World History: An Introduction provides readers with the knowledge and tools necessary to understand the global historical perspective and how it can be used to shed light on both our past and our present. A concise and original guide to the concepts, methods, debates and contents of world history, it combines a thematic approach with a clear and ambitious focus. Each chapter traces connections with the past and the present to explore major questions in world history: How did humans evolve from an endangered species to the most successful of them all? How has nature shaped human history? How did agricultural societies push human history in a new direction? How has humankind organized itself in ever more complex administrative systems? How have we developed new religious and cultural patterns? How have the paths of 'The West' and 'The Rest' diverged over the last five centuries? How, at the same time, has the world become more interconnected and "globalized"? How is this world characterized by growing gaps in wealth, poverty and inequality? Sharp and accessible, Eric Vanhaute's introduction to this exciting field demonstrates that world history is more of a perspective than a single all-encompassing narrative: an instructive new way of seeing, thinking and doing. It is an essential resource for students of history in a global context.

Survivor Café Chicago Review Press

Anamorphosis in Early Modern Literature explores the prevalence of anamorphic perspective in the seventeenth and eighteenth centuries in England. Jen Boyle investigates how anamorphic media flourished in early modern England as an interactive

technology and mode of affect in public interactive art, city and garden design, and as a theory and figure in literature, political theory and natural and experimental philosophy. Anamorphic mediation, Boyle brings to light, provided Milton, Margaret Cavendish, and Daniel Defoe, among others, with a powerful techno-imaginary for traversing through projective, virtual experience. Drawing on extensive archival research related to the genre of "practical perspective" in early modern Europe, Boyle offers a scholarly consideration of anamorphic perspective (its technical means, performances, and embodied practices) as an interactive aesthetics and cultural imaginary. Ultimately, Boyle demonstrates how perspective media inflected a diverse set of knowledges and performances related to embodiment, affect, and collective consciousness.

"Every man who undertakes the journey to the Our Lord's Sepulcher needs three sacks: a sack of patience, a sack of silver, and a sack of faith."—Symon Semeonis, an Irish medieval pilgrim
 As medieval pilgrims made their way to the places where Jesus Christ lived and suffered, they experienced, among other things: holy sites, the majesty of the Egyptian pyramids (often referred to as the "Pharaoh's granaries"), dips in the Dead Sea, unfamiliar desert landscapes, the perils of traveling along the Nile, the customs of their Muslim hosts, Barbary pirates, lice, inconsiderate traveling companions, and a variety of difficulties, both great and small. In this richly detailed study, Nicole Chareyron draws on more than one hundred firsthand accounts to consider the journeys and worldviews of medieval pilgrims. Her work brings the reader into vivid, intimate contact with the pilgrims' thoughts and emotions as they made the frequently difficult pilgrimage to the Holy Land and back home again. Unlike the knights, princes, and soldiers of the Crusades, who traveled to the Holy Land for the purpose of reclaiming it for Christendom, these subsequent pilgrims of various nationalities, professions, and social classes were motivated by both religious piety and personal curiosity. The travelers not only wrote journals and memoirs for themselves but also to convey to others the majesty and strangeness of distant lands. In their accounts, the pilgrims relate their sense of astonishment, pity, admiration, and disappointment with humor and a touching sincerity and honesty. These writings also reveal the complex interactions between Christians, Jews, and Muslims in the Holy Land. Throughout their journey, pilgrims confronted occasionally hostile Muslim administrators (who controlled access to many holy sites), Bedouin tribes, Jews, and Turks. Chareyron considers the pilgrims' conflicted, frequently simplistic, views of their Muslim hosts and their social and religious practices.

 This book about teachers as characters in popular media

examines what can be learned from fictional teachers for the purposes of educating real teachers. Its aim is twofold: to examine the constructed figure of the teacher in film, television and text and to apply that examination in the context of teacher education. By exploring the teacher construct, readers are able to consider how popular fiction and film have influenced society's understandings and views of classroom teachers. Organized around four main themes—Identifying with the Teacher Image; Constructing the Teacher with Content; Imaging the Teacher as Savior; The Teacher Construct as Commentary—the chapters examine the complicated mixture of fact, stereotype and misrepresentation that create the image of the teacher in the public eye today. This examination, in turn, allows teacher educators to use popular culture as curriculum. Using the fictional teacher as a text, preservice—and practicing—teachers can examine positive and negative (and often misleading) representations of teachers in order to develop as teachers themselves.

Due to the scarcity of sources regarding actual Jewish and Muslim communities and settlements, there has until now been little work on either the perception of or encounters with Muslims and Jews in medieval Scandinavia and the Baltic Region. The volume provides the reader with the possibility to appreciate and understand the complexity of Jewish-Christian-Muslim relations in the medieval North. The contributions cover topics such as cultural and economic exchange between Christians and members of other religions; evidence of actual Jews and Muslims in the Baltic Rim; images and stereotypes of the Other. The volume thus presents a previously neglected field of research that will help nuance the overall picture of interreligious relations in medieval Europe.
