Clipper models manufactured from 1946 through 1962. There is adequate detailed text and diagrams to assist in major refurbishing such as an engine rebuild or even a complete renovation. Please note that the 1957-1962 unit-construction "Crusader" type models are not covered in this publication. Information for that series of motorcycles is included in the "Second Book of the Royal Enfield" also available

from www.VelocePress.com. This publication has been Out-of-print and unavailable for many years and is becoming increasingly more difficult to find on the secondary market and we are pleased to be able to offer this reproduction as a service to all Royal Enfield motorcycle enthusiasts worldwide.

The Kawasaki Story Redline Books

The BMW racing story is a fascinating tale of persistence and reward. Though initially unsuccessful in competition, the flat-twin-powered BMW motorcycle was steadily developed until it became a machine to be reckoned with. In 1939 the ultimate was achieved when Georg Meir won the Senior TT. After the War, BMW maintained a high profile on the Grand Prix scene winning no fewer than

nineteen world titles from the mid-1950s to the mid-1970s in sidecar racing. But BMW: The Racing Story covers much more, including the American scene, the K-series four-cylinder, the four valve twins of the early 1990s and, finally, the great successes gained by the F650-based single in the European and British Supermono series.

For almost half a century the Bristol-

based Douglas marque was a stalwart of the British motorcycle industry, and was famed for its flat-twin engines. Douglas: The Complete Story is a detailed account of the motorcycles from the Douglas company from 1907 until 1957. The author delves deep into the design, production and use of these classic British bikes.

328 pages, 186 black & white illustrations, size 5.5 x 8.5 inches. This is a faithful reproduction of the 1962 Floyd Clymer U.S.A. Edition of the same title. While the primary focus of this publication utilizes 1960's and prior motorcycles as examples, the reader is reminded that engineering theory and the laws of physics do not change and as such, the information it contains is still

relevant today. Consequently, this publication is indispensable to those either contemplating modification to a current model or the construction of a 'special' for any form of motorcycle competition. Predominantly a technical work, it is written in terms easily understood by the layman. While it includes geometry and math formulae the reader will be aptly rewarded if they take a moment to comprehend the significance of the examples. Consequently, 'Motorcycle Engineering' is considered by many knowledgeable motorcycle enthusiasts to be the best book ever written on how to construct, improve, modify and fine tune a motorcycle from the 'ground up'. It is our pleasure to offer this reprint to all motorcycle enthusiasts worldwide.

The BSA range of unit construction singles was in production for fifteen years, and spanned the time of BSA's greatest success, to the eventual failure

of the company. In that time, the range provided BSA with their basic 'bread and butter' machines, gave thousands of learners an introduction to motorcycling, provided BSA with many national and world championship wins in the off road arena, mobilized the British Army and gave trail riders the world over the means to further their hobby. This illustrated history of the BSA unit singles runs from the 250cc ohv single cylinder C15 Star of 1958 to the B50 of 1971 and includes all the Triumph-badge derivatives. Matthew Vale provides not only the history but much practical advice relating to the purchase, restoration and maintenance of these machines.

The firm of Royal Enfield was one of the best-known names of the British motorcycle industry, but curiously its products have never received the adulation bestowed on the products of Triumph, BSA and others. In this complete history, top motorcycle authority Mick Walker shows that there

was, in fact, much for the Redditch-based firm to be proud of, in the shape of good-looking, innovative machines that inspired a generation. And what other company can boast a model still in popular production sixty years after its launch? Topics covered include: ,Complete history of Royal Enfield, including Enfield India, Numerous specifications, Royal Enfields in competition About the Author: Mick Walker started his own business, Mick Walker Motorcycles, in 1969 and was a leading race sponsor during the 1970s. In 1994 he formed Mick Walker Racing, following the death of his son Gary at Brands Hatch that year. The team has achieved no fewer than five British Championship wins.
