Hair, or lack of it, is one the most significant identifiers of individuals in any society. In Antiquity, the power of hair to send a series of social messages was no different. This volume covers nearly a thousand years of history, from Archaic Greece to the end of the Roman Empire, concentrating on what is now Europe, North Africa, and the Near East. Among the key issues identified by its authors is the recognition that in any given society male and female hair tend to be opposites (when male hair is generally short, women's is long); that hair is a marker of age and stage of life (children and young

people have longer, less confined hairstyles; adult hair is far more controlled); hair can be used to identify the 'other' in terms of race and ethnicity but also those who stand outside social norms such as witches and mad women. The chapters in *A Cultural History of Hair in Antiquity* cover the following topics: religion and ritualized belief, self and society, fashion and adornment, production and practice, health and hygiene, gender and sexuality, race and ethnicity, class and social status, and cultural representations.

Wordplay involving several linguistic codes represents an important modality of ludic language. It is attested in different epochs, communicative situations, genres, and contexts of use. The translation of wordplay, which is generally seen as a challenging enterprise, illustrates another dimension of crossing linguistic borders in wordplay. The third volume of the series **The Dynamics of Wordplay** unites contributions from different disciplines which study the creative and playful use of

elements from different languages and the transfer of ludic language into other linguistic systems. It sheds light on the multi-dimensionality, special linguistic make-up, and specific interactive potential of wordplay at the interface of different languages and cultures. The individual studies collected in this volume will be of interest to scholars from different scientific fields, such as linguistics and literary studies as well as cultural and media studies.

If only she had stayed in school. If only she hadn't had a baby when she was so young. If only she had taken cosmetology classes back when she had the chance. If only, if only, if only. Jackie does not want to spend the rest of her life crying over what might have been. "You have a flair for hair," Taria tells her one day, after Jackie styles her hair for the prom. Jackie starts dreaming again about what could be. Then she gets to work on changing her life. Could she own a beauty salon one day?

This high-interest, low-vocabulary novella is intended for adult basic education (ABE) and English as a Second Language (ESL) readers.

This popular volume on the culture of hair through human history and around the globe has been updated and revised to include even more entries and current information. How we style our hair has the ability to shape the way others perceive us. For example, in 2017, the singer Macklemore denounced his hipster undercut hairstyle, a style that is associated with Hitler Youth and alt-right

men, and in 2015, actress Rose McGowan shaved her head in order to take a stance against the traditional Hollywood sex symbol stereotype. This volume examines how hair-or lack thereof-can be an important symbol of gender, class, and culture around the world and through history. Hairstyles have come to represent cultural heritage and memory, and even political leanings, social beliefs, and identity. This second edition builds upon the original volume, updating all entries that have evolved over the last decade, such as by discussing hipster culture in the entries on beards and mustaches and recent medical breakthroughs in hair loss. New entries have been added that look at specific world regions, hair coverings, political symbolism behind certain styles, and other topics.

This collection brings together global perspectives which critically examine the ways in which language as a resource is used and managed in myriad ways in various blue-collar workplace settings in today's globalized economy. In focusing on blue-collar work environments, the book sheds further light on the informal processes through which top down language policies take place in different multilingual settings and the resultant asymmetrical power relations which emerge among employees and employers in such settings. Taking into account the latest debates on poststructuralist theories of language, the volume also extends its conceptualization of language to demonstrate the ways in which it extends to a wider range of multilingual and multimodal resources and communicative practices, all of which combine in unique and different ways toward constructing meaning in the workplace. The volume's unique focus on such workplaces also showcases domains of work which have generally until now been less visible within existing research on language in the workplace and the subsequent methodological challenges that arise from studying them. Integrating a range of

theoretical and methodological approaches, along with empirical data from a diverse range of blue-collar workplaces, this book will be of particular interest to students and researchers in critical sociolinguistics, applied linguistics, sociology, and linguistic anthropology. *A Cultural History of Hair in the Age of Empire* Fredericton, N.B. : Lexicon Project Committee = Comité du projet de lexiques Text in English & Spanish. *Shoptalk* examines the development of literacy, identity, and thinking skills that takes place through cross generation conversation in an African American hair salon and how it can inform teaching in today's diverse classrooms. By shining a spotlight on verbal discussions between the salon's patrons and workers, the author provides a critical reassessment of the achievement gap discourse and focuses on the intellectual toolkits available to African Americans as members of thriving communities. While this book offers a detailed analysis of the informal teaching and language practice that occurs within the salon, it also moves beyond that setting to consider culturally situated problem-solving within an urban, language arts classroom. *Shoptalk* is essential reading for teachers, teacher educators, and administrators who are interested in widening their view of culturally responsive pedagogical practices. **Book Features:** Examines how African Americans use language, including African American Vernacular English, to achieve particular goals. Identifies culturally relevant literacy practices and related skills and how these can be supported within and across contexts. Shows teachers how to leverage the out-of-school practices of students of color for

literacy learning and development. Shows school leaders how to develop and maintain learning environments that are culturally responsive. Demonstrates research methodologies for the study of the social context of learning. "This rare and wonderful book gets us to think in fresh and creative ways about the intersection of race, language, work, and school. What a gem." —Mike Rose, research professor, UCLA and author, *The Mind at Work* "This fascinating ethnography of speaking opens a window into an important socialization setting while also opening up new theoretical territory. It provides understanding, wisdom, and hope for how we might improve educational outcomes for African American children." —James V. Wertsch, vice chancellor for International Affairs, Washington University in St. Louis *Language, Global Mobilities, Blue-Collar Workers and Blue-collar Workplaces* Teachers College Press *Will you make the cut? *Bobs, beards, blondes and beyond*, Hair takes us on a lavishly illustrated journey into the world of this remarkable substance and our complicated and fascinating relationship with it. Taking the key things we do to it in turn, this book captures its importance in the past and into the present: to individuals and society, for health and hygiene, in social and political challenge, in creating ideals of masculinity and womanliness, in being a vehicle for gossip, secrets and sex. Using art, film, personal diaries, newspapers, texts and images, Susan J. Vincent unearths the stories we have told about hair and why they are important. From ginger jibes in the seventeenth century to bobbed-hair suicides in the 1920s, from hippies to Roundheads, from bearded women to smooth metrosexuals, Hair shows the significance of the stuff we nurture, remove, style and tend. You will never take it for granted again.
