International  
Commerce Last Train  
to Hilversum  
Despite the all-  
pervading influence of  
television ninety per  
cent of people in  
Britain still listen to the  
radio, clocking up over  
a billion hours of  
listening between us  
every week. It's a  
background to all our  
lives: we wake up to  
our clock radios, we  
have the radio on in  
the kitchen as we  
make the tea, it's on at  
our workplaces and in  
our cars. From Listen  
With Mother to the  
illicit thrill of tuning  
into pirate stations like  
Radio Caroline; from  
receiving a musical  
education from John

Peel or having our  
imagination unlocked  
by Douglas Adams' The  
Hitchhiker's Guide to  
the Galaxy; from  
school-free summers  
played out against a  
soundtrack of Radio  
One and Test Match  
Special to more grown-  
up soundtracks of the  
Today programme on  
Radio 4 and the  
solemn, rhythmic  
intonation of the  
shipping forecast - in  
many ways, our lives  
can be measured in  
kilohertz. Yet radio is  
changing because the  
way we listen to the  
radio is changing. Last  
year the number of  
digital listeners at  
home exceeded the  
number of analogue  
listeners for the first  
time, meaning the pop  
and crackle and the  
age of stumbling upon  
something by chance is  
coming to an end.

There will soon be no dial to turn, no in-between spaces on the waveband for washes of static, mysterious beeps and faint, distant voices. The mystery will be gone: we'll always know exactly what it is we're listening to, whether it's via scrolling LCD on our digital radios, the box at the bottom of our TV screen or because we've gone in search of a particular streaming station. And so, as the world of analogue listening fades, Charlie Connelly takes stock of the history of radio and its place in our lives as one of the very few genuinely shared national experiences. He explores its geniuses, crackpots and charlatans who got us to where we are today, and remembers

its voices, personalities and programmes that helped to form who we are as individuals and as a nation. He visits the key radio locations from history, and looks at its vital role over the past century on both national and local levels. Part nostalgic eulogy, part social history, part travelogue, *Last Train To Hilversum* is Connelly's love letter to radio, exploring our relationship with the medium from its earliest days to the present in an attempt to recreate and revisit the world he entered on his childhood evenings on the dial as he set out on the radio journey of a lifetime. Bloomsbury Publishing  
The main thrust of this  
book is to acknowledge  
the technologies that  
the Bell-aerospace-  
company developed or  
refined. If certain  
programs incorporated  
technologies that were  
basically the same as  
other programs, then  
these same technology  
programs were not  
included in detail.
