Environmental law and policy in India affects all sections of society. Those most deeply affected are the poor. Displaced by deforestation, dam-building and degradation of natural resources, they are the first victims of poor sanitation, contaminated water, polluted air and scarce wood. This

edition of Environmental Law and Policy in India retains the familiar analytical structure of the 1991 edition, but is thoroughly revised and updated. More than 4/5ths of the material is new. The volume is interlaced with notes, comments and questions to encourage critical thinking among lawyers and law students. It compiles all the leading cases in environmental law in India with concise extracts of landmark judgments and documents. It focuses on environmental law, policy, problems and needs with the comprehensiveness of an American law case book.

Since 1991, Dr. Mitchell Gaynor has been achieving remarkable results by integrating music, vocalization, breathing, and meditation techniques in his work with patients. In *The Healing Power of Sound*, he presents his sound-based techniques for self-healing—techniques that anyone can use, whether faced with a life-threatening disease or simply seeking relief from the stresses of daily life. Numerous studies have demonstrated the health benefits of music: it can lower blood pressure and heart and respiratory rates; reduce cardiac complications; increase the immune response; and boost our natural opiates. Gaynor shows how, when integrated as part of a mind-body-spirit approach to wellness, music can play a significant part in maintaining a healthy lifestyle

or in healing serious disease. The Healing Power of Sound includes twelve exercises involving breathing, meditation, and "toning"—using pure vocal sound to resolve tension, release emotion, and spur the healing process—that can be used by anyone to improve health and quality of life.

The middle classes of Indonesia's provincial towns are not particularly rich yet nationally influential. This book examines them ethnographically. Rather than a market-friendly, liberal middle class, it finds a conservative petty bourgeoisie just out of poverty and skilled at politics. Please note that Sylvia Tidey's article (pp. 89-110) will only be available in the print edition of this book (9789004263000).

This book traces the development of exorcism in Catholic Christianity from the fourth century to the present day, and seeks to explain why exorcism is still so much in demand. This is the first work in English to trace the development of the liturgy, practice and authorisation of exorcisms in Latin Christianity. The rite of exorcism, and the claim by Roman Catholic priests to be able to drive demons from the possessed, remains an enduring source of popular fascination, but the origins and history of this controversial rite have been little explored. Arguing that belief in the need for exorcism typically re-emerges at periods of crisis for the church, Francis Young explores the shifting boundaries between authorised exorcisms and unauthorised magic throughout Christian history, from Augustine of Hippo to Pope Francis. This book offers the historical background to – and suggests reasons for – the current resurgence of exorcism in the global Catholic Church.

Andalus International Nursing Conference (AINiC) is a dedicated conference aimed at researchers in nursing, public health and other health sciences topics. The 1st AINiC 2017 was held in Padang, West Sumatra, Indonesia, from 25-27 September 2017. The conference theme was "Strengthening Research Capacity and Disseminating New Findings in Nursing and Public Health". This event was successful in bringing together experts, researchers, healthcare professionals, and students worldwide. It was an inspiring occasion for most of the participants and was a great opportunity for research development learning, especially with regard to disseminating new findings in nursing and to stimulate networking of nursing professionals, researchers and educators. The research topics that were presented during the conference have clearly indicated the need for literature development and guidance of clinical practice decisions. We hope this conference has provided ample opportunities for participants to gain a more in-depth understanding of knowledge and renewed perspectives. All these aspects have been acknowledged by the participants during the conference. The 1st AINiC was a rewarding event and we look forward to your attendance and participation in the next AINiC conference that will also provide stimulating research developments, networking and cooperation.

Systemic Functional Linguistics is a functional model of language inspired by the work of Saussure, Hjelmslev, Whorf, and Firth. SFL was developed by Michael Halliday and his colleagues in the 1960s and has grown into a widely studied and research field, with growing interest in China, Latin America, and North America. This new five-volume collection from Routledge focuses on the foundational papers underlying SFL theory and practice and illustrative papers that have inspired succeeding work.
