Women and
Work provides
an analysis of
the issue of

workplace
inequality.
Among the
topics
discussed are
women's
participation
in the

workplace, the continuing disparity in wages, the impact of new technologies, free trade and economic restructuring, and the involvement of women in the labour movement. This revised edition amplifies the authors' findings that little has improved in women's working conditions and prospects. *A History of European Women's Work* Polity Extrait de la couverture : "All around

the world, women work. Yet the work they do has always been, and continues to be, considered as less important than that performed by men. In many cases women's activities are not even acknowledged as work. Not only do women encounter more obstacles than men in education and training, but they are over-represented amongst the lowest paid, part-time workforce,

enjoying few employment rights. Recognition of this has led to adoption of measures over the past two decades to eliminate gender discrimination and to promote equality of opportunity and treatment for women workers. This book is a contribution to the efforts being made, mainly by women themselves, to ensure that these initiatives are implemented. The author

draws together research on gender, work and development, and emphasises that the concept of work should include not only paid labour but all of those activities which contribute to production and development."

Division of Labor

Routledge Provides a survey and critique of the research material concerned with the sexual division of labour. The

result is an account of how women's lives have changed over the last 250 years. Harriet Bradley draws on her own research, and addresses issues of gender, work and inequality.

Routledge Women's Work

Global Women's Work

University of Illinois Press What is the place of women in global labour policies? 'Women's ILO: Transnational Networks,

Global Labour Standards, and Gender Equity, 1919 to Present' gathers new research on a century of ILO engagement with women's work. It asks: what was the role of women's networks in shaping ILO policies and what were the gendered meanings of international labour law in a world of uneven and unequal development? Intersectional, transnational, and interdisciplinary, Women's ILO explores

gendered dynamics on issues like equal remuneration, home-based labour, and social welfare and practices in places like Argentina, Italy, Ghana, and internationally , expanding the boundaries of feminism, charting the disparate advancement of gender equity, and highlighting the significant role of women experts and activists in these processes. *Indigenous Women and Work* SAGE Publications Pvt. Limited "By analyzing the process of work in both the electrical and the automobile industries, the supplies of male and female labor available to each, the varying degrees of labor-intensive work, the proportion of labor costs to total costs, and the extent of male resistance to female entry into the industry before, during, and after the war, Milkman offers a historically grounded and detailed examination of the evolution, function, and reproduction of job segregation by sex." -- Journal of American History "Analytic sophistication is coupled with a powerfully rendered narrative: the reader strides briskly along, enjoying one provocative insight after another while simultaneously absorbed by the drama of the events." --

Women's Review of Books
Men's Work, Women's Work
 Women's Work
 Work
 challenges influential accounts about gender and the novel by revealing the complex ways in which labour, informed the lives and writing of a number of middling and genteel women authors publishing between 1750 and 1830. This book provides a particularly rich, yet largely neglected, seam of texts for exploring the vexed relationship between gender, work and writing. The four chapters that follow contain thoroughly contextualized case studies of the treatment of manual, intellectual and domestic labour in the work and careers of Sarah Scott, Charlotte Smith, Mary Wollstonecraft and Women and Work. This book presents an original and groundbreaking approach to gender inequality. Looking at women's power in the home, in the workplace, and in politics from a political economy perspective, the authors demonstrate that equality is tied to demand for women's labor outside the home, which is a function of structural, political, and institutional conditions.-- [book jacket].
Technology and Gender
 Springer
 What is the

relationship between women's reproductive bodies and women's productive work? How does women's potential for maternity affect women's workplace opportunity? How far can women 'choose' and maintain their own embodied boundaries in relation to work and working practices? This fascinating and topical book evaluates the growing debate on

gender, women's bodies, and work. Through the lens of the body - and from a feminist perspective - Gatrell considers women's work from two angles, the first conceptualizing the labour of maternity as women's work, the second exploring the dynamics between women's bodies and employment. The author suggests that maternity constitutes women's

work, with some women 'expected' to produce children, while others are criticised for giving birth. She calls for the re-conceptualization of pregnancy, birth and breastfeeding as forms of labour - asserting that mothers are required to perform particular forms of body work in order to comply with ideals of 'good' mothering and norms of the workplace. The book observes that

these are conflicting requirements, which place irreconcilable demands on women and constrain women's choice. At the heart of *Embodying Women's Work* is the idea that women's bodies are central to gendered power relations, and remain a negotiated site of power between men and women within late modern society. The book considers women's

bodies in the context of different forms of paid work, discussing how far women remain at an economic disadvantage in comparison with male workers. *Embodying Women's Work* is of key interest for students and academics of sociology, social welfare and women's studies. *Women's Work Mapping Social Reproduction Theory* In this fundamental reassessment

of women's experience of work in eighteenth-century England, Bridget Hill examines how and to what extent industrialization improved the overall position of women and the opportunities open to them. Focusing on the most important unit of production, the household, Dr Hill examines women's work, not only in "housework" but also in agriculture and

manufacturing , and reveals what women lost as the household's independence as a unit of economic production was undermined. Considering the whole range of activities in which women were involved, the increasing sexual division of labour is charted and its implications highlighted. The final part of the book considers how the changing nature of women's work influenced courtship,

marriage and relations between the sexes. *Women's work* Praeger `This is a beautifully conceived and revealing book. Joan Sangster lucidly explores and explains an astonishing array of complex material to reveal how women in the post-war period became full-fledged members of the labour force. Transforming labour offers such a rich variety of

anecdotal evidence that it will benefit students of women's work from all over the world.' Alice Kessler-Harris, author of *In Pursuit of Equity: Women, Men and the Quest for Economic Citizenship in 20th-Century America*
Women's Work, Men's Work Zed Books
This book is a provocative analysis of the nature of the relation between women and paid work in both modernizing and industrial

countries. It explores the variables that shape the relationship: demographic factors, the social and cultural context, and the direction of economic development. Zed Books "Global Women's Work: Perspectives on Gender and Work in the Global Economy considers how women are shaping the global economic landscape through their labour, activism, and multiple

discourses about work. Bringing together an interdisciplinary group of international scholars, the book offers a gendered examination of work in the global economy and analyses the effects of the 2008 downturn on women's labour force participation and workplace activism. The book addresses three key themes: exploitation versus opportunity; women's agency within

the context of changing economic options; and women's negotiations and re-negotiations of unpaid social reproductive labour. This uniquely interdisciplinary and comparative analysis will be crucial reading for anyone with an interest in gender and the post-crisis world."-- Provided by publisher. **Women and Work** University of Illinois Press Britain and America were

the first two countries with mechanised cotton manufacturing industries, the first major factory systems of production and the first major employers of women outside of the domestic environment. The combination of being new wage earners in the first trans-national industry and their public prominence as workers makes these women's role as employees significant; they set the

early standard for women as waged labour, to which later female workers were compared. This book analyses how women workers influenced patterns of industrial organization and offers a new perspective on relationships between gender and work and on industrial development. The primary theme of the study is the attempt to control the work process through co-operation,

coercion and conflict between women workers, their male counterparts and manufacturers . Drawing upon examples of women's subversive activities and attitudes toward the discourses of labour, the book emphasizes the variety of women's work experiences. By using this diversity of experience in a comparative way, the book reaches conclusions that challenge

a variety of historical concepts, including separate spheres of influence for men and women and related economic theories, for example that women were passive players in the workplace, evolutionary theories with respect to industrial development, and business culture within and between the two industries. Overall it provides the fresh approach that highlights and

explains women's agency as operatives and paid workers during industrialization. *Women and Work* Routledge The essays in *Indigenous Women and Work* create a transnational and comparative dialogue on the history of the productive and reproductive lives and circumstances of Indigenous women from the late nineteenth century to the present in the

United States, Australia, New Zealand/Aotearoa, and Canada. Surveying the spectrum of Indigenous women's lives and circumstances as workers, both waged and unwaged, the contributors offer varied perspectives on the ways women's work has contributed to the survival of communities in the face of ongoing tensions between assimilation and colonization. They also

interpret how individual nations have conceived of Indigenous women as workers and, in turn, convert these assumptions and definitions into policy and practice. The essays address the intersection of Indigenous, women's, and labor history, but will also be useful to contemporary policy makers, tribal activists, and Native American women's advocacy associations. Contributors are Tracey Banivanua	Mar, Marlene Brant Castellano, Cathleen D. Cahill, Brenda J. Child, Sherry Farrell Racette, Chris Friday, Aroha Harris, Faye HeavyShield, Heather A. Piatote, Susan Roy, Lynette Russell, Joan Sangster, Ruth Taylor, and Carol Williams.	<u>Women's ILO</u> McGraw-Hill Education (UK) Extrait de la couverture : "This vibrant assemblage on women's work and economic development draws on original fieldwork by an international group of authors. Leacock and Safa focus on a common theme - that it is necessary to examine the division of labor by sex in order to understand the underlying structure of gender and of
---	--	--

women's status. The nontechnical style, the breadth of coverage, and the emphasis on first-hand materials will prompt future research and contribute a thought-provoking teaching tool to courses in women's Studies, Women's Work, and Economic Development.

A Labour of Love

Routledge
Ruth Milkman's groundbreaking research in women's labor history has

contributed important perspectives on work and unionism in the United States. On Gender, Labor, and Inequality presents four decades of Milkman's essential writings, tracing the parallel evolutions of her ideas and the field she helped define. Milkman's introduction frames a career-spanning scholarly project: her interrogation of historical and contemporary

intersections of class and gender inequalities in the workplace, and the efforts to challenge those inequalities. Early chapters focus on her pioneering work on women's labor during the Great Depression and the World War II years. In the book's second half, Milkman turns to the past fifty years, a period that saw a dramatic decline in gender inequality even as growing class

imbalances created greater-than-ever class disparity among women. She concludes with a previously unpublished essay comparing the impact of the Great Depression and the Great Recession on women workers.

Women, Work and Islamism

Routledge
A new book offering a broad overview of the debates about technologies and gender

relations at work in a range of occupational areas. Innovative in its approach it deals with gender relations in terms of the ways in which they influence the design and development of technologies, and how gender relations are themselves shaped by technologies. The book will draw heavily on the theoretical perspective looking at the ways in which sexual

divisions of labour and gender relations in the workplace profoundly affect the direction and pace of technological change, and tracks the development of certain technologies showing how, through their evolution, they embody these social relations.

Key Issues in Women's Work

Routledge
Unmasking Administrative Evil discusses the overlooked relationship between evil

and public affairs, as well as other fields and professions in public life.

Women's Work in East and West: The Dual Burden of Employment and Family Life

HarperCollins
What are the realities of 'community care' - the unpaid care given by hundreds of thousands of women, often in their own homes - for children and adults who are handicapped or chronically sick, or for frail elderly

people?
Originally published in 1983, this book explores the experiences of such women and the dilemmas which 'caring' poses for them. At a time when most women needed to earn money from a paid job, how did 'carers' manage to juggle their caring and other domestic responsibilities, and what happened if they had to give up work? Against a background of

government policies which favour care 'by' the community, the contributors to this book raise crucial issues for social and economic policy. Hilary Graham examines what caring really means and Clare Ungerson asks why women do it. Sally Baldwin and Caroline Glendinning focus on mothers with handicapped children and Fay Wright on single adults with elderly dependants. Alan Walker

highlights the dependencies implicit in caring relationships with the elderly. Lesley Rimmer looks at the economic 'costs' of care, and Dulcie Groves and Janet Finch examine the invalid care allowance – a carers' benefit for which married women can never qualify. In exploring the domestic sector of welfare, A Labour of Love was a highly topical contribution to the debate both on

welfare provision and on the division of labour between men and women at the time. EBOOK: Embodying Women's Work Routledge Based on original research into women's participation in the workforce, this book is the most up-to-date study of women in Iran available. The Islamisation of state and society which followed the 1979 revolution involved an attempt by

the Islamic state to seclude women within the home. However, the power of the state was constrained by many factors - the Iran-Iraq war, economic restructuring - and women's own responses to oppression. In spite of continual attempts by the state to strengthen patriarchal relationships, women's participation in the labour force in 1999 is greater than it was before the revolution. Women's

participation in both the economy and in political movements has led to a much greater level of gender consciousness in the 1990s than at the height of westernisation in the 1960s and 70s.	Religious and secular women in urban areas have demanded reforms and forced the Islamic state to return to the position of the pre 1979 reforms. Providing a history of Iran, an	introduction to Islamism and an analysis of the women and Islam debate, this book will be necessary reading for students and academics of Middle East studies, women's studies and labour studies.
