& Sons

This survey aims to help countries
review and develop policies to make the
teaching profession more attractive and
more effective.

**Creating Effective Teaching and
Learning Environments: First
Results from TALIS** Routledge

Double-shift schooling primarily aims to
extend access and minimize unit costs.
However, some systems only achieve
those goals at the expense of
educational quality. Policy-makers may
be faced by difficult choices when
designing systems. This book highlights
the advantages and problems of double-
shift systems.

Handbook of the Circular Economy
Rizzoli International Publications

This open access book identifies the
multiple ways that IEA's studies of civic
and citizenship education have

contributed to national and international educational discourse, research, policymaking, and practice. The IEA International Civic and Citizenship Education Study (ICCS), first conducted in 2009, was followed by a second cycle in 2016. The project was linked to the earlier IEA Civic Education Study (CIVED 1999, 2000). IEA's ICCS remains the only large-scale international study dedicated to formal and informal civic and citizenship education in school. It continues to make substantial contributions to understanding the nature of the acquired civic knowledge, attitudes, and participatory skills. It also discusses in-depth how a wide range of countries prepare their young people for citizenship in changing political, social, and economic circumstances. The next

cycle of ICCS is planned for 2022. In this book, more than 20 national representatives and international scholars from Europe, Latin America, Asia, and North America assess how the processes and findings of the 2009 and 2016 cycles of ICCS and CIVED 1999/2000 have been used to improve nations' understanding of their students' civic knowledge, beliefs, attitudes, current civic-related behaviors, and intentions for future participation in a comparative context. There are also chapters summarizing the secondary analysis of those studies' results indicating their usefulness for educational improvement and reflecting on policy issues. The analyses and reflections in this book provide timely insight into international educational

discourse, policy, practice, and research in an area of education that is becoming increasingly important for many societies.

Education of an Architect Graphic Communications Group

Illustrates the differences and similarities between modernist and postmodernist theories of literacy, and suggests how the best elements of both can be fused to provide a more rigorous conception of literacy that will bring theoretical, ethical, political, and practical benefits. Some of the 14 essays are theoretical, other present case studies of literacy programs for adults and other applications. Annotation copyright by Book News, Inc., Portland, OR
Dropping Out from School World Bank Publications

Provides critical evidenced based assessments and tools with which to investigate the role of rights abrogation in the health of populations.

African linguistics on the prairie Springer
Per references (a) through (g), this T&R Manual establishes training standards, regulations and practices regarding the training of Marines and sailors whose primary mission is logistics.

Reality Therapy Taylor & Francis

In 1985 the federal government funded two 5-year centres to conduct research on effective schools. Student Engagement and Achievement in American Secondary Schools presents the findings of one of these studies, as carried out by the National Center of Effective Secondary Schools located at the University of Wisconsin-Madison.

Editor Fred M. Newmann and the other contributors to this study examine existing research, detail their own findings, and propose concrete strategies for improving students' achievement in secondary schools.

To All Who Call in Truth Springer

This book provides a comparative look at key issues that characterize and contextualize upper secondary science education in sixteen countries in Oceania, South America, Asia, Europe, North America, Africa, and the Middle East, including links with elementary and early science, final assessment, and the secondary/tertiary education interface.

Literacy Teacher Educators Graphic Communications Group

This crucial Handbook brings together the latest thinking on the circular

economy, an area that has increasingly caught global attention. Contributors explore a broad range of themes such as recycling systems and new business models, as well as consolidating the many ways in which the topic has been dealt with in research, business and policy-making. The Handbook of the Circular Economy is not only relevant, but also essential for students, academics, and policy-makers trying to make sense of the plethora of ways in which the term has been applied and interpreted.

Negotiating Critical Literacies with Teachers Theories of Psychotherapy Series
Nobody denies that trust in schools is key to success in generating any educational outcomes. However, trust is often eroded, resulting in conflicts,

alienation, and differentiation among school-level stakeholders. This book analyses school-based management (SBM) of education through the lens of relational trust in the context of Ghana, revealing how community participation in school management leads to educational outcomes. Conducting quantitative analysis of headteacher questionnaires from public basic schools and qualitative analysis of case study schools in the Akatsi South District of Ghana, Shibuya offers critical insights into building sustainable relationships between individual households and geographical/school communities. He argues it is critical to highlight relational trust as an analytical tool to examine relationships between actors and factors in school management. The research

finds that trust in schools is a two-way mechanism, and the mutuality of expectations and obligations among stakeholders is essential if children's learning outcomes are to improve. With its mixed-methods approach, this book will be a valuable resource for scholars in comparative education, those in educational development, and those interested in African contexts.

Public Health and Human Rights Hoover Inst Press Publication

Sandy Cooper lives an uneventful life as a guidance counselor and coach in a suburban junior high school. Uneventful, that is, until a word of advice to a troubled student embroils him in a forbidden relationship and the exposure of a twisted murder. In this compulsively readable novel reminiscent of Philip

Roth's *American Pastoral*, Michael Oren evokes a time of racial, political, and social turmoil in the 1970s.

Shadow Education Routledge

The passage of *Citizens United* by the Supreme Court in 2010 sparked a renewed debate about campaign spending by large political action committees, or Super PACs. Its ruling said that it is okay for corporations and labor unions to spend as much as they want in advertising and other methods to convince people to vote for or against a candidate. This book provides a wide range of opinions on the issue. Includes primary and secondary sources from a variety of perspectives; eyewitnesses, scientific journals, government officials, and many others.

Constructions of the Irish Child in

1910-1940 World Bank Publications

Shows projects developed by the students and faculty of the Irwin S. Chanin School of Architecture

The Art of Manliness Greenhaven Publishing LLC

This book makes recommendations for how Ghana can mainstream youth issues in its development strategies, providing baseline evaluations of socio-economic issues that particularly affect the youth demographic, such as underemployment, a lack of access to quality education and poverty.

Smashing UX Design Bloomsbury Publishing

Leading schools is becoming almost daily a more complex and demanding job. *Connecting Leadership and Learning*

reassesses the purpose of schools, the nature of learning and the qualities of leadership that make schools authentic places of learning. Starting with a review of what we can claim to know – and not know – about learning, leadership and their inter-relationship, this book explores what it means to lead schools that place learning at the centre. Drawing on research from seven different country projects - including the United States, Australia and five European countries – the authors offer five key principles for practice: a focus of learning an environment for learning a learning dialogue shared leadership accountability; internal and external. These key principles have been tested by teachers, senior leaders and school students and found to be applicable

across cultural and linguistic boundaries. The challenges faced by in inner city schools, whether in London or New Jersey, prove a stern test for the five principles yet, as these schools testify, they bring a new sense of hope and resolve that learning is for everyone. Based on rigorous research yet thoroughly grounded in practice, this book aims to challenge the reader with big ideas about learning and leadership, and to break new ground in thinking about where leadership and learning meet so that practitioners can see how it works in school and classroom practice. It should be of interest to all school leaders and those aspiring to the role.

Mixed Methods Research Edward Elgar Publishing
This volume discusses the Poverty

Reduction Strategy (GPRS I) and the Growth and Poverty Reduction Strategy (GPRS II) that addressed the critical poverty issues in Ghana. GPRS I is a comprehensive policy document prepared as a precondition for Ghana under the Highly Indebted Poor Country (HIPC) Initiative. The main component—human development—targets improvement for Ghana’s population to access basic needs and essential services. A general assessment shows that Ghana has a positive and significantly stabilized macroeconomic environment.

Critical Literacy World Bank Publications
 Man up and discover the practical and inspirational information all men should know! While it’s definitely more than just monster trucks, grilling, and six-pack

abs, true manliness is hard to define. The words macho and manly are not synonymous. Taking lessons from classic gentlemen such as Benjamin Franklin and Theodore Roosevelt, authors Brett and Kate McKay have created a collection of the most useful advice every man needs to know to live life to its full potential. This book contains a wealth of information that ranges from survival skills to social skills to advice on how to improve your character. Whether you are braving the wilds with your friends, courting your girlfriend, or raising a family, inside you’ll find practical information and inspiration for every area of life. You’ll learn the basics all modern men should know, including how to: -Shave like your grandpa -Be a perfect houseguest -Fight like a

gentleman using the art of bartitsu -Help a friend with a problem -Give a man hug -Perform a fireman's carry -Ask for a woman's hand in marriage -Raise resilient kids -Predict the weather like a frontiersman -Start a fire without matches -Give a dynamic speech -Live a well-balanced life So jump in today and gain the skills and knowledge you need to be a real man in the 21st century.

The Politics of Education in Developing Countries Language Science Press

Materials and Methods in ELT, Second Edition offers a comprehensive and practical introduction to central themes in the principles and practice of Teaching English as a Foreign/Second Language. Offers a comprehensive and practical introduction to central themes in the principles and practice of Teaching

English as a Foreign/Second Language. Features a number of new sections, including task-based learning, the use of the internet, and teacher-research, as well as new samples from current teaching materials. Includes an appendix with a selected list of key websites for teachers and students. This second edition has been completely revised and updated.

Community Participation in School Management Anchor Books

In this book, Mertens provides a brief history of the emergence of mixed methods research and numerous examples to illustrate its application in different disciplines and geographic areas. Mixed methods approaches offer researchers an exciting opportunity to explore new combinations of methods in

diverse contexts: the design possibilities are endless and can be incorporated in many different approaches. The book presents case studies to illustrate different philosophical lenses for mixed methods design, including post-positivism, constructivism, pragmatism, transformative, Indigenous, and dialectical pluralism. The book features interviews with researchers about their experiences and practices. They discuss a variety of topics including innovative research design, use of technology and big data, preparation of mixed methods researchers, and how this research can contribute to a more just and equitable future.

Double-shift Schooling OECD

Inequity is the central challenge facing

basic education in Ghana and undercuts the potential contribution of basic education to Ghana's national development goals. Persistent disparities in education service delivery and inequitable allocation of resources in Ghana lead to highly inequitable educational outcomes. These inequities negatively affect system quality, efficiency and accountability and ultimately undermine broader national development. Wide-spread inequity in education service delivery significantly depresses system learning outcomes. This report describes a "missing middle" in terms of learning outcomes: While a small number of children perform well, the majority of pupils (more than 60%) pass through primary school without becoming proficient in numeracy and

literacy. Specifically, children from Ghana's northern regions and deprived districts, poor and rural households and ethnic and linguistic minorities – students who require the most support to meet learning outcomes – receive, on average, disproportionately fewer resources from the government than their peers. Systemic inequities create this missing middle and drag down system performance. Following a decade of rapid change, as of 2013, more children are attending basic and senior high schools than at any time in the history of Ghana. In the past decade, Ghana has realized great growth, progress and change. Population growth, urbanization and significant GDP growth have changed the economic, political and social landscape of Ghana. In the

past decade, incidence of extreme poverty has been cut in half. Introduction of Free, Compulsory, Universal Basic Education (FCUBE) and kindergarten has supported a near doubling of basic education enrollment in the past 15 years. Delivering basic education and ensuring equity has become more challenging. Compared to a decade ago, more stakeholders are involved in allocating and managing core education inputs and accountability systems remain unclear and weak. Addressing the deeply embedded inequities (e.g. allocation of trained teachers, support to deprived districts and populations) is further complicated by a complex and fragmented policy, management and financing environment. The persistence of inequity

reflects the persistence of conflicting sector interests and poses genuine policy dilemmas. However, recent experience shows that accelerating progress toward equity and quality basic education for all is possible. Several recent initiatives in Ghana point to the possibility of improving equitable resource allocation, strengthening social protection and providing additional

support to improve learning outcomes. For example, children with below-average learning outcomes in poorly resourced environments are likely to show measurable gains when provided additional support (e.g. instructional support, learning resources, management support, demand-side incentives).
