Students come to the school library every day with questions ranging from "How many people live in China?" to "I need to find out how the Sun began for my science paper." Helping students find the answers to their questions is one of the most important responsibilities school librarians have. In *Introduction to Reference and Information Services in Today's School Library*, one of America's premier school library educators covers the A-Z of both reference and information services for today's library. Everything from teaching students how to use sources to both in-person and virtual reference service is covered. A key feature of the text is an annotated bibliography of core print and electronic sources for elementary, middle, and high school collections. Yes, reference and information services are vital library functions in the digital age. Even students who appear to be tech savvy have trouble finding the right information efficiently - and knowing what to do with it. This book examines information needs and behaviors, and provides strategies for assessing and meeting the informational needs of the school community. The book also addresses the conditions for optimum service: physical access (including virtual access), effective interaction and collaboration, instructional design, and systematic planning. Newer issues such as embedded librarianship, curation, collective intelligence, and web 2.0 intellectual property are also addressed. This book introduces the entering professional, and updates practitioners, to current standards and useful strategies.

The Practice of Court Interpreting describes how the interpreter works in the court room and other legal settings. The book discusses what is involved in court interpreting: case preparation, ethics and procedure, the creation and avoidance of error, translation and legal documents, tape transcription and translation, testifying as an expert witness, and continuing education outside the classroom. The purpose of the book is to provide the interpreter with a map of the terrain and to suggest methods that will help insure an accurate result. The author, herself a practicing court interpreter, says: "The structure of the book follows the structure of the work as we do it." The book is intended as a basic course book, as background reading for practicing court interpreters and for court officials who deal with interpreters.
