First published in 1997 to commemorate the fiftieth anniversary of the creation of Pakistan, the book features a review of films before Partition, plots of great cinema classics, trivia, and cinema lore.

It contains anecdotes and reminiscences about the people who shaped the entertainment industry, as well as interviews with directors and producers. But alongside the trivia is a clever synthesis juxtaposing the artistic development of the cinematic world with the overall social development in the country. It shows how the narrow self-interest of the ruling clique clashed with the creative potential of the artistic world, stifling originality and all but destroying the film industry. The narrative is punctuated with over a hundred photographs and contains an index of all the films made to date. In this second edition of Mushtaq Gazdar's seminal work, I. A. Rehman, Haris Gazdar, and Aisha Gazdar provide an overview of the two decades since,

marking seventy years of the country's film industry. The filmography has also been updated to include the last two decades.

The Book of the Ten Masters is the record of the teachers of the Sikhs. The history of human civilization took a new turn when the Sikh Gurus appeared on the scene of Medieval India. The Sikh movement served as a light-house for the people groping in the dark. They were then changed men and elevated to the stage of the ideal man i.e. Gurmukh.

"Aristotle classified the things in the world into ten categories: substance, quantity, quality, relation, etcetera. Plotinus, the founder of Neoplatonism, attacked the classification, accepting only the first four categories, rejecting the other six, and adding one of his own: change. He preferred Plato's classification into five kinds, including change. In this part of his commentary, Simplicius records the controversy on the six categories rejected by Plotinus: acting, being acted upon, being in a

position, when, where, and having on. Plotinus' pupil and editor, Porphyry, defended all six categories as applicable to the physical world, even if not to the world of Platonic Forms to which Platonist studies must eventually progress. Porphyry's pupil, Iamblichus, went further: taken in a suitable sense, Aristotle's categories apply also to the world of Forms, although they require Pythagorean reinterpretation. Simplicius may be closer to Porphyry than to Iamblichus, and indeed Porphyry's defense established Aristotle's categories once and for all in Western thought. But the controversy of this period nonetheless revealed more effectively than any modern discussion the profound difficulties in Aristotle's categorial scheme."--Jacket.

This book presents a feminist mapping of the articulation and suppression of female desire in Hindi films, which comprise one of modern India's most popular cultural narratives. It explores the lineament of evil and the corresponding closure of chastisement or domesticity that appear as necessary conditions for the representation of subversive female desire. The term 'bad' is used heuristically, and not as a moral or essential category, to examine some of the iconic disruptive women of Hindi cinema and to uncover the nexus between patriarchy and other hierarchies, such as class, caste and religion in these representations. The twenty-one essays examine the politics of female desire/s from the 1930s to the

present day - both through in-depth analyses of single films and by tracing the typologies in multiple films. The essays are divided into five sections indicating the various gendered desires and rebellions that patriarchal society seeks to police, silence and domesticate. Hemkunt Press

Beginning in the 1930s, men and a  
 handful of women came from India's  
 many communities-Marathi, Parsi, Goan,  
 North Indian, and many others--to  
 Mumbai to work in an industry that  
 constituted in the words of some, "the  
 original fusion music." They worked as  
 composers, arrangers, assistants, and  
 studio performers in one of the most  
 distinctive popular music and popular  
 film cultures on the planet. Today, the  
 songs played by Mumbai's studio  
 musicians are known throughout India  
 and the Indian diaspora under the  
 popular name "Bollywood," but the  
 musicians themselves remain, in their  
 own words, "behind the curtain"--the

anonymous and unseen performers of one of the world's most celebrated popular music genres. Now, Gregory D. Booth offers a compelling account of the Bollywood film music industry from the perspective of the musicians who both experienced and shaped its history. In a rare insider's look at the process of musical production from the late 1940s to the mid 1990s, before the advent of digital recording technologies, Booth explains who these unknown musicians were and how they came to join the film music industry. On the basis of a fascinating set of first-hand accounts from the musicians themselves, he reveals how the day-to-day circumstances of technology and finance shaped both the songs and the careers of their creator and performers. Booth

also unfolds the technological, cultural, and industrial developments that led to the enormous studio orchestras of the 1960s-90s as well as the factors which ultimately led to their demise in contemporary India. Featuring an extensive companion website with video interviews with the musicians themselves, *Behind the Curtain* is a powerful, ground-level view of this globally important music industry.
