Class-tested and coherent, this textbook teaches classical and

web information retrieval, including web search and the related

areas of text classification and text clustering from basic

concepts. It gives an up-to-date treatment of all aspects of the

design and implementation of systems for gathering, indexing,

and searching documents; methods for evaluating systems; and

an introduction to the use of machine learning methods on text

collections. All the important ideas are explained using examples

and figures, making it perfect for introductory courses in information retrieval for advanced undergraduates and graduate students in computer science. Based on feedback from extensive classroom experience, the book has been carefully structured in order to make teaching more natural and effective. Slides and additional exercises (with solutions for lecturers) are also available through the book's supporting website to help course instructors prepare their lectures.

Case and Comment Bloomsbury Publishing USA

Considers the establishment of an International Development Association to provide long-term loans partially repayable in local currencies; to make maximum use of foreign currencies available to U.S. through sale of agricultural supplies; and to provide funds necessary for economic development through multilateral association.

What is the relationship between health and learning vis-à-vis theory, research, and practice? The purpose of this book is to examine the critical, historical, and contemporary linkages between health and learning, to review the best practices, and to make resources available for practitioners. Walsh and Murphy review current and historical efforts to provide health services to school children and youth. A list of print and nonprint resources for professionals, parents, and school administrators is provided.

Campus Power Struggle traces the explosive evolution of the student political movement from the Berkeley Free Speech Movement of 1964 to armed confrontation at Cornell in 1969. From campus conflict as a microcosm of larger political struggles for self-determination, to student concern about infringements upon personal liberties, the studies in this book provide authoritative insight into unrest on American campuses. This volume represents sociology as the "big news" in its most impressive and involved style. No.1 in the series. Contents: Introduction - The Struggle for Power on the Campus (Howard S. Becker). Beyond Berkeley (Joseph Gusfield). Columbia: The Dynamics of a Student Revolution (Ellen Kay Tnmberger). The Crisis at San Francisco State (James McEvoy and Abraham Miller). Confrontation at Cornell (William H. Fried/and and Harry Edwards'). The Phantom Racist (Rita James Simon and James Carey). Dynamic Young Fogies-Rebels on the Right (Lawrence F. Schiff). Ending Campus Drug Incidents (Howard S. Becker). The Psychiatrist as Double Agent (Thomas Szasz). Student Power in Action (Arlie Hochschild).
