How did gender figure in understandings of spatial realms, from the inner spaces of the body to the furthest reaches of the globe? How did women situate themselves in the early modern world, and how did they move through it, in both real and imaginary locations? How do new disciplinary and geographic connections shape the ways we think about the early modern world, and the role of women and men in it? These are the questions that guide this volume, which includes articles by a select group of scholars from many disciplines: Art History, Comparative Literature, English, German, History, Landscape Architecture, Music, and Women's Studies. Each essay reaches across fields, and several are written by interdisciplinary groups of authors. The essays also focus on many different places, including Rome, Amsterdam, London, and Paris, and on texts and images that crossed the Atlantic and the Mediterranean, or that portrayed real and imagined people who did. Many essays investigate topics key to the 'spatial turn' in various disciplines, such as borders and their permeability, actual and metaphorical spatial crossings, travel and displacement, and the built environment.

The Lost Kingdom of Anian Regnum: The Mystery of Ancient British Columbia, Canada An Alternative History Article on the History of British Columbia, Canada There is a mystery about British Columbia, Canada- a historical mystery that is just as significant as any other historical mystery in our past. No one remembers the story of Ancient British Columbia, and we are not taught about it in school. Not so long ago, 'Anian Regnum' was inscribed on all the oldest maps, searched for by the Explorers of Old, believed by those who came after, and spoken of in written history by respected Historians. This unknown place of Anian Regnum was shown to be established within the mountains of British Columbia before it was British Columbia- but it is now forgotten in time and disregarded as myth. Could it be possible that 'Anian Regnum' did exist, and might we begin to assemble the fragmented annals of our written history to find the Lost Kingdom.

This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1921 edition. Excerpt: ... VI IMMIGRANT INSTITUTIONS There is an obvious resemblance between the behavior of a Russian mir or a South Slav zadruga (see documents 21, 22, 23, p. 31) and that of a pack, flock, or herd of animals. In each case there is some mechanism for securing unanimity--the thing that makes all the sheep follow the leader over the wall. In the animal it is instinctive, predetermined in the nervous system. In the simple community there is, plus the DEGREESgregarious instinct, a process of defining the situation by discussion (and the latter element is of course the basis of the democratic organization of society). Our discussion of the primary group organization (Chapter II) and of the types of demoralization in America--some of the latter even reaching insanity (see document 56, p. 72)-- show that the immigrant does not know how to live except as member of a group. The situation of the new immigrant would be singularly helpless here if he did not find some points of identity with his previous life, and these he does in fact find among those of his own group or nationality who have preceded him. He almost always DEGREEscomes to friends; frequently they have sent him his ship ticket, and he boards with them until he has found employment and "worked back" the ship ticket. And the different immigrant groups have formed spontaneously in America, organizations

that reproduce to some extent the home society or replace it with forms more adapted to the needs of the immigrant here. These organizations are not, in fact, pure heritages, but the products of the immigrants' efforts to adapt their heritages to American conditions. The immigrant, therefore, comes to a society of "his own people, and this society, not * native American society, is the matrix which gives him...

Mapping Gendered Routes and Spaces in the Early Modern World New Riders

A narration of the mutually mortal historical contest between humans and nature in Latin America. Covering a period that begins with Amerindian civilizations and concludes in the region's present urban agglomerations, the work offers an original synthesis of the current scholarship on Latin America's environmental history and argues that tropical nature played a

central role in shaping the region's historical development. Human attitudes, populations, and appetites, from Aztec cannibalism to more contemporary forms of conspicuous consumption, figure prominently in the story. However, characters such as hookworms, whales, hurricanes, bananas, dirt, butterflies, guano, and fungi make more than cameo appearances. Recent scholarship has overturned many of our egocentric assumptions about humanity's role in history. Seeing Latin America's environmental past from the perspective of many centuries illustrates that human civilizations, ancient and modern, have been simultaneously more powerful and more vulnerable than previously thought.

The online economy offers challenges to traditional businesses as well as incredible opportunities. Chris Anderson makes the compelling case that in many instances businesses can succeed best by giving away more than they charge for. Known as "Freemium," this combination of free and paid is emerging as one of the most powerful digital business models. In *Free*, Chris Anderson explores this radical idea for the new global economy and demonstrates how it can be harnessed for the benefit of consumers and businesses alike. In the twenty-first century, Free is more than just a promotional gimmick: It's a business strategy that is essential to a company's successful future. Download the audiobook of *Free* for free! Merge Records defies everything you've heard about the music business. Started by two twenty-year-old musicians, Merge is a lesson in how to make and market great music on a human scale. The fact that the company is prospering in a failing industry is something of a miracle. Yet two of their bands made the Billboard Top 10 list; more than 1 million copies of Arcade Fire's Neon Bible have been sold; Spoon has appeared on Saturday Night Live and The Tonight Show; and the Magnetic Fields' 69 Love Songs is a contemporary classic. In celebration of their twentieth anniversary, founders Mac and Laura offer first-person accounts—with the help of their colleagues and Merge artists—of their work, their lives, and the culture of making music. Our Noise also tells the behind-the-scenes stories of Arcade Fire, Spoon, the Magnetic Fields, Superchunk, Lambchop, Neutral Milk Hotel, and Butterglory. Hundreds of personal photos of the bands, along with album cover art, concert posters, and other memorabilia are included.

 In this 202nd issue of the Baba Indaba's Children's Stories series, Baba Indaba narrates the ancient Greek tale of 'THE OLD-WORLD GHOST'. In about the year 50AD, Pliny told this story. Pliny was an author, naturalist, and philosopher, as well as naval and army commander of the early Roman Empire, and personal friend of the emperor Vespasian. So his words should be closely listened to. He tells the story of a house in old Athens which stood empty for many years. Some said they had heard sounds emanating from the house at night, sounds of chains clinking. Others said they had seen 'things' in the house and occupants of the house never stayed long. Upon investigation during daylight hours, nothing was ever found. One man, Athenodorus, decided to be brave and investigate. He decided that if there was a Ghost, he would confront it in an attempt to put the restless spectre to rest and get rid of it once and for all. But exactly what happened, did Athenodorus survive? More importantly was he brave enough to face the clinking and clanking of the ghost in the middle of the night? You're invited to download and read the story of Athenodorus and the Old-World Ghost.

 Forty-two chapters by international experts from a wide range of disciplines make *The Wetlands Handbook* the essential tool for those seeking comprehensive understanding of the subject. A departure from more traditional treatises, this text examines freshwater wetland ecosystem science from the fundamentals to issues of management and policy. Introductory chapters address the scope and significance of wetlands globally for communities, culture and biodiversity. Subsequent sections deal with processes underpinning wetland functioning, how wetlands work, their uses and values for humans and nature, their sensitivity to external impacts, and how they may be restored. The text is illustrated by numerous examples, emphasising functional and holistic approaches to wetland management, including case studies on the wise use and rehabilitation of wetlands in farmed, urban, industrial and other damaged environments, highlighting the long-term benefits of multiple use. *The Wetlands Handbook* will provide an invaluable reference for researchers, managers, policy-makers and students of wetland sciences.
