In this concise and richly-illustrated work, Olive Whicher introduces a radical new science of living organisms, forms and processes, based on the pioneering work of Rudolf Steiner and his pupil George Adams. If we are to understand fully the laws of living nature, she argues, it is necessary to overcome the one-sided ideas of modern science – ideas that are only adequate to describe material forms and forces. We need to widen our thinking to include the ‘etheric formative forces’ – forces that are alive in ethereal space or ‘counterspace’. Such forces work in plants, for example, by drawing matter upwards in a suctional manner, in contrast to the forces of gravity, which draw downwards, and the forces of an explosion, which work upward and outward. This easily-digestible introduction will be valuable to anybody seeking to comprehend the living world around us.

“Each man should give what he has decided in his heart to give, not reluctantly or under compulsion, for God loves a cheerful giver” (2 Corinthians 9:7). Throughout this book, the authors will focus on ten reasons to give. They are listed here for your convenience, but the reasons will be interspersed throughout the

book. Look for them over and over again. They are some guidelines for becoming a more generous giver. 1. God wants us to remember the story of Cain and Abel (Genesis 4:3-7). 2. God blesses us because of who He is, not who we are or what we have done (2 Corinthians 8:7-9). 3. God blesses us to bless others (Ephesians 2:10, Acts 17:26, Esther 4:14). 4. God blesses us to fund the Great Commission (2 Corinthians 9: 10-11, Proverbs 28:27, Romans 10:13-15). 5. God wants our gifts to be first, the best, and from the heart (Proverbs 3:9-10, Genesis 4:3, Malachi 3:8-12). 6. God wants us to be generous, not as an act, but as a response. Generous giving includes an obedient will, a joyful attitude, and a compassionate heart (Matthew 10:8). 7. God wants our heart because money follows our heart (Matthew 6:21). 8. God's purposes should be our highest priority (1 Corinthians 16:1-4). 9. God wants us to be godly and content (1 Timothy 6:6). 10. God wants us to know that salvation is free, ministry has a cost, and there is a cost to being a disciple (Luke 14:33).

How diamonds have been the cause of widespread death, misery, & destruction for almost a decade in the West African country of Sierra Leone. Through the 1990s, Sierra Leone's rebel war became a tragedy of major humanitarian, political & historic proportions, but the story goes back 60 years, to the discovery of the diamonds. The diamond mining sector has become influenced by organized crime & by the smuggling not just of diamonds, but of guns & drugs, & by vast sums of money in search of a laundry. No peace agree. would be sustainable until the problems of mining & selling diamonds had been addressed, both inside Sierra Leone & internationally. Tables.

Ezekiel 36:26 (NKJV) Our hearts are our spiritual centers where thoughts and feelings dwell; they form our characters. Since we are made in God's image, we know that He, too, has a heart. The Bible mentions the word "heart" hundreds of times, but what is it really telling us about the heart of God and how we can grow our own hearts in His truth? In her book *It's a Matter of the Heart* author Shenita Johnson combines her own personal observations with biblical insight to elaborate on the important role the heart plays in our walk with the Lord. Johnson shares various topics of the heart, including: Cultivating forgiveness Guarding your heart Ensuring a pure heart Following your heart Healing a broken heart Unlocking hearts for a blended family Fixing a hardened heart Taming a rebellious heart Spending time with God and keeping your heart full of His word is our number-one priority. Shenita Johnson builds a guide to the life God has invited us to enjoy. She helps clear away the ambiguity and creates a clear picture of how you can model your heart after the Lord's. God certainly values the state of your heart, so how are you positioning your heart to please Him?"

How would your life be different if you truly believed you're loved just as you are?" Holley Gerth poses this compelling question at the start of her latest book. As someone who has connected with

thousands of women, Holley has seen the dangers of becoming trapped by impossible standards of beauty, achievement, and even spirituality. We believe if only we were perfect we could beat our depression, banish anxiety, and develop the relationships we long for most. Holley shares how God wants to set the hearts of women free by revealing the lies we believe and the scandalous grace and acceptance offered to us instead. When we know we're truly loved, the response is to love in return--and that changes everything. Bestselling author and every woman's best friend, Holley Gerth helps women lay down their unrealistic expectations so they can embrace who God created them to be, pursue his purpose for their lives, and offer the love they've been freely given.

The Heart Of The Matter: Perspectives On Emotion In Marital Houghton Mifflin Harcourt

At one time, heart disease was a death sentence. In *The Heart Healers*, world renowned cardiac surgeon Dr. James Forrester tells the story of the mavericks and rebels who defied the accumulated medical wisdom of the day to begin conquering heart disease. By the middle of the 20th century, heart disease was killing millions and, as with the Black Death centuries before, physicians stood helpless. Visionaries, though, had begun to make strides earlier. On Sept. 7, 1895, Ludwig Rehn successfully sutured the heart of a living man with a knife wound to the chest for the first time. Once it was deemed possible to perform

surgery on the heart, others followed. In 1929, Dr. Werner Forssman inserted a cardiac catheter in his own arm and forced the x-ray technician on duty to take a photo as he successfully threaded it down the vein into his own heart...and lived. On June 6, 1944 - D-Day - another momentous event occurred far from the Normandy beaches: Dr. Dwight Harken sutured the shrapnel-injured heart of a young soldier, saved his life and the term "cardiac surgeon" born. Dr. Forrester tells the story of these rebels and the risks they took with their own lives and the lives of others to heal the most elemental of human organs - the heart. The result is a compelling chronicle of a disease and its cure, a disease that is still with us, but one that is slowly being worn away by "The Heart Healers".

This textbook introduces readers to the scientific basics of cardiovascular medicine and biology. It covers not only developmental but also cellular and molecular aspects of normally functioning vasculature and the heart; importantly, it also addresses the mechanisms leading to and involved in specific cardiovascular diseases. Though the main emphasis is on novel therapies and potential therapeutic targets, specific controversial topics like cardiac remodeling and regenerative capacities are also addressed. All chapters were written by lecturers from the Imperial College London, in collaboration with their students from the College's BSc Programme in Medical Sciences with Cardiovascular Science. Bridging the gap between clinics and basic biology, the book offers a valuable guide for medical students, and for Master and PhD students in Cardiovascular Biomedicine.

The Heart of Matter Harper Collins

"Judaism, like all the great religions, has a strand within it that sees inward devotion as an opening of the human heart to God's presence. This voice is not always easy to hear in a tradition where so much attention is devoted to the how rather than the why of religious living. The devotional claim, certainly a key part of Judaism's biblical heritage, has reasserted itself in the teachings of individual mystics and in the emergence of religious movements over the long course of Jewish history. This volume represents Rabbi Arthur Green's own quest for such a Judaism, both as a scholar and as a contemporary seeker. This collection of essays brings together Green's scholarly writings, centered on the history of early Hasidism, and his highly personal approach to

a rebirth of Jewish spirituality in our own day. In choosing to present them in this way, he asserts a claim that they are all of a piece. They represent one man's attempt to wade through history and text, language and symbol, an array of voices both past and present, while always focusing on the essential question "What does it mean to be a religious human being, and what does Judaism teach us about it?" This, the author considers to be the heart of the matter." -- Publisher's description.

The Matter of the Heart St. Martin's Press

"Delightfully horrifying."--Popular Science This wryly humorous

collection of stories about bizarre medical treatments and cases offers a unique portrait of a bygone era in all its jaw-dropping weirdness. A puzzling series of dental explosions beginning in the nineteenth century is just one of many strange tales that have long lain undiscovered in the pages of old medical journals. Award-winning medical historian Thomas Morris delivers one of the most remarkable, cringe-inducing collections of stories ever assembled. Witness *Mysterious Illnesses* (such as the Rhode Island woman who peed through her nose), *Horrifying Operations* (1781: A French soldier in India operates on his own bladder stone), *Tall Tales* (like the "amphibious infant" of Chicago, a baby that could apparently swim underwater for half an hour), *Unfortunate Predicaments* (such as that of the boy who honked like a goose after inhaling a bird's larynx), and a plethora of other marvels. Beyond a series of anecdotes, these painfully amusing stories reveal a great deal about the evolution of modern medicine. Some show the medical profession hopeless in the face of ailments that today would be quickly banished by modern drugs; but others are heartening tales of recovery against the odds, patients saved from death by the devotion or ingenuity of a conscientious doctor. However embarrassing the ailment or ludicrous the treatment, every case in *The Mystery of the Exploding Teeth* tells us something about the knowledge (and ignorance) of an earlier age, along with the sheer resilience of human life.
