ELVIS ASHLEY

World Fishing Springer Science & Business Media
 Radar and Electronic Navigation, Sixth Edition discusses radar in marine navigation, underwater navigational aids, direction finding, the Decca navigator system, and the Omega system. The book also describes the Loran system for position fixing, the navy navigation satellite system, and the global positioning system (GPS). It reviews the principles, operation, presentations, specifications, and uses of radar. It also describes GPS, a real time position-fixing system in three dimensions (longitude, latitude, altitude), plus velocity information with Universal Time Coordinated (UTC). It is accurate to

100 meters for general users and about 16 meters for U.S. and NATO users. GPS uses a constellation of 18 satellites encircling the Earth, and measures velocity by means of the Doppler effect. The book explains that GPS has three segments: the space segment, the control segment, and the user segment. The control segment has four monitoring stations while the user segment includes ground-based, marine, airborne or space platforms equipped with GPS devices. The book provides useful information for marine engineers, aviation designers, aeronautical engineers and operators, as well as other officers of sea-going vessels.
Shipping World and Shipbuilder Butterworth-Heinemann
 1 : Introduction, 2 : Underwater navigational aids, 3 : Direction finders, 4 : The consol system, 5 : The decca system,

6 : The loran system, 7 : The omega system, 8 : The navigation satellite system, 9 : radar, 10 : Integrated navigation systems - Symbols for radio and radar stations.
Undersea Technology Handbook, Directory Elsevier
 Attempts to provide a basis for the understanding of modern navigation systems and to bring the reader up to date with the latest developments in technology.
Seaway Review IMO Publishing
 1966-1973 include British shipbuilding compendium (1969-1970 called UK and overseas shipbuilding compendium; 1971, UK and overseas shipbuilding and marine compendium).
Oceans '96 MTS/IEEE Newnes

International Oilfield Publications, Incorporated
 CD-ROM contains all data from 25 years of meteorological measurements and observations on the research vessel Polarstern. Datasets are provided as tab-delimited ASCII text files organized in three zip archives. A search engine is included on the disc, as well as a PDF

version of the print report. To convert and compile output files from the archive the tool Pan2Applic is recommended and can be installed from the disc.
