 Justinian governed the Roman empire for more than thirty-eight years, and the events of his reign were recorded by Procopius of Caesarea, secretary of the general Belisarius. Yet, significantly, Procopius composed a history, a panegyric, as well as a satire of his own times. Anthony Kaldellis here offers a new interpretation of these writings of Procopius, situating him as a major source for the sixth century and one of the great historians of antiquity and Byzantium. Breaking from the scholarly tradition that views classicism as an affected imitation that distorted history, Kaldellis argues that Procopius was a careful student of the classics who displayed remarkable literary skill in adapting his models to the purposes of his own narratives. Classicism was a matter of structure and meaning, not just vocabulary. Through allusions Procopius revealed truths that could not be spoken openly; through anecdotes he exposed the broad themes that governed the history of his age. Elucidating the political thought of Procopius in light of classical historiography and political theory, Kaldellis argues that he owed little to Christianity, finding instead that he rejected the belief in providence and asserted the supremacy of chance. By deliberately alluding to Plato's discussions of tyranny, Procopius developed an artful strategy of intertextuality that enabled him to comment on contemporary individuals and events. Kaldellis also uncovers links between Procopius and the philosophical dissidents of the reign of Justinian. This dimension of his writing implies that his work is worthy of esteem not only for the accuracy of its reporting but also for its cultural polemic, political dissidence, and philosophical sophistication. Procopius of Caesarea has wide implications for the way we should read ancient historians. Its conclusions also suggest that the world of Justinian was far from monolithically Christian. Major writers of that time believed that classical texts were still the best guides for understanding history, even in the rapidly changing world of late antiquity.

Magia Sexualis is one of the most influential books on sexual magic, and a classic of the occultist genre. This long overdue new translation is a very welcome addition to any collection of books on sexuality, occultism and magic."-- "Henrik Bogdan, *Pretty Guardian Sailor Moon Eternal Edition 5* Rutgers University Press

This collection brings together the work of writers from a range of disciplines and cultural traditions to explore the social and

political dimensions of sexuality and sexual experience. The contributors reconfigure existing notions of gender and sexuality, linking them to deeper understandings of power, resistance, and emancipation around the globe. They map areas that are currently at the cutting edge of social science writing on sexuality, as well as the complex interface between theory and practice. Framing the Sexual Subject highlights the extent to which populations and communities that once were the object of scientific scrutiny have increasingly demanded the right to speak on their own behalf, as subjects of their own sexualities and agents of their own sexual histories.

 This is a great read for our generation as it embodies, what life was like for black kids up and down the country during the 70's. I always remember, seeing him, driving through Birmingham in his VW Cabriolet convertible. He has taken his toasting talents around the world representing his upbringing and culture, truly a pioneer for toasting about "Roots and Culture" but from a British-Jamaican aspect rather than the other way round. This book, is a must-read for anyone growing up in Britain in the inner Cities of all cultures. -- Dennis Seaton, Record Producer, Musical Youth

This remarkably rich and multifaceted study of early Greek exploration makes an original contribution to current discussions of the encounters between Greeks and non-Greeks. Focusing in particular on myths about Odysseus and other heroes who visited foreign lands on their mythical voyages homeward after the Trojan War, Irad Malkin shows how these stories functioned to mediate encounters and conceptualize ethnicity and identity during the Archaic and Classical periods. Synthesizing a wide range of archaeological, mythological, and literary sources, this exceptionally learned book strengthens our understanding of early Greek exploration and city-founding along the coasts of the Western Mediterranean, reconceptualizes the role of myth in ancient societies, and revitalizes our understanding of ethnicity in antiquity. Malkin shows how the figure of Odysseus became a proto-colonial hero whose influence transcended the Greek-speaking world. The return-myths constituted a generative mythology, giving rise to oral poems, stories, iconographic imagery, rituals, historiographical interpretation, and the articulation of ethnic identities. Reassessing the role of Homer and alternative return-myths, the book argues for the active historical function of myth and collective representations and traces their changing roles through a spectrum of colonial perceptions—from the proto-colonial, through justifications of expansion and annexation, and up to decolonization.

A study of the burgeoning field of psychohistory - from Freud, its primogenitor, to its present-day academic practitioners - this work argues that little, if any, psychohistory is good history. The author systematically points out the pitfalls, sheer irrationality and ultimately ahistorical nature of this mode of historical inquiry.

Winner of an Honorable Mention in the Clinical Medicine category of the Professional and Scholarly Publishing Awards given by the Association of American Publishers At a time when medical technologies make it ever easier to enhance our minds and bodies, a debate has arisen about whether such efforts promote a process of "normalization," which makes it ever harder to tolerate the natural anatomical differences among us. The debate becomes especially complicated when it addresses the surgical alteration, or "shaping," of children. This volume explores the ethical and social issues raised by the recent proliferation of surgeries designed to make children born with physical differences look more normal. Using three cases—surgeries to eliminate craniofacial abnormalities such as cleft lip and palate, surgeries to correct ambiguous genitalia, and surgeries to lengthen the limbs of children born with dwarfism—the contributors consider the tensions parents experience when making such life-altering decisions on behalf of or with their children. The essays in this volume offer in-depth examinations of the significance and limits of surgical alteration through personal narratives, theoretical reflections, and concrete suggestions about how to improve the decision-making process. Written from the perspectives of affected children and their parents, health care providers, and leading scholars in philosophy, sociology, history, law, and medicine, this collection provides an integrated and comprehensive foundation from which to consider a complex and controversial issue. It takes the reader on a journey from reflections on the particulars of current medical practices to reflections on one of the deepest and most complex of human desires: the desire for normality. Sexuality and the occult arts have long been associated in the western imagination, but it was not until the nineteenth century that a large and sophisticated body of literature on sexual magic—the use of sex as a source of magical power—emerged. This book, the first history of western sexual magic as a modern spiritual tradition, places these practices in the context of the larger discourse surrounding sexuality in American and European society over the last 150 years to discover how sexual magic was transformed from a terrifying medieval nightmare of heresy and social subversion into a modern ideal of personal empowerment and social liberation. Focusing on a series of key figures including American spiritualist Paschal Beverly Randolph, Aleister Crowley, Julius Evola, Gerald Gardner, and Anton LaVey, Hugh Urban traces the emergence of sexual magic out of older western esoteric traditions including Gnosticism and Kabbalah, which were progressively fused with recently-discovered eastern traditions such as Hindu and Buddhist Tantra. His study gives remarkable new insight into sexuality in the modern era, specifically on issues such as the politics of birth control, the classification of sexual "deviance," debates over homosexuality and feminism, and the role of sexuality in our own new world of post-modern spirituality, consumer capitalism, and the Internet.

While previous studies have contrasted the relative optimism of middle-class social scientists before 1848 with a later period of concern for national decline and racial degeneration, Staum demonstrates that the earlier learned societies were also fearful of turmoil at home and interested in adventure abroad. Both geographers and ethnologists created concepts of fundamental "racial" inequality that refigured the imperialist "associationist" discourse of the Third Republic, believing that European tutelage would guide "civilizable" peoples, and providing an open invitation to dominate and exploit the "uncivilizable."

A step-by-step guide to the occult science of sex magic • Based on the practices of P. B. Randolph, occult rival of H. P. Blavatsky • Reveals how to perform sex magic rituals for specific real-world results, such as greater strength or enhancement of the senses • Explains how to create magical talismans, such as rings with specific planetary forces, how to enliven a painting, and how to charge an effigy Conceived by Paschal Beverly Randolph, *Magia Sexualis* has been heralded as the most influential book about sex

magic ever written, surviving to the present day solely through Maria de Naglowska's French translation. Published more than 50 years after Randolph's death, the authorship of this "translation" has been repeatedly called into question: While the greater part of the content can be traced to Randolph's known works, a very significant portion cannot—leading to the conclusion that this work was supplemented by Naglowska's own sex magic work and extensive occult teachings. *Magia Sexualis* explains Randolph's meticulous science of sex magic, practiced by the Brotherhood of Eulis and the Hermetic Brotherhood of Light. Beginning with exercises to develop essential skills, the book explains in step-by-step detail how to perform sex magic rituals for specific results, such as greater strength or enhancement of the senses, how to charge and use a "volt"—an effigy of a specific person you want to influence or protect, how to enliven a painting in order to influence those around it, and how to create magical talismans with specific planetary forces, using what Randolph calls "fluid condensers." This work from two great occult minds shows that true power of the spirit is acquired in conjunction with the power of sex—affirming that "sex is the fundamental force in every being, the most powerful force in Nature, and the most characteristic evidence of God."

Focusing on intersexuality, having physical gender markers that are neither female or male, the author examines the social institutions that are mobilized to maintain the two seemingly objective sexual categories. She argues that we need to rethink the meaning of gender, genitals and sexuality.

2008 Winner, MLA First Book Prize Charting the proliferation of forms of mourning and memorial across a century increasingly concerned with their historical and temporal significance, *Arranging Grief* offers an innovative new view of the aesthetic, social, and political implications of emotion. Dana Luciano argues that the cultural plotting of grief provides a distinctive insight into the nineteenth-century American temporal imaginary, since grief both underwrote the social arrangements that supported the nation's standard chronologies and sponsored other ways of advancing history. Nineteenth-century appeals to grief, as Luciano demonstrates, diffused modes of "sacred time" across both religious and ostensibly secular frameworks, at once authorizing and unsettling established schemes of connection to the past and the future. Examining mourning manuals, sermons, memorial tracts, poetry, and fiction by Harriet Beecher Stowe, William Apess, James Fenimore Cooper, Catharine Maria Sedgwick, Susan Warner, Harriet E. Wilson, Herman Melville, Frances E. W. Harper, Frederick Douglass, Abraham Lincoln, Elizabeth Keckley, and Ralph Waldo Emerson, Luciano illustrates

the ways that grief coupled the affective body to time. Drawing on formalist, Foucauldian, and psychoanalytic criticism, *Arranging Grief* shows how literary engagements with grief put forth ways of challenging deep-seated cultural assumptions about history, progress, bodies, and behaviors.

In fifteenth-century France, public prostitution was condoned by all sectors of society. Clerics and municipal officials not only tolerated prostitution, but were often its principal beneficiaries, owning and frequenting brothels quite openly. The explanation of this remarkable state of affairs is just one aspect of Jacques Rossiaud's vivid reconstruction of a part of medieval society that has previously received little attention. Drawing upon extensive research in medieval archives, the author shows that most fifteenth-century Frenchwomen could expect a life of constant subjugation to male desire. Rape, for instance, was common and considered only a minor crime. He then considers whether public prostitution might paradoxically have been seen by the secular and religious authorities as a means of social control, and of preserving marital stability: the virtue of wives and daughters was best protected by the existence of public brothels, where sexual urges could be satisfied without adultery or rape. Jacques Rossiaud also describes the social background of the prostitutes, brothel-keepers, pimps, and their clientele, providing a vivid overview of the context in which medieval prostitution existed. Medieval Prostitution will be of interest to medieval historians, as well as to students of the history of the family and sexuality.

In his famous seminar on ethics, Jacques Lacan uses this question as his departure point for a re-examination of Freud's work and the experience of psychoanalysis in relation to ethics. Delving into the psychoanalyst's inevitable involvement with ethical questions, Lacan clarifies many of his key concepts. During the seminar he discusses the problem of sublimation, the paradox of jouissance, the essence of tragedy, and the tragic dimension of analytical experience. One of the most influential French intellectuals of this century, Lacan is seen here at the height of his powers.
