Spon's Architects' and Builders' Price

Taylor & Francis

This simple-to-use, practical guide to altering or extending property is invaluable to all those who are trying to ensure that the processes involved are carried out efficiently and cost-effectively. For those working or planning to work in the construction industry, it will remind them of the pitfalls of local requirements, building control and planning.

Demolition and Reuse of Concrete and Masonry: Demolition methods and practice Forgotten Books

This practical handbook is a comprehensive guide to the conservation of older bridges, commissioned by the UK Highways Agency. It provides essential guidance and recommendations for bridge conservation, repair and maintenance strategies, and proposes a new approach to best practice for bridge conservation. Conservation of Bridges covers all types of highway, foot, railway, river and canal bridges built before 1960. It comprehensively deals with state-of-the-art methods of conservation, as well as structural form and behaviour, architecture, archaeology, legislation, and attitudes to conservation. With case studies from all over the world and full colour illustrative photographs throughout, the book demonstrates what has, and can continue to be achieved in the pursuit of excellence in this field. Conservation of Bridges is essential reading for all engineers, architects and other professional groups responsible for the ongoing maintenance of a diverse bridge heritage.

Demolition John Wiley & Sons

Excerpt from Building Code of the City of Richmond To provide rules and regulations concerning the construction, equipment, alteration and repair of buildings, and concerning their removal or demolition when unsafe or dangerous, and defining the duties of the Building Inspector and of the Board of Public Safety. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.

Addison-Wesley Longman Limited

Compiled by Davis Langdon, Spon's Architects' and Builders' Price Book provides the most accurate, detailed and professionally relevant construction price information currently available for the UK. Its unique Tender Index, updated through the year, provides an ongoing reality check and adjustment for changing market conditions. This is the only pr

Control of Dust from Construction and Demolition Activities CRC Press

Spon's Architects' and Builders' Price Book 2004 is the most detailed, professionally relevant source of construction price information currently available anywhere. With competition

growing fiercer throughout the industry and with increasing pressure to obtain a 'competitive advantage', the A and B's unique tender index will be more valuable than ever before. This is the only price book that publishes details of its cost base in such a way that it can be adjusted to allow for market conditions that affect building prices. A separate minor works section on coloured paper covers contracts of around £65,000 in value. The A and B comes with a 'free' CDROM that enables the reader to view the entire book on screen, cut and paste prices into other tender documents, export to other major packages, perform simple calculations, index search, produce estimate and tender documents and adjust rates and data. This complete package now means that Spon's Architects' and Builders' Price Book 2004 is now better than ever and is a resource that no building firm, surveyor or architect should be without. New features in this 129th edition include: an easier-to-read format; information on, and incorporating, the new CICJ three year wage agreement, effective from Monday, 30th June 2003. It also includes additional items for: hot and cold water piping systems; additional building boards and external wall cladding; further aluminium systems curtain walling; western red cedar external wall cladding; fire retardant steel beams; metal and glazed balustrading; sarnafil roofing and acoustic sliding partitions.

Spon's Architects' and Builders' Price Book 2005 CRC Press

The definitive guide to measurement and estimating using NRM1, written by the author of NRM1 The 'RICS New rules of measurement: Order of cost estimating and cost planning of capital building works' (referred to as NRM1) is the cornerstone of good cost management of capital building works projects - enabling more effective and accurate cost advice to be given to clients and other project team members, while facilitating better cost control. The NRM1 Cost Management Handbook is the essential guide to how to successfully interpret and apply these rules, including explanations of how to: quantify building works and prepare order of cost estimates and cost plans use the rules as a toolkit for risk management and procurement analyse actual costs for the purpose of collecting benchmark data and preparing cost analyses capture historical cost data for future order of cost estimates and elemental cost plans employ the rules to aid communication manage the complete 'cost management cycle' use the elemental breakdown and cost structures, together with the coding system developed for NRM1, to effectively integrate cost management with Building Information Modelling (BIM). In the NRM1 Cost Management Handbook, David Benge explains in clear terms how NRM1 is meant to be used in familiar quantity surveying tasks, as well as a range of activities of crucial importance for professionals in years to come. Worked examples, flow charts, diagrams, templates and check lists ensure readers of all levels will become confident and competent in the use of NRM1. This book is essential reading for anyone working with NRM1, and is the

most authoritative guide to practice available for those preparing to join the industry.

Spon's Architects' and Builders' Price Book 2004 Wentworth Press

Despite repeated attempts in recent years to simplify the planning system, planning law has continued to be so complex that practitioners and students alike have found it difficult to disentangle the issues and principles involved. The twelfth edition of this popular and accessible book aims to remove the mystery which planning law has for so many people. A Practical Approach to Planning Law continues to provide a comprehensive and systematic account of the principles and practice of planning law, guiding the reader through each stage of the planning process, from

permission applications through to disputes and appeals. Containing coverage of all recent cases as well as important developments since the publication of the previous edition, particularly those arising out of the Localism Act 2011, this new edition provides an invaluable introduction to the subject for professionals and students alike. The A Practical Approach series is the perfect partner for practice work. Each title focuses on one field of the law, providing a comprehensive overview of the subject together with clear, practical advice and tips on issues likely to arise in practice. The books are also an excellent resource for those new to the law, where the expert overview and clear layout promote clarity and ease of understanding.

[Restatements](#) CRC Press

Written for small builders and tradesmen such as bricklayers and carpenters, as well as householders wanting to provide more space and enhanced living conditions without the substantial cost of moving house. While there are many books that deal with the construction aspects of extending a house, there are few sources that combine the planning, construction and regulatory aspects into one easily accessible source. Extending and Improving a Home meets that need. By focussing on specific building

elements – foundations, walls, roofs, services, finishes etc – the book neatly provides a comprehensive, accessible guide to the areas of home improvement that cause most concern for householders and small builders.

Extending and Improving a Home will: Guide you through the maze of legislation that affects most building alterations and extensions; show how to go about getting a project realised in terms of design, choice of contractor and construction, successfully and to budget, and give sound technical solutions for all the elements of a project that also comply with Building Regulations.

Offers quantity surveyors, engineers, building surveyors and contractors clear guidance on how to recognise and avoid measurement risk. The book recognises the interrelationship of measurement with complex contractual issues; emphasises the role of measurement in the entirety of the contracting process; and helps to widen the accessibility of measurement beyond the province of the professional quantity surveyor. For the busy practitioner, the book includes: Detailed coverage of NRM1 and NRM2, CESMM4, Manual of Contract Documents for Highway Works and POM(I) Comparison of NRM2 with SMM7

Detailed analysis of changes from CESMM3 to CESMM4 Coverage of the measurement implications of major main and sub-contract conditions (JCT, NEC3, Infrastructure Conditions and FIDIC) Definitions of 5D BIM and exploration of BIM measurement protocols Considerations of the measurement risk implications of both formal and informal tender documentation and common methods of procurement An identification of pre- and post-contract measurement risk issues Coverage of measurement risk in claims and final accounts Detailed worked examples and explanations of computer-based measurement using a variety of industry-standard software packages. *NFPA 241 Standard for Safeguarding Construction, Alteration, and Demolition Operations* OUP Oxford

There are over half a million listed buildings in Britain, conservation areas can be found in every borough, and a large proportion of our housing stock pre-dates 1914. So, whether in extending a listed house, reordering a local church, or converting an historic warehouse, most architects will work with historic buildings at some point in their career – even if they are not a specialist conservation architect. An Introduction to Architectural Conservation introduces non-specialist architects to the principles behind legislation concerning historic buildings. It will help them understand the practicalities of this legislation, the aims and objectives of Conservation Offices, Statutory Amenity Societies and other guardians of our heritage. With these skills, readers can advise clients more accurately, make successful listed building applications, and ensure their interventions are sensitive, appropriate and effective. An Introduction to

Architectural Conservation is also a practical guide to good working practice: taking readers through the process of preparing a listed building application, preparing a suitable tender package and administering the contract. .

Federal Register Routledge

"The statutory development control and planning law system of the United Kingdom is one of the most comprehensive and detailed in the world. Inevitably then, development control is one of the most significant matters concerning anyone involved in the development of land, and an understanding of the Acts, legislations and enforcement of said powers is essential to the success of any development project. This book is the fourth edition of a highly regarded work widely used by students and practitioners of real estate management, development, surveying, valuation, planning and law. Written by two experienced experts on law and the UK planning system, *Development and Planning Law* is essential reading for anyone involved in building and construction, surveying, planning, and development and who need to know the law as it relates to their every day professional practice. It has been extensively updated to reflect the most recent legal developments, including the 2011 Localism Act"--
