*U. S. Postal Service* DIANE Publishing  
The Postal Service Retiree Health Benefits Fund (PSRHBF) covered about 49 percent

of the U.S. Postal Service's (USPS) \$94 billion retiree health benefit liability at fiscal year-end 2012. USPS's deteriorating financial outlook, however, will make it difficult to continue the current prefunding schedule in the short term, and possibly to fully fund the remaining \$48 billion unfunded liability over the remaining 44 years of the schedule on which the 2006 Postal Accountability and Enhancement Act (PAEA) was based. The liability covers the projected benefits for about 471,000 current postal retirees and a portion of the projected benefits for about 528,000

current employees; it does not cover employees not yet hired. Under PAEA, USPS is responsible for contributing an additional \$33.9 billion to the PSRHBF by fiscal year 2017, including the \$11.1 billion USPS has defaulted on over the past 2 years. PAEA also requires the Office of Personnel Management (OPM) to calculate the remaining unfunded liability in 2017 and develop an initial 40-year amortization payment schedule. USPS, however, projects further declines in mail volume and revenues that may continue to limit its ability to prefund the remaining retiree

health benefit liability. GAO's analysis of maintaining current law requirements compared to five alternative approaches showed differing impacts on USPS's future annual payments and unfunded liabilities. For example, three of the approaches--1) the Administration's Approach, 2) Senate Bill (S. 1789) and 3) "Pay-as-You-Go" (no prefunding)--would reduce USPS's annual payments in the short term, thereby easing its immediate cash flow problems and financial losses. However, these approaches would increase USPS's unfunded liability, sometimes substantially, and require larger payments later. Deferring funding could increase costs for future ratepayers and increase the possibility that USPS may not be able to pay for some or all of its liability. Conversely, a fourth approach--the House Bill (H.R. 2309)--and the current law requirement would reduce USPS's unfunded liabilities more aggressively but may result in significantly higher USPS financial losses in the near future. If USPS stopped prefunding and let the existing fund grow with interest, the unfunded liability is projected to significantly increase. Under a fifth approach, if USPS

stopped prefunding and used the existing fund to pay current and future premiums, the fund is projected to be exhausted by 2026. Private sector, state, local, and other federal entities are not required to prefund these benefits, though some do so to a limited extent, and most are required to recognize the future costs in their financial reporting. GAO identified several key considerations including: (1) the rationale and consequences of prefunding such benefits; (2) trade-offs affecting USPS's financial condition, such as sizes of the annual payments and unfunded liability; (3) fixed versus actuarially determined payments; (4) targeted funding levels; and (5) assumption criteria. USPS is intended to be a self-sustaining entity funded almost entirely by postal ratepayers, but its financial losses are challenging its sustainability. GAO has testified that USPS should prefund its retiree health benefit liabilities to the maximum extent that its finances permit, but none of the funding approaches may be viable unless USPS has the ability to make the payments. USPS's default on its last two required PSRHBF payments and its inability to borrow further make the

need for a comprehensive package of actions to achieve sustainable financial viability even more urgent.

Rediscovering Republicanism explores and explicates America's two key political

ideologies – founding-era American Republicanism and American Progressivism – and argues that American Republicanism rests on a sounder view of human nature and politics and offers the best path forward for renewing and reforming America's federal government today.

The book addresses the most recent challenges faced by the postal and delivery sector. This book includes original essays by prominent researchers and practitioners in the field of postal and delivery economics, originally presented at the 28th Conference on Postal and Delivery Economics held online, December 1-5, 2020. Chapters discuss topics such as the sustainability of the universal service obligations (USO) quality of service, last mile solutions, competition in liberalized markets, data protection, environmental sustainability, and the impact of the COVID-19 pandemic. This book will be a useful tool not only for graduate students and professors interested in postal and regulatory economics, but also for postal

administrations, consulting firms, and federal government departments.

The Postal Accountability and Enhancement Act of 2006 required an evaluation of strategies and options for reforms of the U.S. Postal Service (USPS). USPS's business model is to fulfill its mission through self-supporting, businesslike operations; however, USPS has experienced increasing difficulties. Due to volume declines, losses, a cash shortage, and rising debt, the USPS was added to a high-risk list in July 2009. The objectives of this report were to assess: (1) the viability of USPS's business model; (2) strategies and options to address challenges to its business model; and (3) actions Congress and USPS need to take to facilitate progress toward financial viability. Includes recommendations. Charts and tables.

Grady E. Griffin knows all too well that the United States Postal Service is on the verge of financial collapse. It continues to lose billions of dollars per year, and it has reached its maximum federal borrowing limit of \$15 billion. Meanwhile, total liabilities are approaching \$100 billion. Griffin, who worked for the Postal Service in numerous roles, proposes common-sense solutions to the Postal Service's most pressing problems. These solutions

and other fixes are popular among working-level employees, but many managers, union officials, labor specialists, contract compliance officials, advocates for grievances, and arbitrators who make a living off interpreting complicated contracts continue to oppose them for selfish reasons. Tens of thousands of jobs are at stake, and a valuable service that the public relies on could be eliminated forever unless stakeholders overhaul the Postal Service.

Senate Reports Nos. 408-428 Lulu.com Worldwide, postal operators have been slow to address the threats from and opportunities created by electronic competition. The European Commission and member states are wrestling with these issues, while at the same time continuing to deal with the interrelated issues of implementing entry into postal markets and maintaining the universal service obligation. The Postal Accountability and Enhancement Act of 2006 in the U.S. exacerbated financial and managerial problems faced by USPS that result in part from electronic substitution for letter delivery. A major aim of this book is to examine policies to address postal

operations in a digital world and ways in which postal operators might reinvent themselves to respond to threats and exploit opportunities. Potential opportunities examined include parcels, e-commerce, digital delivery, regulatory innovations and pricing. This book will be of interest to postal operators, regulatory commissions, consulting firms, competitors and customers, experts in the postal economics, law, and business, and those charged with the responsibility for designing and implementing postal sector policies. Researchers in regulatory economics, transportation technology and industrial organization will also find considerable food for thought in this volume.
