## KARTER TRISTIN

---

*Subject Catalog* Random House Digital, Inc. This is the first of five ambitious volumes theorizing the structure of governance above and below the central state. This book is written for those interested in the character, causes, and consequences of governance within the state and for social scientists who take measurement seriously. The book sets out a measure of regional authority for 81 countries in North America, Europe, Latin America, Asia, and the Pacific from 1950 to 2010. Subnational authority is exercised by individual regions, and this measure is the first that takes individual regions as the unit of analysis. On the premise that transparency is a fundamental virtue in measurement, the authors chart a new path in laying out their theoretical, conceptual, and scoring decisions before the reader. The book also provides summaries of regional

governance in 81 countries for scholars and students alike. Transformations in Governance is a major new academic book series from Oxford University Press. It is designed to accommodate the impressive growth of research in comparative politics, international relations, public policy, federalism, environmental and urban studies concerned with the dispersion of authority from central states up to supranational institutions, down to subnational governments, and side-ways to public-private networks. It brings together work that significantly advances our understanding of the organization, causes, and consequences of multilevel and complex governance. The series is selective, containing annually a small number of books of exceptionally high quality by leading and emerging scholars. The series targets mainly single-authored or co-authored work, but it is pluralistic in terms of disciplinary specialization, research design, method, and geographical scope. Case studies as well as

comparative studies, historical as well as contemporary studies, and studies with a national, regional, or international focus are all central to its aims. Authors use qualitative, quantitative, formal modeling, or mixed methods. A trade mark of the books is that they combine scholarly rigour with readable prose and an attractive production style. The series is edited by Liesbet Hooghe and Gary Marks of the University of North Carolina, Chapel Hill, and the VU Amsterdam, and Walter Mattli of the University of Oxford. *Alto Adige, South Tyrol* Italian Trade Commission The classic reference work that provides annually updated information on the countries of the world. **National Union Catalog** Rowman & Littlefield The classic reference work that provides annually updated information on the countries of the world. **The Statesman's Year-Book 1971-72** Edizioni Nuova Cultura The classic reference work that provides annually updated information on the countries of the world. **Austrian Information**

University Press

Offering a novel contribution within the growing field of regional innovation policies, this book combines recent theoretical developments and empirical contributions, with a particular focus on non-core regions. Leading academics in the field discuss the topics of regional path transformation, place-based strategies and policy learning. Also included are sections on the role of EU institutions on the promotion of regional innovation and the analysis and comparison of the innovation policies experiences of four non-core European regions.

Heritage stones are building and ornamental stones that have special significance in human culture. The papers in this volume discuss a wide variety of such materials, including stones from Europe, Asia, North and South America, Africa and Australia. Igneous (basalt, porphyry, granite), sedimentary (sandstone, limestone) and metamorphic (marble, quartzite, gneiss,

soapstone, slate) stones are featured. These have been utilized over long periods of time for a wide range of uses contributing to the historic fabric of the built environment. Many of these stones are of international significance, and so are potential Global Heritage Stone Resources, that is stones that have the requisite qualities for international recognition by the Heritage Stones Subcommittee of the International Union of Geological Sciences. The papers bring together diverse information on these stones ranging from their geological setting and quarry locations to mechanical properties, current availability, and uses over time. As such the papers can serve as an entry into the literature on these important stones.

Autonomy and the Protection of Ethnic Minorities in Trentino-South Tyrol Oskar Peterlini

The autonomous province of South Tyrol in Northern Italy is generally considered to be one of the most successful examples for the solution of ethnic conflicts. This book gives an analysis of the evolution of the legal instruments and

institutions of self-government and minority protection through power-sharing as well as of the experience gathered during decades of the implementation of a "working economy." It thus provides insights regarding the state and the evolution of this specific case as well as for the general tendencies in the development of territorial autonomy and minority protection.

"One Country, Two Systems, Three Legal Orders" - Perspectives of Evolution - : Essays on Macau's Autonomy after the Resumption of Sovereignty by China" can be said, in a short preamble-like manner, to be a book that provides a comprehensive look at several issues regarding public law that arise from,

or correlate with, the Chinese apex motto for reunification - One Country, Two Systems - and its implementation in Macau and Hong Kong. Noble and contemporary themes such as autonomy models and fundamental rights are thoroughly approached, with a multilayered analysis encompassing both Western and Chinese views, and an extensive comparative law *acquis* is also brought forward. Furthermore, relevant issues on international law, criminal law, and historical and comparative evolutions and interactions of different legal systems are laid down in this panoramic, yet comprehensive book. One cannot but underline the presence, in the many approaches and comments, of a certain aura of a modern Kantian cosmopolitanism revisitation throughout the work, especially when dealing with the cardinal principle of «One Country, Two Systems», which enabled a peaceful and integral reunification *ex vi* international law - the Joint Declarations - that ended an external and distant control. *Italy today 2004. ### **The Rise of Regional Authority**

Walter de Gruyter GmbH & Co KG

This book sets out to try to understand why segregated schooling still exists, especially in northern Italy in South Tyrol where they practice 'separate but equal' education. Supported by the UN, the Austrian and Italian governments, the province is considered a 'peace model' due to its consociational approach to dealing with the region's Nazi and Fascist past, which has led to a 'negative peace'. The autonomy statutes, which derived from this 'peace', resulted in an education system that is linguistically segregated for the purposes of protecting South Tyrol's ethnolinguistic minorities. Broken into two parts, the book begins with the background history of the province, before describing the region's geographical layout, demographics, local identity, and its three-part schooling system. By examining responses to South Tyrol's education system, and its impact on local group dynamics, this

book explores the implications that segregated schooling may have on second language acquisition. This case study will be of interest to students and scholars of Italian studies, anthropology, linguistic ethnography, sociolinguistics, and second language education.

The strength of secessionism in liberal-democracies varies in time and space. Inspired by historical institutionalism, Nationalism, Secessionism, and

Autonomy argues that such variation is explained by the extent to which autonomy evolves in time. If autonomy adjusts to the changing identity, interests, and circumstances of an internal national community, nationalism is much less likely to be strongly secessionist than if autonomy is a final, unchangeable settlement. Developing a controlled comparison of, on the one hand, Catalonia and Scotland, where autonomy has been mostly static during key periods of time, and, on the other hand, Flanders and South Tyrol, where it has been dynamic, and also considering the Basque Country, Québec, and Puerto Rico as additional cases, this book puts forward an elegant theory of secessionism in liberal-democracies: dynamic autonomy staves off secessionism while static autonomy stimulates it.

Benito Mussolini

(1883-1945) was the founder of Fascism and iron-fisted ruler of Italy for two decades. He was also an extremely able politician who won the esteem of many

statesmen—including Winston Churchill and influential persons in the United States. This biography describes Mussolini's childhood; his education (including his suspension from school for attacking other boys with knives); his World War I experiences and severe wounding; his involvement in, and eventual expulsion from the revolutionary Italian Socialist Party; his numerous love affairs, his early career as a journalist and his rise to power and brutal rule.

– Books on Demand Italian Constitutional Justice in Global Context is the first book ever published in English to provide an international examination of the Italian Constitutional Court (ItCC), offering a comprehensive analysis of its principal lines of jurisprudence, historical origins, organization, procedures, and its current engagement with transnational European law. The ItCC represents one of the strongest and most successful examples of constitutional judicial review, and is distinctive in its structure, institutional dimensions, and well-developed jurisprudence. Moreover, the ItCC has developed a distinctive voice among global constitutional actors in its adjudication of a broad range of topics

from fundamental rights and liberties to the allocations of governmental power and regionalism. Nevertheless, in global constitutional dialog, the voice of the ItCC has been almost entirely absent due to a relative lack of both English translations of its decisions and of focused scholarly commentary in English. This book describes the Italian Style in global constitutional adjudication, and aims to elevate Italian constitutional jurisprudence to an active participant role in global constitutional discourse. The authors have carefully structured the work to allow the ItCC's own voice to emerge. It presents broad syntheses of major areas of the Court's case law, provides excerpts from notable decisions in a narrative and analytical context, addresses the tension between the ItCC and the Court of Cassation, and positions the development, character, and importance of the ItCC's jurisprudence in the larger arc of global judicial dialog.
