**Focus On: 100 Most Popular French-language Films** McGraw Hill Professional

Vaccination programmes are of vital importance to public health and are present in virtually every country in the world. By promoting an understanding of the diverse effects of vaccination programmes, this textbook discusses how epidemiologic methods can be used to study, in real life, their impacts, benefits and risks. Written by expert practitioners in an accessible and concise style, this book is interspersed with practical examples which allow readers to acquire understanding

through real-life data and problems. Part I provides an overview of basic concepts in vaccinology, immunology, vaccination programmes, infectious disease transmission dynamics, the various impacts of vaccination programmes and their societal context. Part II covers the main field tools used for the epidemiological evaluation of vaccination programmes: monitoring coverage and attitudes towards vaccination, surveillance of vaccine-preventable diseases and pathogens, seroepidemiological studies, methods to assess impact and outbreak investigation. Part III is dedicated to vaccine effectiveness and its assessment. Part IV includes an overview of the potential risks of vaccination and how to study these. Lastly, Part V deals with methods for an integrated assessment of benefits and risks of vaccination programmes. Suitable for professionals working in public health, epidemiology, biology and those working in health economics and vaccine development, Vaccination Programmes also serves as a textbook for postgraduate students in public health, epidemiology and infectious diseases. The book is aimed at all those involved in the many aspects of vaccination programmes, including public health professionals and epidemiologists. Its primary target audiences are master and doctoral students in infectious disease epidemiology and public health, post-doctoral participants of field epidemiology training

programmes and public health professionals working in the post-implementation epidemiological evaluation of vaccines and vaccination programmes.

*Learn French In 30 Days Through English* Rowman & Littlefield

Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

With gorgeous art throughout, Let's learn French ! is a daily feast regardless of your level in French. Besides, scan the OR codes inside and listen to audio content and pronunciation tips - tous les jours !

*Stonehenge* Assimil France

Stonehenge is one of the most famous ancient monuments in the world and its solar alignment is one of its most important features. Yet although archaeologists have learned a huge amount about this iconic monument and its development, a sense of mystery continues about its purpose. This

helps fuel numerous theories and common misconceptions, particularly concerning its relationship to the sky and the heavenly bodies. A desire to cut through this confusion was the inspiration for this book, and it fills a gaping hole in the existing literature. The book provides both an introduction to Stonehenge and its landscape and an introduction to archaeoastronomy—the study of how ancient peoples understood phenomena in the sky, and what role the sky played in their cultures. Archaeoastronomy is a specialism critical to explaining the relationship of Stonehenge and nearby monuments to the heavens, but interpreting archaeoastronomical evidence has often proved highly controversial in the past. Stonehenge: Sighting the Sun explains why. It makes clear which ideas about Stonehenge are generally accepted and which are not, with clear graphics to explain complicated concepts. This beautifully illustrated book shines new light on this most famous of ancient monuments, and is the first in-depth study of this fascinating topic suitable both for specialists and for anyone with a general interest.

**Cruising the Inland Waterways of France and Belgium** OECD Publishing

Workman now publishes a separate full-color calendar catalog that includes detailed sales copy for all 1998 wall calendars, desk diaries. Page-A-Day "RM" calendars, and other calendar products. **OECD Skills Studies OECD Skills Strategy Diagnostic Report: Portugal 2015** OECD Publishing

The Retail Market Study 2014 of The Location Group is the one and only study of its kind with 150 of the most notable international cities of the fashion and retail world and 3'000 store openings on 1,500 pages. Over 1,000 retailers, 800 shopping streets and 500 shopping centers were analyzed. The study reached more than 100,000 readers worldwide so far.

**New York Magazine** Fodor's Travel

NATIONAL BESTSELLER • For anyone who wants to learn a foreign language, this is the method that will finally make the words stick. "A brilliant and thoroughly modern guide to learning new languages."—Gary Marcus, cognitive psychologist and author of the New York Times bestseller *Guitar Zero* At thirty years old, Gabriel Wyner speaks six languages fluently. He didn't learn them in school—who does? Rather, he learned them in the past few years, working on his own and practicing on the subway, using simple techniques and free online resources—and here he wants to show others what he's discovered. Starting with pronunciation, you'll learn how to rewire your ears and turn foreign sounds into familiar sounds. You'll retrain your tongue to produce those sounds accurately, using tricks from opera singers and actors. Next, you'll begin to tackle words, and connect sounds and spellings to imagery rather than translations, which will enable you to think in a foreign language. And with the help of sophisticated spaced-repetition techniques, you'll be able to memorize hundreds of words a month in minutes every day. This is brain hacking at its most exciting, taking what we know about neuroscience and linguistics and using it to create the most efficient and enjoyable way to learn a foreign language in the spare minutes of your day.
