Ferrari Brochures and Sales Literature: 1946-1967 McGraw-Hill Companies

Behind the walls of an old farm somewhere in France, several dozen antique classic cars had been neglected for decades, enjoying a kind of 100-year sleep. Surrounded by a profusion of plants and practically forgotten by their owner, no one knew of the collection until, in 1983, permission was granted for it to be photographed. The commission fell to one of Europe's leading photographers, Herbert W. Hesselmann, who promised never to disclose the identity of the owner or location of the collection, and the story made headlines all over the world. This haunting compilation expertly captures the mystery and drama of the vintage car collection of the century, and is accompanied with commentary by Halwart Schrader. Although the collection shown here no longer exists, the untouched patina of these cars still exerts a powerful and mysterious fascination, inviting viewers to explore a forgotten era.

More than 120 authors from science and industry have documented this essential resource for students, practitioners, and professionals. Comprehensively covering the development of the internal combustion engine (ICE), the information presented captures expert knowledge and serves as an essential resource that illustrates the latest level of knowledge about engine development. Particular attention is paid toward the most up-to-date theory and practice addressing thermodynamic principles, engine components, fuels, and emissions. Details and data cover classification and characteristics of reciprocating engines, along with fundamentals about diesel and spark ignition internal combustion engines, including insightful perspectives about the history, components, and complexities of the present-day and future IC engines. Chapter highlights include: • Classification of

reciprocating engines • Friction and Lubrication • Power, efficiency, fuel consumption • Sensors, actuators, and electronics • Cooling and emissions • Hybrid drive systems Nearly 1,800 illustrations and more than 1,300 bibliographic references provide added value to this extensive study. "Although a large number of technical books deal with certain aspects of the internal combustion engine, there has been no publication until now that covers all of the major aspects of diesel and SI engines." Dr.-Ing. E. h. Richard van Basshuysen and Professor Dr.-Ing. Fred Schäfer, the editors, "Internal Combustion Engines Handbook: Basics, Components, Systems, and Perspectives"

- A tribute to the Volkswagen Beetle, the most-loved car in the world - Glorious photographs throughout Beetle Love endures. It's

global and conquers every generation. And this love is classless. Never mind if used as a taxi on a daily basis, as a company car owned by a craft brewery in Ecuador, as a show piece in Great Britain or as a family heirloom in Indonesia: Beetle Love introduces them all. Convertibles and limousines, from red to rusty, from purple to polished. And it's always the story that their owners lost their hearts to the Beetle. And rightly so! Hardly any other car arouses more emotions around the world. All covered in this book, more than 20 stories, 208 pages, a wonderful and unique picture and story book. Text in English and German.
