The Princeton Review realizes that acing the TOEFL is very different from getting straight A's in school. We don't try to teach you everything there is to know about English-only what you'll need to score higher on the exam. There's a big difference. In Cracking the TOEFL, we'll teach you how to think like the test writers and -Eliminate answer choices that look right but are planted to fool you -Ace the Structure and Writing sections by remembering a few basic grammar rules -Use vocal emphasis cues to master Listening questions -Use Process of Elimination to score higher on Sentence Completion and Error Identification questions This book includes a full-length practice TOEFL exam, plus an audio CD with Listening exercises and a full transcript. The questions and exercises are like the ones you'll see on the actual TOEFL. We also give book buyers online access to full-length simulated TOEFL exams, complete with instant score reporting and answer explanations.

English Language Proficiency Assessments for Young Learners Genta Group Production
Research on how stakeholders interpret language test scores and how they make decisions about language proficiency is critical because score-based decisions can be extremely consequential for test takers, score users, such as educational institutions and employers, and the society overall. This edited volume is intended as a primary resource for language assessment researchers, developers, and policy makers interested in efficiently communicating score information related to language proficiency. Its nine chapters report on complicated, often behind-the-scenes research efforts to enhance the interpretation of English language test scores developed by ETS, by employing diverse methodologies such as vertical linking, score mapping, standard setting, scale anchoring, and score concordance. In a post-pandemic era full of challenges and change in the field of language assessment, this volume highlights the ethical responsibility of test providers to engage in sometimes challenging research and development efforts to better serve score users.
