A provocative account of the development of modern national

culture in India using classical music as a case study. Janaki

Bakhle demonstrates how the emergence of an "Indian" cultural

tradition reflected colonial and exclusionary practices,

particularly the exclusion of Muslims by the Brahmanic elite,

which occurred despite the fact that Muslims were the major

practitioners of the Indian music that was installed as a "Hindu"

national tradition. This book lays bare how a nation's imaginings--

from politics to culture--reflect rather than transform societal

divisions.

Seven Notes -A Guide to Indian Classical Music Rohan

Bhanja Chowdhury

This book offers the first social history of music in undivided

Punjab (1800-1947), beginning at the Lahore court of Maharaja

Ranjit Singh and concluding at the Patiala royal darbar. It unearths new evidence for the centrality of female performers and classical music in a region primarily viewed as a folk music centre, featuring a range of musicians and dancers -from 'miris' (bards) and 'kalawants' (elite musicians), to 'kanjris' (subaltern female performers) and 'tawaifs' (courtesans). A central theme is the rise of new musical publics shaped by the anglicized Punjabi middle classes, and British colonialists' response to Punjab's performing communities. The book reveals a diverse connoisseurship for music with insights from history, ethnomusicology, and geography on an activity that still unites a region now divided between India and Pakistan.

Like many other small towns in Trinidad, Felicity is populated almost entirely by East Indians. In their Caribbean exile, the residents of Felicity have created and recreated the music of their Hindu ancestors. Music of Hindu Trinidad is a fascinating account of the history and cultural significance of Hindu music that explores its symbolic, aesthetic, and psychological aspects while asking the larger question of how this music has contributed to the formation of identity in the midst of their great diaspora. Myers details the musical repertory of Felicity, which is based largely on north Indian genres including the traditional Bhojpuri folk songs and drumming styles brought by the first indentured laborers in 1845. In her engaging exploration of the fate of Indian classical music and new popular styles such as Hindi calypso, soca, and chutney, she even finds herself at the ancestral home of Trinidadian V. S. Naipaul in India. Copiously illustrated and accompanied by a compact disk, *Music of Hindu Trinidad* is a model ethnographic study.

The SAGE International Encyclopedia of Music and Culture Rohan Bhanja Chowdhury

With the onset of modernity in twentieth-century India, new social arrangements gave rise to new forms of music-making. The musicians were no longer performing exclusively in the princely courts or in the private homes of the wealthy. Not only did the act of listening to and appreciating music change, it became an important feature of public life, thus influencing how modernity

shaped itself. This volume attempts to study the connections between music and the creation of new ideas of publicness during the early twentieth century. How was music labelled as folk or classical? How did music come to play such a catalytic role in forming identities of nationhood, politics, or ethnicity? And how did twentieth-century technologies of sound reproduction and commercial marketing contribute to changing notions of cultural distinction? Exploring these interdisciplinary questions across multiple languages, regions, and musical genres, the essays provide fresh perspectives on the history of musicians and migration in colonial India, the formation of modern spaces of performance, and the articulation of national as well as nationalist traditions.

The Music of India Rohan Bhanja Chowdhury

Dr. Ishwar Bhai Joshi is a Psychological Counselor (Doctor). His spiritual knowledge takes music therapy to a different height. He has a deep study of the world's major religions and musical cultures. If someone starts playing harmonium, keyboard, guitar, piano, according to the guidance of Dr. Ishwar Bhai Joshi, then he can learn to play the song in an hour. If your common sense is better, then you will get musical notes within just ten minutes. In the last 32 years, he did many experiments on music therapy for mental well being on thousands of people. He found some easy ways to play music on instruments. According to his research,

newly learned artists found great difficulty with western notations. Western notations make it difficult to catch the musical note. Because the core of Hindustani music is Raga and Sapta sur. Singing and lyrics are important in Hindi Sangeet. There are only five Sur in Western music. In which noise (orchestra) and bits are important. There is no singing and Alap. Due to which, western notations can play only 80% Sur of the Hindi songs. Because of which the listener does not enjoy the song in full swing. There is a difference between the Western language and the Hindustani language. We write and speak in the same way. Our ability to hear, speak, write is much different than Europeans. There is a lot of difference in spelling and pronunciation in their languages. Their language and music, sounds different and they write notes differently. They do not give importance to lyrics. (Listen mad 'Rap' songs.) Example of western notations E ~ ~ GE ~ C D DFD * A # * A # CE DF E Pyar diwana ho ta_hai mastana hota hain Example of Hindustani Sargam Ga ~ ~ paga~ sa re remre *ni *nisag rem Ga Pyaar Deewana Ho Ta Hai Mastana Hota Hai You will get Sargam in this book, not notations, please remember. Please try to understand, what is a 'Sargam'? As we know the computer has its own 'language', exactly like that every instrument has its own 'language'. Like, 'Chhukar Mere Manko Kiya Tune Kya Ishara ..' This is lyrics... So someone will hum it like ... Na Na Nana Nanana Nana Nana Na Na Nana ... "Gaga resa ni* ni* re, p * dh * ni * ni*saregasa" So, when you play 'Sa Re Ga Ma Pa dh Ni Sa', then the lyrics of the song begin to take shape in your mind. 'Chhukar Mere Manko Kiya Tune Kya Ishara.. There are two parts to any song, the first one is the Mukhada i.e. 'head' which is of two lines. And the second is Antara i.e. 'body'. Any

instrument plays the same stanza and keeps repeating it. E.g. "Papa Kahate hai Bada Naam Karega" If you study this song's Sargam, "Dhadh pama pa sare ma nidhap" Prepare this and play twice, automatically it will sound like "Papa kahate hai bada Nam karega, Beta hamara aisa kam karega" Sasasa-saresa- sasasa-saresa- mam gare re gare ga ma Play this twice, then next two lines are ready ... "Baithe hai milake sab yar apane, sabake dilome arama ye hai vo jindagi me kal kya banega har ek najar kaa sapana ye hai " Or, another example, Dilake zarokome tujhako bithakar, Yadonko teri mai dulhan banakar Sa ma ma ma ma ma ma ma ma Pa Dha san, ma ma ma ma ma ma ma ma ma Pa Dha san, The funny thing is that the person who made the first guitar pattern was a "leftie". Then millions of "righty" people try to learn the leftie pattern. Dr. Joshi has correct this for the new learners with the right hand. This book is for new learning artists who respect Music. Know Equipment preparation and self preparation .. (For that you will have to buy this book, buying a book is paying a GuruDaxina. If you are an artist and respect the Music, you will keep this book with you forever.) *Sitar Compositions in Ome Swarlipi* ideazunlimited3@gmail.com Filling a significant gap in current scholarship, the fourteen original essays that make up this volume individually and collectively reflect on the relationship between music and Orientalism in the British Empire over the course of the long nineteenth century. The book is in four themed sections. 'Portrayal of the East' traces the routes from encounter to representation and restores the Orient to its rightful place in histories of Orientalism. 'Interpreting Concert Music' looks at one of the principal forms in which Orientalism could be brought to an

eager and largely receptive - yet sometimes resistant - mass market. 'Words and Music' investigates the confluence of musical and Orientalist themes in different genres of writing, including criticism, fiction and travel writing. Finally, 'The Orientalist Stage' discusses crucial sites of Orientalist representation - music theatre and opera - as well as tracing similar phenomena in twentieth-century Hindi cinema. These final chapters examine the rendering of the East as 'unachievable and unrecognizable' for the consuming gaze of the western spectator.

This is essentially a classical Indian music practice manual. It uses sargam (Sa, Re, Ga, Ma, Pa, Dha, Ni) for musical notation. In northern classical Indian music you can make numerous sequences of these notes. In northern classical Indian instrumental music musical patterns that are used for exercises are called "paltas," where as in the vocal category of Indian classical music these patterns are called "alankars." There are over 650 patterns in this book. These patterns are used as exercises in order to develop one's pitch accuracy, tone, dexterity, agility, flexibility, and speed. These exercises also help train your ear. Training your ear helps you recognized patterns, notes, thaats, ragas, and scales. This book will bring your practice to the next level and make you an improvisation wizard. There is a brief introduction on what sargam notes are and the 10 thaats. The 10 thaats are the 10 major modes within northern Indian classical music. This book uses 2 and 3 notes in order to make 3, 4, 5, and 6 note pattern phrases that go up and down a complete scale . This is a must for jazz musicians
