This new pocket atlas is your best way to reference anatomy on the go! It combines superb definitions from Dorland's Illustrated Medical Dictionary with phenomenal illustrations from Gray's Anatomy for Students, for an unprecedented level of accuracy and visual clarity. An organization by body region parallels the approach used by most of today's anatomy courses. Terms and descriptions are based on the Terminologia Anatomica, the most widely accepted anatomical nomenclature system. The result is an ideal guide to structures and their definitions . . . great for quick consultation in the dissection lab as well as for convenient study anytime, anywhere! An organization by body region, rather than by organ system, parallels the way most of today's anatomy courses approach the subject and facilitates quick reference.

Exquisite full-color artwork from Gray's Anatomy for Students, as well as Standring: Gray's Anatomy, 39th Edition and Sobotta: Atlas of Human Anatomy, 14th Edition, makes structures easy to visualize, remember, and identify. Terms and descriptions based on Terminologia Anatomica ensure conformity with the most widely used and up-to-date international anatomical nomenclature system. Definitions from Dorland's Illustrated Medical Dictionary deliver clarity and accuracy from cover to cover.

Netter's Head and Neck Anatomy for Dentistry E-Book Elsevier Health Sciences

This new manual takes a systemic approach with each chapter focusing on one body system. The order of chapters follows the traditional order found in anatomy or anatomy and physiology courses. The photos include skeletal images, photomicrographs of histology and cadaver dissections. This atlas includes full-color photographs of actual cadaver dissections instead of idealized illustrations, to accurately and realistically represent anatomical structures.

Anatomy of a Song Elsevier Health Sciences

"A winning look at the stories behind 45 pop, punk, folk, soul and country classics" in the words of Mick Jagger, Stevie Wonder, Cyndi Lauper and more (The Washington Post). Every great song has a fascinating backstory. And here, writer and music historian Marc Myers brings to life five decades of music through oral histories of forty-five era-defining hits woven from interviews with the artists who created them, including such legendary tunes as the Isley Brothers' Shout, Led Zeppelin's Whole Lotta Love, Janis

Joplin's Mercedes Benz, and R.E.M's Losing My Religion. After receiving his discharge from the army in 1968, John Fogerty did a handstand—and reworked Beethoven's Fifth Symphony to come up with Proud Mary. Joni Mitchell remembers living in a cave on Crete with the mean old daddy who inspired her 1971 hit Carey. Elvis Costello talks about writing (The Angels Wanna Wear My) Red Shoes in ten minutes on the train to Liverpool. And Mick Jagger, Jimmy Page, Rod Stewart, the Clash, Jimmy Cliff, Roger Waters, Stevie Wonder, Keith Richards, Cyndi Lauper, and many other leading artists reveal the emotions, inspirations, and techniques behind their influential works. *Anatomy of a Song* is a love letter to the songs that have defined generations of listeners and "a rich history of both the music industry and the baby boomer era" (Los Angeles Times Book Review).
