Vor dem Hintergrund des digitalen Wandels haben sich auch die Markt- und Wettbewerbsbedingungen der Beratungsunternehmen verändert. Eine Branche, deren Wurzeln zumeist bei Technikern und Tüftlern zu suchen sind, steht vor der Herausforderung, unter den veränderten Rahmenbedingungen erfolgversprechende und schlüssige Marketing-Konzepte zu entwickeln. Das Buch verfolgt das Ziel, ein

Vorgehensmodell für den Vermarktungsprozess von Beratungsleistungen zu entwerfen. Es liefert eine phasenbezogene Darstellung der Vermarktung, die dem Management von Unternehmensberatungen Ansatzpunkte bietet, um die einzelnen Elemente der Marketing-Gleichung zu optimieren.

This book examines the life and work of Ajit Singh (1940-2015), a leading radical post-Keynesian applied economist who made major contributions to the policy-oriented study of both developed and developing economies, and was a key figure in the life and evolution of the Cambridge Faculty of Economics. Unorthodox, outspoken, and invariably rigorous, Ajit Singh made highly significant contributions to industrial economics, corporate governance and finance, and stock markets - developing empirically sound refutations of

neoclassical tenets. He was much respected for his challenges both to orthodox economics, and to the one-size-fits-all free-market policy prescriptions of the Bretton Woods institutions in relation to late-industrialising developing economies. Throughout his career, Ajit remained an analyst and apostle of State-enabled accelerated industrialisation as the key to transformative development in the post-colonial Global South. The author traces Ajit Singh's radical perspectives to their roots in the early post-colonial nationalist societal aspirations for self-determination and autonomous and rapid egalitarian development - whether in his native Punjab, India, or the third world - and further explores the nuanced interface between Ajit's simultaneous

affinity, seemingly paradoxical, both with socialism and Sikhism. This intellectual biography will appeal to students and researchers in Development Economics, History of Economic Thought, Development Studies, and Post-Keynesian Economics, as well as to policy makers and development practitioners in the fields of industrialisation, development and finance within the strategic framework of contemporary globalisation.

Women maintain the fabric of Central Asian societies, but they come under increasing pressure. There is a widespread re-traditionalization of gender roles taking place, and women's status in public life is continuously decreasing. With a foreword by the

former President of the Kyrgyz Republic, Mme. Roza Otunbayeva, this book sheds light on some of the issues behind the gender statistics and legal implementation challenges commonly known in the West, using a wide variety of methodological approaches and combining scholarly interest with an activist stance. This qualitative approach is the only suitable way of understanding the nature of the issues arising in the pivotal region of Central Asia. Time and timelessness are fundamental principles of psychoanalysis yet Freud

does not present a consolidated theory of temporality. In this book Kelly Noel-Smith pieces together Freud's scattered 'hints' and 'suspicions' about time and its negative, timelessness. She traces a careful temporal trail through Freud's published works and his daunting Nachlass, and provides a compelling reason as to why Freud kept his remarkable thoughts about time to himself.

**John Quincy Adams** Readhowyouwant Whether it is called enlightenment, pure presence, or "unconditioned awareness," there exists an awakened state of true liberation that is at the heart of every contemplative tradition. Yet according to Peter Fenner, this experience of boundless consciousness does not have to exist separately from

your day-to-day "conditioned" existence. Rather, you can learn to live as a unique individual at the same time as you rest in a unified expanse of oneness with all existence - in a state he calls "Radiant Mind." Students in the West often feel frustrated in trying to follow the Eastern path to awakening, confused by seemingly vague or counter-intuitive teachings. Peter Fenner created the Radiant Mind practice to help you break through the obstacles that are often challenging for practitioners in our culture. "As extraordinary as unconditioned awareness may sound," teaches Peter Fenner, "it isn't distant from our everyday life; it's always readily available to us." With Radiant Mind, this master teacher crystallizes the contemplative wisdom of the East into

an eminently accessible guide for living a life "suffused with pure bliss."

Marketing und Vertrieb sind entscheidende Faktoren einer erfolgreich operierenden Unternehmenseinheit – wenn auch das Branding, also eine solide Marke, in vielen Fällen die Initialzündung für spätere Aufträge sein kann. Dirk Lippold zeigt in diesem essential auf, wie das Marketing mit seiner Denkhaltung dem Unternehmen und sich selber nicht nur helfen, sondern auch entscheidende Impulse verleihen kann. Rückenwind und eine frische Perspektive gibt dabei die Anwendung der Marketing-Gleichung als zukunftsweisendes Denk- und Handlungskonzept im B2B-Sektor.

Max Weber's Sociology of Religion BoD – Books on Demand

The European social sciences tend to absorb criticism that has been passed on the European approach and re-label it as a part of what the critique opposes; criticism of European social sciences by “subaltern” social sciences, their “talking back”, has become a frequent line of reflection in European social sciences. The re-labelling of the critique of the European approach to social sciences towards a critique from “Southern” social sciences of “Western” social sciences has somehow turned “Southern” as well as “Western” social sciences into competing contributors to the same “globalizing” social sciences.

Both are no longer arguing about the European approach to social sciences but about which social thought from which part of the globe prevails. If the critique becomes a part of what it opposes, one might conclude that the European social sciences are very adaptable and capable of learning. One might, however, also raise the question whether there is anything wrong with the criticism of the European social sciences; or, for that matter, whether there is anything wrong with the European social sciences themselves. The contributions in this book discuss these questions from different angles: They revisit the mainstream critique of the European social sciences, and they suggest new arguments criticizing social science theories that may be found as

often in the “Western” as in the “Southern” discourse.

*Artificial Intelligence* Springer-Verlag  
This book presents the early existential phenomenology of Martin Heidegger as a way to reformulate academic disability studies and activist disability politics. It redresses the almost categorical neglect of human difference in the philosophy of Heidegger. It proceeds by applying a revised version of his phenomenology to social policy aimed to get disabled persons to work and to methods in rehabilitation science intended to be more ‘client friendly’. Phenomenological philosophy is extended to the topic of disability, while, at the same time, two key concerns facing disability studies are addressed: the roles of capitalism in disablement, and of medical practice in

the lives of disabled persons. By reframing disability as a lived way of being in the world, rather than bodily malfunction, the book asks how we might rethink medicine and capitalism in democratic ways. It aims to transform Heidegger’s work in light of his troubling politics to produce a democratic social theory of human difference.

Media influenced politics, culture, and everyday life long before the invention of the Internet. This book shows how the advent of new media has changed societies in modern history, focusing not on the specifics of technology but rather on their distribution, use, and impact. Using Germany as an example for

international trends, it compares the advent of printing in Europe and East Asia, and the impact of the press on revolutions, nation building, and wars in North America and Europe. The rise of tabloids and film is discussed as an international phenomenon, as the importance of media during National Socialism is looked at in comparison with Fascist Italy and Spain. Finally, this book offers a precise analysis of media during the Cold War, with divided Germany providing the central case study.

Freud on Time and Timelessness Mohr

In the past, the European social sciences labelled and discredited knowledge that

did not follow the definition for scientific knowledge as applied by the European social sciences as an alternative concept of knowledge, as “indigenous” knowledge. Perception has changed with time: Not only has indigenous knowledge become an entrance ticket to the European social science world, but the indigenization of European theories is seen by some as the contribution of “peripheral” social sciences to join the theories of the “centers”. This book offers contributions to the discourses about alternative concepts of knowledge, inviting the reader to decide if they are alternative, indigenous, or European types of knowledge. However, in order to make this decision, the reader must know what the nature of the European concepts of science and of

scientific knowledge is; this might be a motivation to read a book that presents thoughts claiming to be alternative concepts of knowledge, alternative to the European concept of science. *Marktorientierte Unternehmensführung und Digitalisierung* Berghahn Books Ob bei der Vermarktung von Roh-, Hilfs- und Betriebsstoffen, technischen Anlagen, Ersatzteilen, Werkzeugmaschinen, Produktkomponenten, Telekommunikationseinrichtungen, Schiffen, Software oder Beratungsleistungen, Marketing und Vertrieb zählen zu den wichtigsten, aber auch teuersten Erfolgsfaktoren im B2B-Geschäft. Diese Erkenntnis und zugleich auch die Tatsache, dass vier von fünf B2B-Unternehmen heute bereits

signifikante Umsätze mit dem Online-Vertrieb erzielen, stellen viele Unternehmen im B2B-Bereich vor zunehmend große Herausforderungen. Gleichzeitig bieten sich damit eine Reihe neuer Perspektiven für eine reibungslose Zusammenarbeit auf der Vermarktungsseite. Marketing und Vertrieb obliegen somit die spannende Aufgabe, die effiziente Gestaltung der

Vertriebskanäle vorzunehmen und die besonderen Herausforderungen des E-Commerce umzusetzen. Der Autor zeigt auf, wie angesichts der neuen Rahmenbedingungen Marketing und Vertrieb sich auf Augenhöhe begegnen und zum Wohl des Gesamtunternehmens einen effizienteren Vermarktungsprozess gemeinsam erarbeiten können.
