This is an invaluable and fully updated text on inclusive practice for all primary trainees and teachers and for those working towards the National Award SEN

Co-ordination. It provides an equality- and child-centred approach to inclusion, combining both theory and practice while promoting critical thinking about the complex issues involved. Scenarios are used as the basis for unpicking major topics and provide opportunities for learning in context, while questions and reflections encourage deep thinking about key learning points. This second edition has been fully revised throughout and now includes:

- full reference to the new Special Educational Needs and Disability Code of Practice (2014) as well as the Children and Families Act (2014) and Behaviour2Learn
- two completely new chapters on understanding learners who are vulnerable and understanding learners with communication difficulties
- extended thinking activities and

extended reflections to support M-level study • an improved organisation with emphasis on the national priorities.

Early childhood education has reached a level of unprecedented national and international focus. Parents, policy makers, and politicians have opinions as well as new questions about what, how, when, and where young children should

learn. Teachers and program administrators now find curriculum discussions linked to dramatic new understandings about children's early learning and brain development. Early childhood education is also a major topic of concern internationally, as social policy analysts point to its role in a nation's future economic outlook. As a groundbreaking contribution to its field, this four-volume handbook discusses key historical and contemporary issues, research, theoretical perspectives, national policies, and practices.

Accumulated research findings in past

decades have led to the common knowledge that teachers' professional knowledge is essential to effective classroom instruction. However, there is still very limited understanding about the nature of teachers' expertise in mathematics instruction. Expertise in Mathematics Instruction addresses this need clearly and concisely. In particular, it examines all aspects of emphases employed to characterize the nature of expertise in mathematics instruction from both researchers' and practitioners' perspectives. Moreover, with research contributions from both the East and the West, this book also examines ideas pertinent to fostering and demonstrating expertise in mathematics instruction within different system contexts. This book will raise questions and issues for

mathematics education researchers to guide a critical examination of what can be learned from other education systems. Expertise in Mathematics Instruction builds on its theoretical and methodological approach with contributions from international experts in the field. Additionally, a review of related research from mathematics education serves as an introduction to the new research in both Eastern and Western settings. Concluding this resource is a reflection on the benefits of this international collaboration and possible research directions for the future. The final chapter cohesively joins traditional and current research for action. Expertise in Mathematics Instruction is of interest to researchers in mathematics education, mathematics

teacher educators, and mathematics educators.
