Women run wind

tunnel experiments,
direct air traffic, and
fabricate airplanes.
American women have
been involved with
flight from the
beginning, but until
1940, most people
believed women could
not fly, that Amelia
Earhart was an
exception to the rule.
World War II changed
everything. "It is on the
record that women can
fly as well as men,"

stated General Henry H. Arnold, commanding general of the Army Air Forces. The question became "Should women fly?" Deborah G. Douglas tells the story of this ongoing debate and its impact on American history. From Jackie Cochran, whose perseverance led to the formation of the Women's Army Service Pilots (WASP) during World War II to the recent achievements of Jeannie Flynn, the Air Force's first woman fighter pilot and Eileen Collins, NASA's first woman shuttle commander, Douglas introduces a host of determined women who overcame prejudice and became military fliers, airline pilots, and air and space engineers. Not forgotten are stories of

flight attendants, air traffic controllers, and mechanics. American Women and Flight since 1940 is a revised and expanded edition of a Smithsonian National Air and Space Museum reference work. Long considered the single best reference work in the field, this new edition contains extensive new illustrations and a comprehensive bibliography.

In 1942, with war raging on two fronts and military pilots in short supply, the U.S.

Army Air Force enlisted a handful of skilled female aviators to deliver military planes from factories to air bases--expanding the successful program to include more than one thousand women.

These superb pilots flew every aircraft in the U.S. Army Air Force--including B-26s when men were afraid to--logging more than six million miles in all kinds of weather. yet when World War II ended, their wartime heroism was left unheralded. In 1961, with the dawn of the space age, a handful of top female pilots took part in a new program termed "Women in Space." Subjected to the same rigorous tests as the Mercury astronauts, thirteen women--top-notch pilots--were admitted

to the program. Once again women had reason to dream...that at least one of them would be the first of their sex in space. The matter went as far as Congress, where dramatic hearings included testimony from astronauts John Glenn and Scott Carpenter. But their hopes were dashed. These skilled aviators had the "right stuff" at the wrong time, and again women were denied their place in history. This is their story, one of courage, ferocity, and patriotism.

"A beautiful and inspiring book...fascinatingly told." — Donna Shirley, former head of the U.S. Mars program, NASA

The exhilarating story of the first women who boldly conquered the skies in the first female cross-country air race. The year is 1929, and on the eve of America's Great Depression, nineteen gutsy and passionate pilots soared above the glass ceiling in the very first female cross-country air race. Armed with grit and determination, they crossed thousands of miles in propeller-driven airplanes to defy the naysayers who would say it cannot — not should not — be done. From the indomitable Pancho Barnes to the infamous Amelia Earhart, *Sky Girls*

chronicles a defining and previously forgotten moment when some of the first women pilots took their rightful place in the open skies. For a country on the brink of defining change, they would become symbols of hope, daring, and the unstoppable American spirit. And for generations to come, their actions would pave the way for others to step into the brave unknown and learn to fly... Written by female pilot and member of the original Mercury 13 Gene Nora Jessen, *Sky Girls* celebrates the strength and smarts of these trailblazing women, and sits perfectly on the shelf next to *The Radium Girls*, *Hidden Figures*, or *Code Girls*. **Amelia Earhart Free in the Skies** Da Capo
