As a former bodyguard, it should be easy for Gary Fenris to kill, especially when the motive is revenge. But Gary has made two mistakes in his life. The first was letting the woman he loved die on his watch. The second was thinking vengeance could bring him peace. Local bookstore owner and amateur lock pick Kate Rowan loves nothing more than a good mystery. Her curiosity soon leads her down a trail of blackmail, obsession and death. Despite the risk - or maybe because of it - Gary finds himself drawn to Kate. When danger strikes, Gary is forced to face the fact that he used love as an excuse for murder. And he's got one last score to settle.

Management cases are an inseparable part of any Business School class. Cases help students understand complex business situations, apply theoretical knowledge and learn to articulate their opinions before any audience. The cases can be valuable to both students and instructors alike because one learns better

when actively engaged. Tedious theoretical concepts are retained longer and understood better when they are applied to real life situations and discussed in classrooms extensively. These deliberations have an inherent benefit of honing their convincing and negotiation skills and developing communication capabilities. Case discussions and presentations also develop team building and inter-personal skills. This book contains narrations of various business scenarios which require critical thinking and strategic decision making. They begin with the central problem and go on as an interesting story, culminating at a point which requires responses from its readers. They may talk of a fundamental business issue but are narrated in a suspenseful, stylised and exciting context. This book is aimed at management students, scholars and executives working in the corporate.

This comprehensive study highlights the importance of legislative and extralegal committees in the political and institutional development of early American history, showing how the colonial experience modified a basic British institution, using it in the cause of legislative supremacy and, eventually, independence. The book illuminates the role played by committees in the growth of colonial self-government, tracing the committee system to its origins in the parliamentary committees of medieval England, then following the permutations of the committee system through the decades in which self-government emerged in South Carolina. Solid, penetrating, the book offers new depths of insight into an important process that had vital importance to the growth

of representative government in America.
