Urban water conflicts manifested first in Europe in the 19th century and are observed nowadays in various forms throughout the world; in particular, in developing countries. Main causes of these conflicts are characterized by complex socioeconomic and institutional issues related to urban water management. The debate about public water services ver

Today's environmental problems—climate change, loss of biodiversity, polluted air, land, and water—all have their origins to a greater or lesser extent in how we have lived, played and worked. At a time when societies are confronted with the often dramatic consequences of past choices made in the fields of energy, technology, industry, agriculture, urbanisation and consumption, we need a history that casts more light on the ways in which unsustainable human-nature relationships came into being. This means forging stronger connections between social and environmental history. Common Ground opens up a dialogue between two sub-disciplines that to date have remained largely parallel endeavours, bringing together both established and younger scholars from both fields to explore how people's everyday lives have connected to their environments—and with what effects.

The book is organised in six sections: leisure and environment; nature and conservation; environmental conflicts; folk and scientific knowledge; environmental disasters; and energy, industry and urban infrastructure. By exploring the complex interplay between people's day-to-day activities and ecological change, especially the values, beliefs and environmental experiences of ordinary men and women, we can better understand our past relationships with nature and perhaps make more informed planning and policy choices in the future.

The Urbanisation of the North-Western Provinces of the Roman Empire Lavoisier
Historical Dictionary of Ancient Egypt, Third Edition aims to give a basic overview of Egyptian history and civilization from its origin until its demise at the Arabic conquest for both the academic scholar and the interested layman.

The Studio Renaissance du Livre

In this, her first book, scholar Demaree C. Peck assigns Willa Cather her rightful place in our literary history. Challenging the assumption that women writers must draw their inspiration from a lineage of female predecessors, Peck portrays Willa Cather as a woman who self-consciously set out to write within a male literary tradition that she identified as Emersonian. Peck explores the psychological underpinnings of Cather's aesthetics to show that her theory of

stylistic economy and simplicity was motivated by a desire to reorganize the elements of the artistic stage exclusively around her own romantic ego - that "inexplicable presence of the thing not named". Although Cather's protagonists appear in various disguises, clad as pioneers, lawyers, or priests, they are all incarnations of the artist who appropriates people and places as parts of consciousness. Cather's imaginative claimants seek to assimilate the world as a reflection of the self, in the way that their prototype, Emerson's poet-landlord, enjoys a figurative ownership of the landscape in reward for his integrating vision. The novels offer a series of ingenious masquerades beneath whose plots lurk variations of a single story impelled by the artist's quest to take imaginative possession of the world in order to recover the dominion of her soul. Unlike critics who have discussed Cather's novels as a series of discrete experiments, Peck charts the pursuit for imaginative possession as a continuous theme, thereby suggesting a coherence for Cather's art and career as a whole. Offering original interpretations of eight of Cather's novels in the light of previously undiscussed letters and other biographical materials, Peck explores the relation between Cather's life and art to suggest that she created her central characters as surrogates whose imaginative accumulations could compensate her for various dispossessing experiences in her own life. Cather's novels operate according to the psychological laws of wish fulfillment. While Cather's romanticism has its historical origin in American transcendentalism, its psychological origin derives from the mythic domain of childhood. Cather's "kingdom of art" sanctions the dream projected upon

childhood of an original omnipotence that could cheat fate and remain unsoiled by experience. Her novels enact a fantasy of return to primal wholeness. Peck suggests that the novels serve a restorative function not only for their author, but for Cather's readers as well. Cather's fiction is significant, Peck argues, because it performs an important psychological work for its audience.

Discrete, Continuous, and Hybrid Petri Nets Susquehanna University Press

This study investigates the development of urbanism in the north-western provinces of the Roman empire. Key themes include continuity and discontinuity between pre-Roman and Roman 'urban' systems, relationships between juridical statuses and levels of monumentality, levels of connectivity and economic integration, and regional urban hierarchies.

Practical Guide to Aix-les-Bains, Chambery, Savoy Hardpress Publishing
Quels charmes, quelles circonstances, quels talents ont permis à Aix-les-Bains de devenir la "Station des reines et la Reine des stations", celle où il fallait se montrer, où la richesse venait à la rencontre de la beauté et de la santé ? Aujourd'hui encore, palaces, casino, thermes majestueux et villas témoignent de ces heures de gloire. Geneviève Frieh-Giraud raconte le passé, le plus gai, le plus séduisant de la célèbre ville d'eaux, celui de la Belle Epoque !

À bientôt 50 ans, Rodrigo Beenkens est et reste au fil des années l'incontestable journaliste sportif francophone préféré des téléspectateurs. S'il jongle entre football et cyclisme, le Bruxellois a pris la succession de Théo Mathy en 1990 et

commente depuis avec brio le Tour de France et la plupart des classiques cyclistes pour la RTBF. Après 21 Tours de France à son compteur, des milliers d'heures d'antenne en direct, des dizaines de milliers de kilomètres parcourus, le moment est venu pour le commentateur de jeter un œil dans le rétroviseur et de se remémorer les grands moments, les belles rencontres et les anecdotes qui ont jalonné ses Grands Boucles. De Franck Baudoncq, son collègue de la RTBF avec qui il a partagé ses premiers Tours, à Albin Delsault, son chauffeur attiré et homme de confiance, en passant par les illustres consultants avec qui il a partagé le micro, la voiture et la table, Beenkens nous fait visiter les six coins de l'Hexagone.

Body, Cosmos and Eternity Taylor & Francis

Petri Nets were introduced and still successfully used to analyze and model discrete event systems especially in engineering and computer sciences such as in automatic control. Recently this discrete Petri Nets formalism was successfully extended to continuous and hybrid systems. This monograph presents a well written and clearly organized introduction in the standard methods of Petri Nets with the aim to reach an accurate understanding of continuous and hybrid Petri Nets, while preserving the consistency of basic concepts throughout the book. The book is a monograph as well as a didactic tool which is easy to understand due to many simple solved examples and detailed figures. In its second completely reworked edition various sections, concepts and recently developed algorithms are added as well as additional examples/exercises.

And ultimately shows how the premier vacation of an era made and was made by the bourgeoisie.

Common Ground Archaeopress Publishing Ltd

Au regard du Code de l'environnement, les digues, considérées comme ouvrages hydrauliques, ne doivent pas rompre de façon dangereuse pour les populations. En tant que moyen de prévention du risque d'inondation ou de submersion, les performances et les limites de ces digues doivent être connues avec précision. Les digues de protection constituent donc une question politique mise en évidence par plusieurs événements récents (Xynthia 2010, la Nouvelle-Orléans 2005, Rhône aval 2003, Gard 2002, Aude 1999). Cet ouvrage rassemble les contributions présentées lors du 2e colloque national Digues maritimes et fluviales de protection contre les submersions (Digues2013), organisé par l'Irstea et Promosciences, les 12, 13 et 14 juin 2013 au Centre des Congrès d'Aix-en-Provence, avec le soutien du MEDDE, du CFBR, et de la Région Provence-Alpes-Côte d'Azur. Il s'adresse aux maîtres d'ouvrages, gestionnaires, concepteurs, constructeurs, enseignants et chercheurs, services de contrôle, organismes financeurs, agissant dans les domaines d'activités liés, directement ou

indirectement, à la sûreté des digues maritimes et fluviales.
