A Speaker's Guidebook with The Essential Guide to Rhetoric Macmillan Higher Education

Writing for the spoken word is a special discipline; it requires that speechwriters' products be written primarily, although not exclusively, to be heard, not read. Speeches are better cast in simple, direct and often short sentences that can be easily understood by listeners. Rhetorical devices such as repetition, variation, cadence and balance are available to, and should be used by, the speechwriter. It is important for speechwriters to analyse audiences according to factors such as age; gender; culture; profession and income level; size of audience; political affiliation, if any; and on the occasion for, or purpose of, the speech. Most effective speeches do not exceed 20 minutes in length. After researching a topic, speechwriters must prepare an outline from which the speech will be developed. They should strive to maintain a clear theme throughout the speech. Most speeches will have a three-part structure consisting of an introduction, a body and a conclusion. The accepted style of contemporary American public address is natural, direct, low key, casual and conversational. This puts the listeners at ease and promotes a sense of community between the audience and speaker. Punctuation should reflect the sound structure of the speech, reinforcing the rhythm and pace of actual speech. Clarity of expression is as important a consideration in speech grammar as rigid

adherence to the rules for written law. This book presents the essentials of speechwriting. Preface; Speechwriting in Perspective: A Brief Guide to Effective and Persuasive Communication (Thomas H. Neale); Public Speaking and Speechwriting: Selected References (Jean M. Bowers); Index.

Painless Public Speaking Allyn & Bacon Based on Wardle and Downs' research, the first edition of *Writing about Writing* marked a milestone in the field of composition. By showing students how to draw on what they know in order to contribute to ongoing conversations about writing and literacy, it helped them transfer their writing-related skills from first-year composition to other courses and contexts. Now used by tens of thousands of students, *Writing about Writing* presents accessible writing studies research by authors such as Mike Rose, Deborah Brandt, John Swales, and Nancy Sommers, together with popular texts by authors such as Malcolm X and Anne

Lamott, and texts from student writers. Throughout the book, friendly explanations and scaffolded activities and questions help students connect to readings and develop knowledge about writing that they can use at work, in their everyday lives, and in college. The new edition builds on this success and refines the approach to make it even more teachable. The second edition includes more help for understanding the rhetorical situation and an exciting new chapter on multimodal composing. The print text is now integrated with e-Pages for Writing about Writing, designed to take advantage of what the Web can do. The conversation

on writing about writing continues on the authors' blog, *Write On: Notes on Writing about Writing* (a channel on Bedford Bits, the Bedford/St. Martin's blog for teachers of writing).
