*Six Walks: In the Footsteps of Henry David Thoreau* Adams Media  
 The authoritative account of the rise of Amazon and its intensely driven founder, Jeff Bezos, praised by the Seattle Times as "the definitive account of how a tech icon came to life." Amazon.com started off delivering books through the mail. But its visionary founder, Jeff Bezos, wasn't content with being a bookseller. He wanted Amazon to become the everything store, offering limitless selection and seductive convenience at disruptively low prices. To do so, he developed a corporate culture of relentless ambition and secrecy that's never been cracked. Until now. Brad Stone enjoyed unprecedented access to current and former Amazon employees and Bezos family members, giving readers the first in-depth, fly-on-the-wall account of life at Amazon. Compared to tech's other elite innovators -- Jobs, Gates, Zuckerberg -- Bezos is a private man. But he stands out for his restless pursuit of new markets, leading Amazon into risky new ventures like the Kindle and cloud computing, and transforming retail in the same way Henry Ford revolutionized manufacturing. The Everything Store is the revealing, definitive biography of the company that placed one of the first and largest bets on the Internet and forever changed the way we shop and read.

 A New Yorker Best Book of 2022 A New England Indie Bestseller A New York Times Best Book of Summer, a Wall Street Journal and Town & Country Best Book of Spring "A gorgeous reminder that walking is the most radical form of locomotion nowadays." —Nick Offerman "I think Thoreau would have liked this book, and that's a high recommendation." —Bill McKibben, author of The End of Nature On an autumn morning in 1849, Henry David Thoreau stepped out his front door to walk the beaches of Cape Cod. Over a century and a half later, Ben Shattuck does the same. With little more than a loaf of bread, brick of cheese, and a notebook, Shattuck sets out to retrace Thoreau's path through the Cape's

outer beaches, from the elbow to Provincetown's fingertip. This is the first of six journeys taken by Shattuck, each one inspired by a walk once taken by Henry David Thoreau. After the Cape, Shattuck goes up Mount Katahdin and Mount Wachusett, down the coastline of his hometown, and then through the Allagash. Along the way, Shattuck encounters unexpected characters, landscapes, and stories, seeing for himself the restorative effects that walking can have on a dampened spirit. Over years of following Thoreau, Shattuck finds himself uncovering new insights about family, love, friendship, and fatherhood, and understanding more deeply the lessons walking can offer through life's changing seasons. Intimate, entertaining, and beautifully crafted, Six Walks is a resounding tribute to the ways walking in nature can inspire us all.

The challenges to humanity posed by the digital future, the first detailed examination of the unprecedented form of power called "surveillance capitalism," and the quest by powerful corporations to predict and control our behavior. In this masterwork of original thinking and research, Shoshana Zuboff provides startling insights into the phenomenon that she has named surveillance capitalism. The stakes could not be higher: a global architecture of behavior modification threatens human nature in the twenty-first century just as industrial capitalism disfigured the natural world in the twentieth. Zuboff vividly brings to life the consequences as surveillance capitalism advances from Silicon Valley into every economic sector. Vast wealth and power are accumulated in ominous new "behavioral futures markets," where predictions about our behavior are bought and sold, and the production of goods and services is subordinated to a new "means of behavioral modification." The threat has shifted from a totalitarian Big Brother state to a ubiquitous digital architecture: a "Big Other" operating in the interests of surveillance capital. Here is the crucible of an unprecedented form of power marked by extreme concentrations of knowledge and free from democratic oversight. Zuboff's comprehensive and moving analysis lays bare the threats to twenty-first century society: a controlled "hive" of total connection that seduces with promises of total certainty for maximum profit -- at the expense of democracy, freedom, and our human future. With little resistance from law or society, surveillance capitalism is on the verge of dominating the social order and shaping the digital future -- if we let it.
