 New York Times Bestseller: Arnold Schwarzenegger's classic candid memoir of his extraordinary bodybuilding career and the secrets behind his success. I still remember that first visit to the bodybuilding gym. I had never seen anyone lifting weights before. Those guys were huge and brutal. . . . The weight lifters shone with sweat; they were powerful looking, Herculean. And there it was before me—my life, the answer I'd been seeking. It clicked. It was something I suddenly just seemed to reach out and find, as if I'd been crossing a suspended bridge and finally stepped off onto solid ground. Five-time Mr. Universe, seven-time Mr. Olympia, and Mr. World—all before he became a major movie star and then governor of California—Arnold Schwarzenegger, nicknamed the "Austrian Oak," is the most famous name in bodybuilding. This is his classic bestselling account of his experiences in bodybuilding—his discovery of the sport as a teenager; his parents' pressure to give up on it; his obsessive determination and ambition; and his rise to international celebrity. In addition, Arnold shares his fitness and training secrets—demonstrating with a comprehensive step-by-step program and dietary hints how to use bodybuilding for better health. His program includes a special four-day regimen of specific exercises to develop individual muscle groups—each exercise illustrated with photos of Arnold in action.

 The Corsican Brothers tells the story of two conjoined brothers who, though separated at birth, can still feel each other's pains. The story starts in March 1841, when the narrator travels to Corsica and stays at the home of the widow Savilia de Franchi who lives near Olmeto and Sullacaro. She is a mother of a former conjoined twin, Louis and Lucien. Louis is a lawyer in Paris, while Lucien clings on to his Corsican roots and thus stays at his mother's home. The narrator learns that the brothers were once conjoined, but separated at birth by a doctor with his scalpel. Despite being separated Louis and Lucien can still feel each other's emotions, even at distance. Lucien explains he has a mission to undertake, with reluctance. He has to mediate in a vendetta between the Orlandi and Colona families and invites the narrator to accompany him and meet the head of the Orlandi family. Alexandre Dumas, père (1802-1870) was a French writer whose works have been translated into nearly 100 languages and he is one of the most widely read French authors. His most famous works are *The Count of Monte Cristo* and *The Three Musketeers*.

Filmatized in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Northup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US, on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.

 Scott was a late bloomer and had always been very shy around girls. He was finished with high school and needed a job. He'd heard about a construction company that might be hiring and went to apply. There he met a cute young guy who directed him to the boss. Will was in his late twenties and as gorgeous a man that Scott had ever seen. He got the job and soon he and the other young guy who worked there became friends. Their friendship bloomed and soon Scott knew there was something more happening. He was a virgin but not for long.

 This book examines the development of innovative modern methodologies towards augmenting conventional plant breeding for the production of new crop varieties, under the increasingly limiting environmental and cultivation factors, to achieve sustainable agricultural production and enhanced food security. Two volumes of *Advances in Plant Breeding Strategies* were published in 2015 and 2016, respectively; Volume 1: *Breeding, Biotechnology and Molecular Tools* and Volume 2: *Agronomic, Abiotic and Biotic Stress Traits*. This is Volume 3: *Fruits*, which is

focused on advances in breeding strategies for the improvement of individual fruit crops. It consists of 23 chapters grouped into three parts, according to distribution classification of fruit trees: Part I, Temperate Fruits, Part II, Subtropical Fruits, and Part III, Tropical Fruits. Each chapter comprehensively reviews the modern literature on the subject and reflects the authors' own experience.

 Everything you wanted to know about sex and love in Islam, but were hesitant to ask about: polygamy, contraception allowed by Sharia, oral and group sex, homosexual marriages and also the relationship with jinns, masturbation and mysteries of martial relations - all that is allowed and all that is prohibited in sexual relations in this noble and pure religion. Many people both in the West and Russia continue to have a mistaken illusion that love, sex and variability of relations between man and woman are either suppressed in Islam or in contrary exceed all norms of decency. The book is an insight into this matter. The Muslim man is perceived as an ideal type of an always ready sexual partner. *Love and Sex in Islam* lifts the veil covering the delicate theme, in which the phenomena seeming incompatible turn out to be good neighbors.

 The biological effects of asteroid and comet impacts have been widely viewed as primarily destructive. The role of an impactor in the K/T boundary extinctions has had a particularly important influence on thinking concerning the role of impacts in ecological and biological changes. th During the 10 and final workshop of the ESF IMPACT program during March 2003, we sought to investigate the wider aspects of the involvement of impact events in biological processes, including the beneficial role of these events from the prebiotic through to the ecosystem level. The ESF IMPACT programme (1998-2003) was an interdisciplinary effort that is aimed at understanding impact processes and their effects on the Earth environment, including environmental, geological and biological changes. The IMPACT programme has 15 member states and the activities of the programme range from workshops to short courses on topics such as impact stratigraphy, shock metamorphism, etc. The program has also awarded mobility grants and been involved in the development of teaching aids and numerous publications, including this one.

 Pharmaceutical Biotechnology is a unique compilation of reviews addressing frontiers in biologicals as a rich source for innovative medicines. This book fulfills the needs of a broad community of scientists interested in biologicals from diverse perspectives—basic research, biotechnology, protein engineering,

protein delivery, medicines, pharmaceuticals and vaccinology. The diverse topics range from advanced biotechnologies aimed to introduce novel, potent engineered vaccines of unprecedented efficacy and safety for a wide scope of human diseases to natural products, small peptides and polypeptides engineered for discrete prophylaxis and therapeutic purposes. Modern biologicals promise to dramatically expand the scope of preventive medicine beyond the infectious disease arena into broad applications in immune and cancer treatment, as exemplified by anti-EGFR receptors antibodies for the treatment of breast cancer. The exponential growth in biologicals such as engineered proteins and vaccines has been boosted by unprecedented scientific breakthroughs made in the past decades culminating in an in-depth fundamental understanding of the scientific underpinnings of immune mechanisms together with knowledge of protein and peptide scaffolds that can be deliberately manipulated. This has in turn led to new strategies and processes. Deciphering the human, mammalian and numerous pathogens' genomes provides opportunities that never before have been available—identification of discrete antigens (genomes and antigenomes) that lend themselves to considerably improved antigens and monoclonal antibodies, which with more sophisticated engineered adjuvants and agonists of pattern recognition receptors present in immune cells, deliver unprecedented safety and efficacy. Technological development such as nanobiotechnologies (dendrimers, nanobodies and fullerenes), biological particles (viral-like particles and bacterial ghosts) and innovative vectors (replication-competent attenuated, replication-incompetent recombinant and defective helper-dependent vectors) fulfill a broad range of cutting-edge research, drug discovery and delivery applications. Most recent examples of breakthrough biologicals include the human papilloma virus vaccine (HPV, prevention of women genital cancer) and the multivalent Pneumococcal vaccines, which has virtually eradicated in some populations a most prevalent bacterial ear infection (i.e., otitis media). It is expected that in the years to come similar success will be obtained in the development of vaccines for diseases which still represent major threats for human health, such as AIDS, as well as for the generation of improved vaccines against diseases like pandemic flu for which vaccines are currently available. Furthermore, advances in comparative immunology and innate immunity revealed opportunities for innovative strategies for ever smaller biologicals and vaccines derived from species such as llama and sharks, which carry tremendous potential for innovative biologicals already in development stages in many pharmaceutical companies. Such recent discoveries and knowledge exploitations hold the promise for breakthrough biologicals, with the coming decade. Finally, this book caters to individuals not directly engaged in the pharmaceutical drug discovery process via a chapter outlining discovery, preclinical development, clinical development and translational medicine issues that are critical the drug development process. The authors and editors hope that this compilation of reviews will help readers rapidly and completely update knowledge and understanding of the frontiers in pharmaceutical biotechnologies.

Hindústāni as it Ought to be Spoken Australian National University While the science of yogurt is nearly as old as the origin of mankind, there have been rapid changes in yogurt development since the turn of the 19th century, fueled by continuing developments in biological sciences. Development and Manufacture of Yogurt and Other Functional Dairy Products presents a comprehensive review of all aspects of yogurt and other fermented dairy foods, including production, processing, preparation, regulations, and health aspects. Condensing more than 12,000 pages of recently published literature, expert contributors, including several clinicians, address the most recent developments in probiotics and the interaction between yogurt and immunological and intestinal bowel diseases. They explain how beneficial and harmful bacteria are colonized in the human intestinal system and how those bacteria can either strengthen or weaken immunological functions. This resource also explores the little-known varieties of functional dairy products – such as ayran, kefir, koumiss, cacik, and tarator – that are currently only consumed in small parts of the world but that are likely to reach supermarkets worldwide in the not-so-distant future. Development and Manufacture of Yogurt and Other Functional Dairy Products presents the most recent developments in biosciences and their applications in yogurt-human health interactions. The depth and breadth of coverage make this book an indispensable reference for those involved with the research and manufacturing of milk and dairy products.

The ancient region of Gandhara, with its prominent Buddhist heritage, has long fascinated scholars of art history, archaeology, and textual studies. Discoveries of inscriptions, text fragments,

sites, and artworks in the last decade have added new pieces to the Gandharan puzzle, redefining how we understand the region and its cultural complexity. The essays in this volume reassess Gandharan Buddhism in light of these findings, utilizing a multidisciplinary approach that illuminates the complex historical and cultural dynamics of the region. By integrating archaeology, art history, numismatics, epigraphy, and textual sources, the contributors articulate the nature of Gandharan Buddhism and its practices, along with the significance of the relic tradition. Contributions by several giants in the field, including Shoshin Kuwayama, John Rosenfield, and the late Maurizio Taddei, set the geographical, historical, and archaeological parameters for the collection. The result is a productive interdisciplinary conversation on the enigmatic nature of Gandharan Buddhism that joins together a number of significant pieces in a complex cultural mosaic. It will appeal to a large and diverse readership, including those interested in the early Buddhist religious tradition of Asia and its art, as well as specialists in the study of South and Central Asian Buddhist art, archaeology, and texts. The Pushcart Prize-winning poet's memoir of his criminal youth and years in prison: a "brave and heartbreaking" tale of triumph over brutal adversity (The Nation). Jimmy Santiago Baca's "astonishing narrative" of his life before, during, and immediately after the years he spent in the maximum-security prison garnered tremendous critical acclaim. An important chronicle that "affirms the triumph of the human spirit," it went on to win the prestigious 2001 International Prize (Arizona Daily Star). Long considered one of the best poets in America today, Baca was illiterate at the age of twenty-one when he was sentenced to five years in Florence State Prison for selling drugs in Arizona. This raw, unflinching memoir is the remarkable tale of how he emerged after his years in the penitentiary—much of it spent in isolation—with the ability to read and a passion for writing poetry. "Proof there is always hope in even the most desperate lives." —Fort Worth Star-Telegram "A hell of a book, quite literally. New York Times • Times Critics Top Books of 2021 The Times (of London) • Best Books of the Year Excerpted in The New Yorker Profiled in The Los Angeles Times Publishing for the centenary of her birth, Patricia Highsmith's diaries "offer the most complete picture ever published" of the canonical author (New York Times). Relegated to the genre of mystery during her lifetime, Patricia Highsmith is now recognized as one of "our greatest modernist writers" (Gore Vidal). Beloved by fans who were unaware of the

real psychological turmoil behind her prose, the famously secretive Highsmith refused to authorize a biography, instead sequestering herself in her Switzerland home in her final years. Posthumously, her devoted editor Anna von Planta discovered her diaries and notebooks in 1995, tucked in a closet—with tantalizing instructions to be read. For years thereafter, von Planta meticulously culled from over eight thousand pages to help reveal the inscrutable figure behind the legendary pen. Beginning with her junior year at Barnard in 1941, Highsmith ritualistically kept a diary and notebook—the former to catalog her day, the latter to brainstorm stories and hone her craft. This volume weaves diary and notebook simultaneously, exhibiting precisely how Highsmith's personal affairs seeped into her fiction—and the sheer darkness of her own imagination. Charming yet teetering on the egotistical, young "Pat" lays bare her dizzying social life in 1940s Greenwich Village, barhopping with Judy Holliday and Jane Bowles, among others. Alongside Flannery O'Connor and Chester Himes, she attended—at the recommendation of Truman Capote—the Yaddo artist colony in 1948, where she drafted *Strangers on a Train*. Published in 1950 and soon adapted by Alfred Hitchcock, this debut novel brought recognition and brief financial security, but left a heartsick Highsmith agonizing: "What is the life I choose?" Providing extraordinary insights into gender and sexuality in mid-twentieth-century America, Highsmith's diaries convey her euphoria writing *The Price of Salt* (1951). Yet her sophomore novel would have to be published under a pseudonym, so as not to tarnish her reputation. Indeed, no one could anticipate commercial reception for a novel depicting love between two women in the McCarthy era. Seeking relief from America, Highsmith catalogs her peripatetic years in Europe, subsisting on cigarettes and growing more bigoted and satirical with age. After a stay in Positano with a new lover, she reflects in her notebooks on being an expat, and gleefully conjures the unforgettable *The Talented Mr. Ripley* (1955); it would be this sociopathic antihero who would finally solidify her true fame. At once lovable, detestable, and mesmerizing, Highsmith put her turbulent life to paper for five decades, acutely aware there must be "a few usable things in literature." A memoir as significant in our own century as Sylvia Plath's journals and Simone de Beauvoir's writings were to another time, Patricia Highsmith: *Her Diaries and Notebooks* is an historic work that chronicles a woman's rise against the conventional tide to unparalleled literary prominence.

The Mughal Empire from Jahangir to Shah Jahan Oxford University Press, USA

* The first multi-disciplinary analysis of Shah Jahan and his predecessor Jahangir, this collection of essays focuses on one of the least studied periods of Mughal history, the reign of Shah Jahan* Through subaltern court writing, art, architecture, accounts of foreign traders and poetry, the authors reconstruct the court of the Mughal emperor, whose influence extended even to 19th-century AfghanistanThe reign of Shah Jahan (1628-58) is widely regarded as the golden age of the Mughal empire, yet it is one of the least studied periods of Mughal history. In this volume, 14 eminent scholars with varied historical interests - political, social, economic, legal, cultural, literary and art-historical - present for the first time a multi-disciplinary analysis of Shah Jahan and his predecessor Jahangir (r. 1605-27). Corinne Lefèvre, Anna Kollatz, Ali Anooshahr, Munis Faruqui and Mehreen Chida-Razvi study the various ways in which the events of the transition between the two reigns found textual expression in Jahangir's and Shah Jahan's historiography, in subaltern courtly writing, and in art and architecture. Harit Joshi and Stephan Popp throw light on the emperor's ceremonial interaction with his subjects and Roman Siebertz enumerates the bureaucratic hurdles which foreign visitors had to face when seeking trade concessions from the court. Sunil Sharma analyses the new developments in Persian poetry under Shah Jahan's patronage and Chander Shekhar identifies the Mughal variant of the literary genre of prefaces. Ebba Koch derives from the changing ownership of palaces and gardens insights about the property rights of the Mughal nobility and imperial escheat practices. Susan Stronge discusses floral and figural tile revetments as a new form of architectural decoration and J.P. Losty sheds light on the changes in artistic patronage and taste that transformed Jahangiri painting into Shahjahani. R.D. McChesney shows how Shah Jahan's reign cast such a long shadow that it even reached the late 19th- and early 20th-century rulers of Afghanistan.This imaginatively conceived collection of articles invites us to see in Mughal India of the first half of the 17th century a structural continuity in which the reigns of Jahangir and Shah Jahan emerge as a unit, a creative reconceptualization of the Mughal empire as visualized by Akbar on the basis of what Babur and Humayun had initiated. This age seized the imagination of the contemporaries and, in a world as yet unruptured by an intrusive colonial modernity, Shah Jahan's court was regarded as the paradigm of civility, progress and development.
